Bills introduced in the Council of State and Legislative Assembly, Reports of Select Committees presented to the Council and Assembly and Bills published under Rule 18 of the Indian Legislative Rules.

#### COVERNMENT OF INDIA.

#### Legislative Assembly Department.

The following Bill was introduced in the Legislative Assembly on the 2nd September, 1929:—

L. A. Bull No. 13 of 1929.

#### A BILL

to provide for the levy of a cess on soft coke despatched by rail from collieries in the provinces of Bennal and Bihar and Orissa.

Whereas it is expedient to provide for the creation of a fund to be expended by a Committee specially constituted in this behalf for the promotion of the interests of the soft coke industry in the provinces of Bengal and Bihar and Orissa;

AND WHEREAS for this purpose it is expedient to levy a cess on soft coke despatched by rail from collieries in the said provinces;

It is hereby enacted as follows:—

Short title, extent and commencement.

- 1. (1) This Act may be called the Indian Soft Coke Cess Act, 1929.
  - (2) It extends to the whole of British India, except Aden.
- (3) It shall come into force on such date as the Governor-General in Council may, by notification in the Gazette of India, appoint.

Definitions.

- 2. In this Act, unless there is anything repugnant in the subject or context,—
  - (a) "Committee" means the Soft Coke Cess Committee constituted under section 4;
  - (b) "prescribed" menns prescribed by rules made under this Act; and
  - (c) "soft coke" means all coke which is unsuitable for metallurgical purposes.

Imposition of soft coke cess.

- 3. (1) There shall be levied and collected on all soft coke despatched by rail from collieries in the provinces of Bengal and Bihar and Orissa a cess at the rate of two annas per ton.
- (2) The cess shall be collected by the Railway Administrations concerned by means of a surcharge on freight and shall be paid to the Committee, after deduction of the expenses of collection (if any), in such manner as may be prescribed.

Constitution of soft Coke Cess Committee.

- 4. (1) The Governor-General in Council shall constitute a Committee, consisting of the following members, to receive and expend the proceeds of the cess:—
  - (i) the Chief Mining Engineer to the Railway Board, ex-officio;
  - (ii) one person nominated by the Local Government of Bengal;
  - (iii) one person nominated by the Local Government of Bihar and Orissa;
  - (iv) seven persons nominated by the Indian Mining Federation; and
  - (v) one person nominated by the Indian Mining Association:

Provided that, if within the period prescribed in this behalf, any authority or body fails to make any nomination which it is entitled to make under this section, the Governor-General in Conneil may himself nominate a member to fill the vacancy.

- (2) The Chief Mining Engineer to the Railway Board shall be ex-officio President of the Committee.
- (3) Where a nominated member dies, resigns, ceases to reside in British India or becomes incapable of acting, the Governor-General in Council may, on the recommendation of the authority or body which would have been entitled to make the nomination if it had been a first nomination under sub-section (1), or where such recommendation is not made within the prescribed period, then on his own initiative, nominate a person to fill the vacancy.
- (4) No act done by the Committee shall be questioned on the ground merely of the existence of any vacancy in, or any defect in the constitution of, the Committee.

Application of proceeds of soft coke cess.

5. The proceeds of the cess and any other monies received by the Committee shall be applied to meeting the expenses of the Committee and the cost of such measures as it may consider advisable to take for promoting the sale and improving the methods of manufacture of soft coke.

Keeping and auditing of accounts.

- 6. (1) The Committee shall keep accounts of all monies received and expended under section 5.
- (2) Such accounts shall be examined and audited annually by auditors appointed in this behalf by the Governor-General in Council; and such auditors may disallow any item which has, in their opinion, been expended out of any monies so received otherwise than as directed by or under this Act.
- (3) If any item is disallowed, an appeal shall lie to the Governor-General in Council, whose decision shall be final.

Power to make rules.

- 7. (1) The Governor-General in Council may, after consulting the Committee and after previous publication, make rules to carry out the purposes of this Act.
- (2) In particular and without prejudice to the generality of the foregoing power, such rules may provide for—
  - (a) the regulation of the nomination of members of the Committee, and the procedure of the Committee,
  - (b) the regulation of the levy, collection and payment of the cess, and
  - (c) the form of accounts to be kept and the publication of an abstract of such accounts with the report of the auditors thereon.
  - (3) All such rules shall be published in the Gazette of India.

Time during which sections 2 to 7 are to remain in force.

8. Sections 2 to 7 shall remain in force only until the 31st December, 1934:

Provided that the Governor-General in Council may, on the recommendation of the Committee, declare, by notification in the Gazette of India, that the said sections shall continue in force for any further period specified in such notification.

Disposal of 'surplus proceeds.

9. When sections 2 to 7 cease to be in force, all monies and other property in the possession of the Committee shall revert to His Majesty.

#### STATEMENT OF OBJECTS AND REASONS.

Indian collieries have for some years past suffered from trade depression, particularly those producing the quality of coal generally known as second class. The owners of such collieries have found some relief in the manufacture and sale of soft coke, suitable for domestic consumption, but the market for soft coke is limited, partly owing to the competition of other fuels, and partly because the value of soft coke as a domestic fuel is not generally realised. In these pircumstances, the ludian Mining Federation approached the Government of India with the suggestion that a cess should be collected by official agency from the trade, and that the proceeds of the cess be devoted to expenditure on measures to popularise soft coke in Indian markets. It is, therefore, considered desirable to impose by legislation a cess of 2 annas per ton on all soft coke despatched by rail from collieries in Bengal and Bihar and Orissa for the purpose of creating a fund to finance measures for promoting the sale and improving the

methods of manufacture of soft coke. It is proposed to entrust the administration of the fund to a Soft Coke Cess Committee, consisting of members representing the two Local Governments concerned, the Indian Mining Federation and the Indian Mining Association, and including the Chief Mining Engineer to the Railway Board, who will also be ex-officio President of the Committee. The Bill, which is largely based on the Tea Cess Act and the Loc Cess Act, is intended to give effect to this proposal. It has the support of the Indian Mining Federation which represents the interests of the soft coke industry.

#### COVERNMENT OF INDIA.

#### Legislative Assembly Department.

The following Bill was introduced in the Legislative Assembly on the 2nd September, 1929:—

I., A. Bill. No. 15 of 1929.

A Bill further to amend the Indian Boilers Act, 1923, for certain purposes.

WHEREAS it is expedient further to amend the Indian Boilers Act, V of 1923. 1923, for the purposes hereinafter appearing; It is hereby enacted as follows:—

Short title.

1. This Act may be called the Indian Boilers (Amendment) Act, 1929.

Amendment of section 2, Act V of 1923, 2. In clause (b) of section 2 of the Indian Bailers Act, 1926 V of 1925; (hereinafter referred to as the said Act), the words "for use outside such vessel" shall be omitted.

Amendment of section 34, Act V or 1923. 3. Section 34 of the said Act shall be re-numbered as sub-section (2) of section 34 and the following sub-section shall be inserted as sub-section (1) of that section, namely:—

Exemptions.

"34. (1) The Local Government may, by notification in the local official Gazette, exempt, from the operation of this Act, subject to such conditions and restrictions as it thinks fit, any boilers or classes or types of boilers used exclusively for the heating of huildings or the supply of hot water."

#### STATEMENT OF OBJECTS AND REASONS.

The definition of "boiler" in clause (b) of section 2 of the Indian Boilers Act, 1923, is defective, as it excludes vessels used for generating steam under pressure for use inside such vessels. Such vessels are as much liable as other vessels to explode if improperly constructed, used or maintained and may be a source of considerable danger. It has therefore been decided to omit the words "for use outside such vessel" from the clause.

2. (lause (2) of Regulation 3 of the Indian Boiler Regulations, 1924, prohibits the registration and consequently the use of a boiler if a structural part subject to pressure is unde of cast-iron. Cast-iron boilers, are, however, extensively used in Europe and in America, and it has been pointed out that the restriction imposed by the law in India on the use of cast-iron boilers is a serious impediment to

the economic heating of buildings and the supply of hot water. It has therefore been decided that a new clause should be added to section 34 of the Indian Boilers Act, 1923, so as to empower Local Governments to exempt from the operation of the Act, subject to such conditions and restrictions as they may think fit to impose, any boilers or classes or types of boilers which are used exclusively for the heating of buildings or for the supply of hot water.

In section 35 of the said Act, clause (a) of sub-section (2) shall be omitted.

#### STATEMENT OF OBJECTS AND REASONS.

The Cantonments (House-Accommodation) Act, 1923, was intended to continue the powers passessed by the military authorities to appropriate, where the need arose, such houses in cantonments as were originally intended, and were suitable, for occupation by military officers or messes; and to safeguard the rights of house-owners, and to secure for them fair rents and equitable conditions of tenancy, when their houses were appropriated.

The working of the Act during the past five years has shown that some of its provisions are obscure, and others are defective with reference to one or other of the two intentions stated above. The present main Bill aims at removing these obscurities defects.

Further us the law stands at present, the question of the rent of, and repairs to, a building appropriated under the  $\Delta ct$  may be referred on appeal first to a Committee of Arbitration and then to the Civil Court. .The Committee of Arbitration is composed of a Chairman (who must be a person neither in the service of Government or the Cantonment Anthority, nor having any interest in house property liable to appropriation under the Act), two persons nominated by the Officer Commanding the Station, and two head residents nominated by the owner. Difficulties have been experienced in abtaining a Chairman and non-official members with the requisite qualifications to undertake these thankless and, in many cases, Inborious honorary duties, and when a Committee has been appointed, it is frequently unable to reach a decision within a short time. order to obviate the inconveniences and delays of the present system, it is proposed to abolish the Arbitration Committees and provide for the reference of the above-mentioned matters

to the Civil Courts direct.

The opportunity has been taken at the same time to introduce certain other improvements of minor importance. Notes on the clauses are attached.

The 20th August, 1929.

#### NOTES ON CLAUSES.

Clause 2 (a). Owing to the proposed abolition of Arbitration Committees, the words "Cantonment Anthority" will disappear from the Act and a definition is no longer required.

Clause 2 (b). The proposed addition to the definition of "Officer Commanding the Station" brings it into line with the definition in section 2 (i.r) of the Cantonments Art, 1924. Thus the Officer Commanding the District van in no case be called upon to perform the duties of the Officer Commanding the Station and remains in all cases the administrative appellate authority under the Act.

Clause 2 (c).—The revisional jurisdiction under section 2 (2) of the Art is not magisterial in character. It is exercised by the officer in his administrative capacity and it is therefore preferable to call him "the Collector."

Clause 3.- The amendment of section 6 is designed to afford a clearer definition of the circumstances in which the liability under section 5 may be enforced than the somewhat obscure instructions at present contained in section 8. Two main sets of vircumstances are contemplated. The liability may be enforced in the first place as a result of an application from an individual officer, but only if he can satisfy the Officer Commanding Station that he cannot be provided with Guvernment quarters and that after making all reasonable efforts he has been unable to make satisfactory private arrangements. In the second place, a shortage of accommodation in the Cantonment as a whole may render it necessary for the Officer Commanding to take more comprehensive action on his own initiative instead of awaiting applications from individual officers, and new section 6 (1) (b) describes the circumstances in which he may do so. The "inspection" notice for which the section provides is intended to enable the Officer Communiting the Station to judge whether the building is a "house" as defined by the Act—namely, suitable for occupation by a military officer or mess.

Clause 4.—Section 7.(3) (a) of the Act, as it stands at present, makes it incumbent upon Government without any qualification to redeliver a house to an owner, ou the expiration of the lease, in a state of reasonable repair as defined in section 2 (1) (i). The ordinary rule, necording to the provisions of the Transfer of Property Act, 1882, is that a lessee shall hand back the property in as good condition as it was at the time when he was put in possession, subject only to the changes caused by reasonable wear and tear or irresistible force; and that a lease should, at the option of the lessee, be void if any material part of the property is wholly destroyed, or rendered unfit for the purposes for which it was let, as a result of fire, tempest, flood or violence, provided that the injury was not occasioned by the wrongful act or default of the lessee. The Government have no intention of departing from the principle of section 7 (3) (a), which is already more than usually favourable to the lessor, but they see no reason why they should be excluded from the latter benefit mentioned above, and the Bill accordingly provides for the protection of Government in this respect to the same extent as in the case of an ordinary lessee.

Clause 5.—The omission of section 8 of the Act and of the words "with the previous sauction of the Officer Commanding the District" in the previous section [clause 4 (a)] is due to the fact that the Officer Commanding the District is himself, under section 30, the appellate nuthority against a decision to appropriate a house. The grounds which would justify such a decision are fully explained for the guidance of the Officer Commanding the Station in section 6 as amended, and it is illogical that the previous sauction of the Officer Commanding the District should be required to a decision on the correction of which he may himself be called upon to adjudicate in appeal.

Clause 6.—The amendments to section 10 are designed, firstly, to protect the existing bona fide owner-occupier from disturbance, but to make it difficult or impossible for owners of houses in future to defeat the first object of the Act (i.e., to seemre accommodation for military officers) by going into "bogns occupation" on the eve of contemplated appropriation proceedings; and secondly, to make it clear that Government do not intend to appropriate houses built on private property which were not originally intended to provide accommodation for military officers.

Clauses 7, 8 and 9.—The reference to a Committee of Arbitration on the questions of the purchase value of a house, its rental value, or the amount of repairs required is done away with and the new clauses provide for a direct reference to the civil courts in these matters. The time allowed for the reference on the question of rent and repairs is extended to 30

days and the new sub-section (3) of section 16 gives the owner an opportunity to set forth his case on the question of repairs before the civil court.

Clause 10.—The new section makes it clear that the owner's failure to execute the repairs in time or his reference to the civil court need not cause any delay in the appropriation proceedings and thus prevent the Government from making use of the house for which they are paying rent. The Government is empowered to execute the repairs in spite of the reference, and the interests of the owner are safeguarded by the express provision that his liability is limited to the amount finally fixed by the courts.

Clause 11.—The chapter dealing with the procedure of Committees of Arbitration becomes superfluous and is replaced by a chapter explaining the procedure to be followed in hearing references to the civil courts made under sections 13, 15 and 16. The new sections are self-explanatory.

Clause 12.—The amended section provides for an appeal to the High Court, in place of

the appeal to the civil court which previously lay from the decision of the Arbitration Committee.

Clause 13.—The amendment is consequential on the alteration of the definition of the Officer Commanding the Station [see clause 2 (b)].

Clause 14.—The first part of the amendment is consequential. The second part requires the Officer Commanding the District to record his reasons when deciding an appeal, which was not previously necessary.

which was not previously necessary.

Clause 15.—The amendment is consequen-

Clause 16.—The amendment extends to all references and appeals under the Act the provision in existing section 30 (2), to the effect that the period allowed for making an appeal should be computed in accordance with the provisions of the Indian Limitation Act,

Clause 17 .-- The amendment is consequential.

Secretary of the Legislative Assembly.

## INDIAN CIVIL SERVICE.

#### Open Competition of 1930.

An Open Competitive Examination for infinission to the Indian Civil Service will be held in London in 1930. The viva vore test will take place in July, the written examination in Section B subjects will begin on the 25th July, and that in Section A subjects on the 1st August.

The number of persons to be selected at this examination will be announced hereafter.

No person will be admitted to compete from whom the Secretary, Civil Service Compassion, has not received, on or before the 8th May, 1930, an application on the prescribed form, a copy of which is sent herewith. No allegation that an Application Form or a letter respecting such Form has been lost or delayed in the post will be considered by the Commissioners unless the person making such allegation produces a Post Office Certificate of Posting. Candidates who delay their applications until the last days will do so at their own risk.

Acknowledgments of such Application Forms are sent, and any condidate who has filled up and returned the printed Application Form but has not received an acknowledgment of it within four complete days should at once write to the Secretary, Civil Service Commission, Burlington Gardens, London, W. 1. Fadure to comply with this provision will deprive the candidate of any claim to consideration.

Candidates will be notified in June of the date and place fixed for their riva roce test and of the manner in which the fee (ES) is to be paid. The Time Table of the written part of the examination will probably be posted early in July to the address given on the Form of Application, and will contain instructions as to the time and place at which candidates are to attend.

Section C.—Subject to the instructions at the head of Section B of this rule an Extra Numerum subject may be offered carrying 100 marks and chosen from the follow-:ng:-

Sanskrit Civilization

General Anthropology. Special Anthropology. An auxiliary language.

10. The auxiliary language in Section  $\Lambda$ or Section C will be tested by means of translation from the language. The following languages may be offered: French, German, Italian, Spanish, Portuguese, Dutch, Norwegian, Swedish, Danish, Russian, Latin, Ancient Greek.

No Candidate may offer any language or General Authropology or Special Anthropology twice in the examination.

No Candidate may offer in Sections A and C together two languages of the group Italian, Spanish, Portuguese or two of the group Norwegian, Swedish, Danish.

Only a Candidate who takes two modern languages in Section B may offer Latin or Ancient Greek as an auxiliary language.

Instead of an auxiliary language a Caudidate whose mother tongue is nn Indian language may offer as Subject 5 either General Anthropology or Special Anthropology.

11. In subjects 50 to 67 the civilization subject associated with a language can only be taken by Candidates who offer the lan-guage itself for examination.

12. A Candidate desiring to offer subject 24 or any of the subjects 31 to 43 must produce evidence satisfactory to the Commissioners of laboratory training in an insti-tution of university rank. For Astronomy (29), Geography (44), the Physical Authro-pology branch of Special Authropology (46),

\*e.3., a Candidate desiring to offer subject No. 51 (Roman Civilization), must also offer subject No. 50 (Latin Language).

and Agriculture (47), other equivalent training will be required. There will be no

laboratory test as part of the examination.

13. From the marks assigned to Candidates in each subject such deduction will be made as the Civil Service Commissioners may deem necessary in order to secure that no credit be allowed for merely superficial knowledge.

14. Moreover, if a Candidate's handwriting is not easily legible a further deduction will, on that account, be made from the total

marks otherwise accruing to him. †

1c. A list of the competitors shall be made out in order of their proficiency as disclosed by the aggregate marks finally awarded to each competitor, and in that order so many conventions. competitors, up to the determined number of appointments, as are found by the Civil Service Commissioners to be qualified by examination, shull be designated to be Selected Candidates for the Indian Civil Service, provided that they appear to be duly qualified in other respects.

Should any Candidate become disqualified, the Secretary of State for India will determine whether the vacancy time created shall be filled or not. In the former case the Candidate next in order of merit, and in other respects duly qualified, shall be deemed to be

a Selected Candidate.

16. Application for permission to attend an examination must be made in the handwriting of the Candidate, at such time and in such manner as may be fixed by the Civil Service Commissioners.

#### INDIAN CIVIL SERVICE GROUP OF COMPETITIONS.

#### Syllabus

such competitions as may be held in London in the year 1930 for appointment to the following services:-

Indian Civil Service.

Junior Grade of the Administrative Class in the Home Civil Service.

Colonial Service: Eastern Cadetships. Foreign Office and Diplomatic Service.

Consular Services (General, Levant, Far East) and Intelligence Officer Grade in the Department of Overseas Trade.

Evidence of Training.—Candidates who desire to offer any of the subjects 24, 29, 31-44, 46 (Physical Anthropology branch only), or 47 must send to the Secretary of the Civil Service Commission, so as to arrive not later than 8th May 1930, the evidence of training described on pages 1847 to 1850. Such evidence should be in the form of a certificate signed by a responsible officer of the institution. In the case of an institution not situated in the British Isles, the certificate must state that the institution in which the work has been done is authorized to prepare candidates in that subject for a degree.

tit is notified for general information that the number of marks deducted for bad handwriting may be considerable.

#### Section A.

- 1. Essay.—An essay to be written on one of several specified subjects.
- 2. English.—A paper of questions to test the understanding of English and the workmanlike use of words. An optional exercise in the writing of verse will be included.
- 3. Present Day.—Questions on contemporary subjects, social, economic and political. A liberal choice of questions will be given. Effective and skilful exposition will be expected.
- 4. Everyday Science.—In this subject such knowledge will be expected as candidates will have who have studied science intelligently at school and have since then kept their eyes open. A liberal choice of questions will be given. Attention should be paid to orderly, affective, and exact expression.
- 5. Auxiliary Language.—Pussages dealing with history and politics may be set, but no technical matter. Verse is not excluded. Accuracy and skill in the use of English will be expected.
- 6. Viva Voce.—The examination will be in mutters of general interest, not in matters of academic interest; it is intended to test the candidate's alertness, intelligence, and intellectual outlook. The candidate will be afforded an opportunity of furnishing the record of his life and education. On the interview and record the Commissioners judge the value of the candidate's personality for each service for which he is entered. His value may differ for different services, and in that case the mark by which the Commissioners express their decision will differ for different services.

#### Section B.

**History.** Subjects 7-10. A history subject will deal with the life of the people as a whole, political, social, literary, artistic, scientific, economic.

Candidates should know something of the original authorities, and have such a knowledge of geography as is necessary to the proper understanding of the history.

When a fixed date is given for the end of a person, candidates will be expected to have some knowledge of the subsequent development of movements which continued beyond the period; similarly when a fixed date is given for the beginning of a period, they will be expected to know in general outline how the initial position was reached.

7. 8. English History.—Period 1, to 1660; Period 2, 1660 to the present day. Candidates will be expected to know so much of European history as will make the external action of this country fully intelligible and will explain those movements at home which had their beginnings abroad, e.g., the Renaissance, the Reformation, and the reactions in this country of the French Revolution. In subject 8 the outstanding incidents and movements in the history of British possessions will be included.

- 9, 10. European History.—Period 1 from 400 to 1494; Period 2 from 1494 to 1763; Period 3 from 1763 to the present day. The history of the United States of America, of India, and of the Far East, will be included in so fur as it influences European fortunes to an important degree.
- 11. General Economics.—The subject will be trented as a whole, and candidates should be prepared to illustrate the theory by the facts and to analyse the facts by the help of the theory. The history of economic thought will be included.
- 12. Economic History.—Candidates will be expected to have a general acquaintance with the early economic history of England; but special attention will be paid to the economic development of the British Isles and other portions of the Empire during the last two or three centuries, and so much knowledge of European and American conditions will be expected as is necessary for the understanding of British economic history.
- 13. Public Economics.—The questions will deal with the main forms of state action, central and local, in the economic sphere, together with public finance.
- 14. Political Theory.—Cundidates will be expected to show a knowledge of political theory and its history, political theory being understood to mean not only the theory of legislation, but also the general history of the State and its connection with kindred studies such as Ethics, Psychology, Jurisprudence, Public International Law, and Economics. Candidates will be expected to show a knowledge of original authorities.
- 15. Political Organization.—This will include Constitution Forms (Representative Government, Federalism, etc.) und Public Administration, central and local. The listory of institutions is not included, but candidates will be expected to know the earlier stages from which existing institutions have directly developed.
- 16. Constitutional Law.—The Constitutional Law of the United Kingdom and of the British Empire, and the Law of English Local Government.
- 17. Private Law.—The following brunches of English Private Law:—the Law of Real and Personal Property (including the Law of Succession), Contracts, and Torts.
- 18. Roman Law.—Roman Private Law and its history studied in connection with the Institutes of Gaius and Justinian, including the history of the legislative and judicial processes. Passages will be set for translation and comment, but credit will not be given merely for capacity to translate the texts.
- 19. International Law.--Public International Law.
- 20. Moral Philosophy.—The history of the subject will be included. Candidates will have an opportunity of showing their strength either in Ancient Philosophy or in Modern Philosophy.

- 21. Metaphysics.—As for Moral Philosophy.
- 22. Logic.—The subject will be interpreted in a wide sense. Epistemology in its bearing on logical problems will be included, together with Formal Logic and Scientific Method. Questions may be set on Mathematical Logic, i.e., on the Logic of Mathematics, Symbolic Logic, and the Logic of Probability; and also on the history of Logic. A considerable choice of questions will be allowed.
- 23. Psychology.—Questions on the history of the subject may be included.
- 24. Experimental Psychology.—A candidate who desires to offer this subject must produce evidence satisfactory to the Civil Service Commissioners of Inboratory training in an institution of university rank.

Mathematics. Subjects 25-28.—The use of the slide-rule and of mathematical tables will be allowed.

25. Lower Pure Mathematics.—Geometry of two and of three dimensions according to Euclid (synthetic geometry), to Descartes (analytical geometry), and to Monge (descriptive geometry, dealing with three-dimensional figures by the use of plan and elevation). The noethod of vectors including scalar and vector products, with applications. Only the main properties of conics and quadrics, including those of poles, polars and polar planes, are expected.

Algebra: complex numbers; uniformly converging infinite series; the elements of the theory of equations, including the unmerical solution of algebraic equations, but not including the formal solution of the cubic and quartic.

Infinitestimal calculus of vent variables to partial differentiation and multiple integrals, with applications to geometry. Candidates should be able to deal with the types of differential equations occurring in elementary mechanics.

The proof of Tuylor's series will not be required.

No great skill will be expected in solving complicated problems of an elementary nature. The questions will involve the use of mathematical instruments.

26. Higher Pure Mathematics. -Lower Pure Mathematics together with: --

The geometry of curves and surfaces. Tensor calculus.

Elementary unalysis, including simple functions of a complex variable and contour integration

Differential equations in one independent variable. Elementary treatment of partial differential equations, with special reference to the differential equations of mathematical physics. Existence theorems are excluded.

Mathematical theory of probability, including theory of errors, method of least squares, curve fitting, and correlation.

Calculus of finite differences, including numerical integration and summation, and linear difference equations.

- A considerable choice of questions will be allowed, so that full marks may be obtained by covering about half the range stated.
- 27. Lower Applied Mathematics. Statics, hydroslatics, dynamics, elementary theory of electricity and magnetism, including the induction of currents. Questions will be of an elementary character, but will not be confined to two dimensions; they will involve the use of the calculus. Candidates are free to use differential equations, but a knowledge thereof will not be necessary to answer the questions. Attention will be paid to problems which arise naturally and to general principles; artificial problems will be avoided. The questions will involve the use of mathematical instruments.
- 28. Higher Applied Mathematics.—Lower Applied Mathematics logether with:—

Statics to a more advanced stage, including graphical treatment.

Dynamics to the equations of Euler and Lagrange and including the theory of the vibration of strings and other simple systems.

Hydrodynamics, including the elementary theory of the motion of solids through a liquid, surface waves, and vibrations in gases.

Elasticity, including the elements of the vibrations of rods, plates and bars.

Electricity and magnetism.

Thermodynamics, kinetics theory of gases, radiation.

A considerable choice of questions will be allowed, so that full marks may be obtained by covering about half the range stated.

29. Astronomy.—Geometrical optics will be included.

A candidate who desires to offer this subject must produce evidence satisfactory to the Civil Service Commissioners of at least 20 hours' practical training in an observatory.

30. Statistics.—Some knowledge of the nature of the data available for the statistical discussion of prices, wages, incomes, trade transport, production, consumption, population, births, deaths, migration.

Frequency distributions, averages, percentiles, simple methods of measuring dispersion; graphic methods, elementary treatment of qualitative data; miscellaneous methods used in handling statistics of experiments and observations; interpolation.

Elements of modern mathematical theory of statistics:—frequency curves and the mathematical representation of groups generally; accuracy of sampling as affecting averages, percentages, standard deviation; significance of observed differences between averages of groups, etc.; the theory of correlation for two variables.

Natural Science. Subjects 31-42. The standard of the higher division of a science will be that which is required in the main subject for an honours degree at the universities. The standard for the lower division of a science will be that required in a subject subsidiary to the main subject whether required at the final degree examination or at a preceding examination.

A candidate who desires to after a science must produce evidence satisfactory to the Civil Service Commissioners of laboratory fraining in that science in an institution of university rank; the period of training required is one academic year, whether the candidate offers the higher division of the science or the lower division or both divisions.

- 35. Lower Botany... Vegetable Physiology will be included in each division.
- 36. Higher Botany.—Vegetable Physicalogy will be included in each division.
- 37. Lower Geology. Mineralogy will be included in each division.
- 38. Higher Grology.—Mineralogy will be included in each division.
- 43. Engineering. Strongth of materials; theory of structures; mechanism and dynamics of machines; heat and thermodynamics; surveying; hydraulics, including hydraulic machines; electricity and magnetism.

The subject will be treated in a general manner and the questions will be confined to the more elementary parts of the subject. The candidate will be expected to be familiar with graphical methods and to have some skill in mechanical drowing.

A candidate who desires to offer Enginerring must produce evidence satisfactory to the Civil Service Commissioners of training for at least one academic year in an institution of university rank.

44. Geography.—Geography as understood in the universities, not excluding topics which concern geography jointly with other subjects such as seconomics, history, physics, botany and geology. There will be a practical test which will necessitate a knowledge of cartographical methods and notations, and for this test drawing instruments may be required.

A candidate who desires to offer this subject must produce evidence satisfactory to the Civil Service Commissioners of training for at least one academic year in an institution of university rank.

45. General Anthropology.—Primitive culture in its various aspects, including:—conomic pursuits (food collecting, hunting, fishing, domestication of animals, agriculture); the general scheme of primitive social organization; early religion and magic, mythology, beliefs, rituals and ceremonial; decorative art, music, dancing. Candidates

will be expected to show some knowledge of the customs, institutions and beliefs of living races of rule culture rather than knowledge of prehistory, archæology, or evolutional or historical conjectures.

46. Special Anthropology.—Cambidates will choose between Social Anthropology and Physical Anthropology.

Social Anthropology.—A fuller knowledge of primitive social organization will be here expected: the tribe, the village community, kinship grouping and the family. Study of the manner in which law works among primitive people and of their forms of administering justice. The economic organization of the primary pursuits and industries; the types of distribution, exchange and trade. Exchange and the beginnings of currency. Adjustments of European economic systems, laws and morality to races on an earlier level or of a different type of culture. Early forms of magical and religious belief and ritual. The relation between faith and knowledge in primitive societies.

Physical Anthropology, with which are included prehistoric archaeology and technology. Cambidates will be expected to have such knowledge as may be acquired by laboratory and museum work, consisting mainly in the handling and study of specimens and exhibits. The subject will be treated with special, but not exclusive, reference to peoples of rule culture, including prehistoric vivilizations.

A candidate who desires to offer Physical Anthropology must produce evidence satisfactory to the Civil Service Commissioners of training in an institution of university rank.

47. Agriculture.—Agricultural chemistry, agricultural botany and agricultural zoology will be included.

A candidate who desires to offer this subject must produce evidence satisfactory to the Civil Service Commissioners of training in an approved institution.

48, 49. English Literature.—Period 1, from 1350 to 1700; Period 2, from 1660 to 1914.

Candidates should be prepared to show a first-hand knowledge of some of the works of the following authors and of their place in the history of their country:---

#### Perion 1.

Chaucer Boson
Malory Milton
Spenser Bunyan

Shakespeare

#### Period 2.

Dryden Scott Congreva June Austen Defae Wordsworth Swift Coleridge  ${f A}$ ddison Shelley Pope Keats Fielding Dickens Carlyle dohnson Burke Tennysou tioldsmith Browning Burns

Questions on other writers will not be excluded, but, on the whole, the questions will be directed to the hest-known authors and their best-known works. Candidates should know so much of the history as is necessary to understand the literature in its relation to other activities of the nation.

Questions will not be set on the history of the language before Chaucer, nor, in general, on its morphological or phonological changes since his time; the history of workmanship, style, and prosody will not be excluded.

Civilizations and Languages. Subjects 5t0-67. In these the civilization subject associated with a language can be taken only by candidates who also offer themselves for examination in the language itself.

A civilization subject will include litecature and history. It will deal with the life of the people as a whole, literary, political, social, economic, scientific, artistic.

In literature candidates will be expected to have a first-hand knowledge of the authors.

In history candidates will be expected to show a knowledge of the original authorities. They must also have such a knowledge of geography as is necessary to the proper understanding of the history.

- 50. Latin Language.— Translation, and prose or verse composition. The composition paper will be so acranged that candidates may confine themselves to prose composition or to verse composition or, if they prefer, may take some prose and some verse.
- 51. Roman Civilization.—In history the outlines of the history and development down to 180 A.D. should be known; but the unit stress will be laid on the period 133 a.c. to 117 A.D.
  - 52. Greek Language.—As for Latin.
- · 53. Greek Cirilization.—In history the main stress will be on the period 510 s.c. to 323 s.c.
- 54. French Language.- Translation, free composition, set composition, and conversation.
- 55. French Civilization.—The outlines of the history prior to 1589 should be known; the period from 1589 to 1660 in somewhat more detail; but the main stress will be on the period from 1660 to the present day.

- 56. German Language.—As for French,
- 57. German Civilization.—In history cundidates should know in outline the history of the Medieval Empire, of the growth of the German cities, of the Reformation in Germany, and of the Thirty Years War; but the main stress will be on the period from the accession of Frederick the Great to the present day.
- 58. Spanish, Italian, Language.-- As for French.
- 59. Spanish Civilization. In history the main stress will be on the periods from the Union of Castile and Aragon under Ferdinand and Isahella to the liberation of the Netherlands, and again from 1800 to the present day.

Italian Civilization.—In history the main stress will be on the 15th century and the first half of the 16th century, and again on the period from 1789 to the present day. Sufficient should be known of the earlier period to understand the position of the Pope and the Emperoc in Italy, the rise of the towns, and the position of Dante.

- 60. Russian Language. As for French.
- til. Russian Civilization. Only the broadest outlines of the history prior to Peter the Great will be required; the period from the accession of Peter the Great to 1800 should be known in somewhat more detail; but the main stress will be on the period from 1800 to the present day.
- 62. Arabic Language.—Translation, free composition, set composition, conversation. The examination will be in the modern language.
- 63. Arabic Civilization.— The main stress in both history and literature will be on the period from the middle of the 6th century A.D. to the middle of the 13th century A.D.
- 64. Persian Language.—Translation, free composition, set composition, conversation. The examination will be in the modern language.
- 65. Persian Civilization.—The main stress in both history and literature will be on the period 1000 a.n. to 1500 a.n. Candidates will be expected to have a general knowledge of the history of Persia before 1000 a.n. and from 1500 a.n. to the present time.
- 56. Sanskrit Language.—Translation, pross composition, and questions on Vedic and Sanskrit grammar. Both Vedic and classical Sanskrit passages will be set for translation; composition will be required in classical Sanskrit alone.
- 67. Sanskrit Civilization.—Sanskrit literature and the history of the civilization and thought of India from the Vedic period to A.D. 1200.

CIVIL SERVICE COMMISSION;

August 1929.

Admin (Early edition).

#### APPLICATION FORM

for the use of candidates seeking admission to the concurrent open competitive examimations to be held in London in July and August, 1930, for appointment to services of the Administrative Group, namely:— Home Civil Service: Administrative Class.

Indian Civil Service.

Colonial Service: Eastern Cadetships.

Nore 1.—Male Candidates may include any or all of these three Services in their application (see paragraph 3 below); but it should be understood that the only competition yet announced as certain to be required in 1930 is that for the Indian Civil Service, the regulations for which are enclosed herewith.

 An annuncement as to whether competitions will be required in 1930 for the Home and Colonial Services will be made in due

course.

Note 2. —This form is to be filled up and returned to the Secretary (C. Room 19), Civil Service Commission, 6, Burlington Gardens, London, W. 1, in time for delivery on or before May 8th, 1930. Vo Application Form received after that date will be accepted.

A Candidate who fills up and returns this Application Form and does not receive an acknowledgment of it within four complete days should inform the Secretary of the Civil Service Commission.

Note 3.—Candidates should, by consulting the regulations, make certain that they are eligible to compete for the Services for which they make application, and that their selection of subjects conforms with the regulations. No scrutiny of the information which is given on this sheet is made by the Commissioners before the examination.

Note 4.—Should any of the particulars furnished by candidates be found to be false within their knowledge they will, if appointed, be liable to be dismissed; and, if otherwise entitled to Superanunation Allowane, they will forfeit all claim thereto. The wilful suppression of any material fact will be similarly penalised.

Only for candidates for Eastern cadetships:—

- 7. State whether you are of pure Furopean descent, or of pure Ceylonese descent, or of prixed European and Ceylonese descent
- 8. Name, in order, the Schools you have attended since the age of 12, giving addresses with dates of entering and leaving
- 9. Have you been on any former occasion a candidate before the Civil Service Commissioners? If so, state when, and for what appointment
- 10. Age on finally quitting School
- 11. Have you been a student at any University? If so, name it, and give the dates of entering and leaving. State any degrees, honours or prizes you have obtained. Name your College
- 12. Give the name of your Director of Studies or College Totor, or of the Professor of other responsible person to whom reference can be made as being best acquainted with your conduct and the character of your work. You should give one name only, selecting the person to whom you think reference would be most useful. If you have been at more than one university, the referee should be chosen from your later university, unless you entered it at a later date than October, 1929

- 13. Have you had any special teaching for exuncinations for these situations? If so, state where and by whom it was given, and the dates of leginning and ending. If it was part-time preparation state what fraction of your study time it occupied and whether by day or in the evening. Regular University courses are to be excluded
- 14. State day University or College colours, and any position of responsibility or distinction in University or College societies that you hold or have held
- 15. Give particulars showing dates, certificates obtained, and rouks of any service in: Junior Division Officers Training Corps, Senior Division Officers Training Corps, Territorial Army, Territorial Cadets
- 16. Have you served in the Noval, Military, or Air Forces?

It so, state your tank (or rating) and official number it any

#### Selection of Subjects.

- 1. Do you select any of the subjects for which evidence of training is required? If so, join the necessary vouchers to this torm, storing here the subjects to which each voucher applies.
- 2. If you are taking the degree examination in Modern History or in Litera Humaniores of Oxford University state which, and name your College. Endcayour will be made to avoid a clash of appointments.
- 3. Is your mother tongue an Indian language? It so, name it.
- Place a cross, so. X, on the dotted line opposite each of the subjects you take from the following list. Show your auxiliary language and your extra noncerum or their substitutes, as well as your Section B subjects. Do not omit a subject because it is compulsory for the Service for which you are a candidate. If you are a candidate for nore than one Service and you wish to offer different subjects for different Services, append a statement showing to which Service your selection apidies, and the variations you desire for other Services. If your selection of subjects for any Service is not in accordouce with the cegulations, the Con-missioners cannot undertake to avoid clashing anang your subjects in the time-talde.

A candidate who is not required under the preceding sub-sections ( offer a vernacular will offer history instead. one-year probationer will affer British history a two-year prohationer will affer British histor for the Intermediate Examination and Earc pean history for the Final Examination.

Any question as to the interpretation ar application of this regulation will be decide by the Civil Service Commissioners.

(8) The ordinary session of the Final Ext mination for the testing of riding will tal place in advance of the rest of the Fine Examination, and a special session will whe necessary be held at a later flate for the benef of any candidate who may have failed at th ordinary session.

Candidates who at the ordinary session satisfy the Commissioners that they are sufficiently at home in the saddle for the efficient performance of all duties required of members of the Indian Civil Service will be awarded marks ranging between 101 and 200 according to the degree of proficiency displayed.

Candidates who at the ordinary session fall short of this adequate proficiency but show such naintinunc proficiency as is evidence that with a moderate amount of practice they can attain full proficiency, will receive narks ranging between 1 and 100; they will be allowed to proceed to India and will on their arrival there be subjected to such further tests in riding as may be prescribed by their Local Government.

If a candidate is absent from or fails to slow minimum proficiency at the ordinary session be will be given a further opportunity of examination at a special session. If he then attains adequate proficiency he will not be subjected to further tests in India. If he attains minimum proficiency he will be allowed to proceed to India under the same condition as if he had attained minimum or proficiency at the ordinary session. No credit in marks will be given for any performance at a special session.

Probationers may also be examined in riding at suck time or times as the Commissioners may appoint during the course of the probationary period.

- (9) Such deductions as the Civil Service Commissioners may consider necessary will be made from the marks assigned to candidates at the Intermediate and Final Examinations in order to secure that no credit is allowed for merely superficial knowledge.
- (10) The Civil Service Commissioners will prepare lists of the candidates in order of merit; the order for the one-year probationers being based on the sanc of the warks obtained by the candidates at the Open Competitive and Final Examinations, the order for the two-year probationers being based on the sum of the marks obtained by the candidates at the Intermediate and Final Examinations.
- (11) The selected candidates whose performance in the compulsory subjects of the Final Examination is such as to satisfy the Civil Service Commissioners, and who have also satisfied the Commissioners of their eligibility in respect of nationality, age, health, character and conduct during the period of probation, shall be certified by the Commissioners to be entitled to be appointed to the Indian Civil Service, provided that they shall comply with the regulations in force, at the time, for that Service.

(12) If any candidate is prevented by sickness or any other adequate cause from attending the Fioal Examination, the Commissioners may, with the concurrence of the Secretary of State for India in Council, allow him to appear at the Final Examination to be held in the following year, or at a special examination. A selected candidate absent for such adequate cause from the Intermediate Examination may, under similar conditions, be allowed to appear at the Intermediate Examination a year later or at a special examination, or may be excused the Intermediate Examination and allowed to appear for the Final Examination in regular course.

Any condidate who at the Intermediate Examination shall appear to have wilfully neglected his studies, or to be physically incapacitated for pursuing the prescribed course of training, will be liable to have his name removed from the list of selected candidates.

(13) A selected candidate who wishes to pursue, in addition to the course 'prescribed above, an extra course of study, such as reading for a degree or for the examination for admission to the Bar, must first obtain the permission of the High Commissioner for India. It permission is accorded, it will be subject to review at any time.

#### ANNOUNCEMENTS

made by the Civil Service Commissioners with the authority of the Secretary of State for India in Council:—

- (i) Selected candidates will be allotted to the various provinces upon a consideration of all the circumstances, including their own wishes; but the requirements of the Public Service will rank before every other consideration.
- (ii) A selected candidate who wishes to pursue an extracourse of study, in addition to the prescribed probationary course, most submit an application, stating precisely the extra course of study which it is desired to pursue, to the Secretary to the High Commissioner for India, Education Department, 42 Grosvenor Gardens, London, S. W. I. through the appropriate authority at the University or College at which he is pursuing his probationary course. The appropriate authorities are:—
  - Oxford—The Indian Civil Service Delegacy.
  - Cambridge--The Board of Indian Civil Service Studies.
  - London-The Director of the School of Oriental Studies.
  - Trinity College, Dublin—The Registrar of the Indian and Home Civil Service School.
- (iii) An allowance of £300 a year, or; in the case of Selected Candidates possessing an Indian domicile, an allowance of £350 a year will be given to any candidate who passes his probation at one of the Universities or other Institutions that have been approved for the purpose by the Secretary of State for India in Conneil.

<sup>\*</sup> Such candidates will receive no increase to their initial pay until they have passed the further tests in question to the satisfaction of their Local Government.

<sup>†</sup>The compulsory subjects include riding, and a candidate who fails at the end of the period of probation to satisfy the Civil Service Commissioners that he has reached the minimum standard of proficiency in riding will he liable to have his name removed from the list of selected candidates.

In the case of Selected Condidates on probation for one year, the allowance will be payable in five equal instalments, the first after the agreement prescribed in Announcement (iv) has been executed, the second, third and fourth on December 24th, March 25th and June 25th, respectively, and the fifth after signature of Covenant on appointment to the Service.

In the case of Selected Caudidates on probation for two years, the allowance will be payable in nine approximately equal instablients, the first on September 29th or as soon thereafter as the agreement has been executed, the second on December 24th, the third to the eighth at quarterly intervals from that date, and the ninth after signature of Covenant on appointment to the Service.

Each selected candidate should intimate to the Secretary to the High Commissioner for India, Education Department, the address to which it is desired that the first instalment

sbould be sent.

The payment of the various instalments of the allowance except the first instalment and the final instalment, and, in the case of the two-year probationers, the instalment payable at the end of the first year of probation, will be conditional on the receipt by the High Commissioner for India, through the authorities of the approved institution, of a certificate that the candidate had fulfilled up to date the requirements of the authorities and shown satisfactory progress.

If an Indian trovernment Schelar becomes

If an Indian theoremment Schular becomes a selected candidate for the Indian Civil Service, his scholarship stipend shall cease to be paid with effect from the 1st October of the year in which he becomes a selected candi-

date.

The whole probation must ordinarily be passed at the same Institution. Migration will not be permitted except for special reasons approved by the Secretary of State.

- N. B.- The Secretary of State for India gives notice that the amount of the allowances will be reconsidered in 1930, with a view to a possible reduction with effect from the first distable to candidates selected in that year.
- (iv) Fach Candidate will be required before receiving the first instalment of his allowance to execute an agreement binding himself and one surety jointly and severally to refund all moneys he may have received from the Secretary of State for India in the event of:—
  - (1) his failure to pass the Final Examination within the time prescribed by the Regulations, and to satisfy the Civil Service Commissioners of his fitness for admission to the Indian Civil Service, or
  - (2) his subsequent failure to execute the usual covenant, and to proceed to India, as and when he shall be directed by the Secretary of State for India.

- (v) All candidates obtaining Certificates will be also required to enter into covenants, by which, amongst other things, they will bind themselves to make such payments as under the rules and regulations for the time being in force they may be required to make for the pensions of their families. The stamps payable on these covenants amount to £1.
- (vi) A First Class passage to India will be engaged for Selected Candidates with a view to their proceeding to India after they have signed their covenants.

Selected candidates who desire to make their own arrangements for proceeding to India nust first satisfy the High Commissioner for India that they have good reasons for wishing to do so and that the arrangements which they propose to make are suitable. They will then, on production to the High Commissioner for India of evidence that they have engaged a passage, be granted an allowance not exceeding £65\* or the actual cost of the passage by the route selected, whichever is less.

- (vii) Candidates appointed to the Indian Civil Service after undergoing one year's probation will be senior to those appointed in the same year after undergoing two years' probation. The seniority of candidates of each class inter se will be determined by the order in which their names appear on the lists referred to in clause (10) of the regulations.
- (viii) A candidate who fails to satisfy the Civil Service Commissioners at the Final Examination held in any year will be definitely rejected unless the Secretary of State in Conncil shall, after reference to the Civil Service Commissioners, allow him to sit for re-examination in the subject or subjects in which he failed. In general, a candidate who is allowed re-examination will be required to forfeit the whole or part of the final instalment of his allowance, but if it appears to the Secretary of State in Council, after reference to the Civil Service Commissioners, that his failure to pass the examination was due to circumstances wholly exceptional and beyond his control, such forfeit of his allowance will not be required.
- (ix) "Overseas pay" will not be admissible to Indian members of the Indian Civil Service selected at Open Competitive Examinations beld in London in 1925 and subsequent years.

Civil Service Commission, August, 1929.

Controller of Examinations.

(Approved by the Academic Council, dated the 25th September, 1929.)

# University of Dacca.

Notification No. Ex. 1314/2D.

Ramna, Dacca, the 20th September 1929.

The next B.A., B.Sc. (Pass, Honours & Subsidiary) and B. Com. Examinations of this University will be field in the months of February and March 1930, on the dates already

notified in the time-table.

2. Applications for admission to the examination must be made on the printed entry forms which will be obtainable at the office of the Provost of the Hull to which the students belong. The entry form, after it has been duly filled in, and signed by the candidate and duly certified by the Provost and the head of the department concerned as the case may be, must be presented by the candidate to the Provost not later than Wednesday, the 13th November, 1929.

3. Candidates for B.A. B.Sc. and B. Com. Examinations must submit their Intermediate Certificates to the Provosts for verification of the correctness of their names in the entry forms. Candidates must take back their Intermediate Certificates attached to their Examination Entry form from the Provost of the Hall within a fortnight after the exami nation is over, failing which the Provost will not be responsible for their safe keeping.

- 4. The entry forms will be checked by the Provosts in respect of all the entries made by the candidates in the entry forms (e.g., date of first admission to the University, date passing the University Test in English, groups of subjects of Pass candidates, Subsidiary subjects with full details of each paper, etc.). In the case of candidates who have been granted special permission to appear at the examination, the authority granting them such special permission must be quoted in the entry forms of the candidates and duly attested by the Provost. The date of first admission of candidates into the University as entered in the Examination Entry forms by the candidates must be checked by the Provosts with reference to the application for admission of the candidates concerned. Entry form which is not complete in respect of all entries made therein, will not be accepted by the Provost. The checking of the entry forms by the Provost will be regarded as final. Entry forms, after they have been checked by the Provost, will be forwarded by him to the Accounts Office of the University not later than Tuesday, the 19th November 1929.
  - 5. The candidates (other than candidates for the examinations in subsidiary subjects of Honours schools) must deposit their proper examination fee and all other outstanding dues up to the month of June, 1930, to the Accounts Office of the University on the dates noted in paragraph 9 below for certification that all dues including the sent-rent, tuition fee, etc., have been paid in full.
  - 6. Candidates, who are required to pay half the usual examination fees, under section 33

of Chapter XXIII of the Ordinances and Regulations, must attach to the entry form a certificate obtained from the Examination Section of the University to the rflect that they submitted their examination fees, but could not appear at the examination.

7. Candidates for subsidiary examinations will be required to pay their tuition fees, etc., up to the month of February, 1930, and arrear dues, if any, and examination fee only.

# STATEMENT OF OBJECTS AND REASONS.

The intention of this Bill is to provide an indemnity clause protecting Government and Government officers against claims by persons in respect of landlords' transfer fees which may have been paid by the Collector to others. It is also intended to provide that the right of a raiyat at fixed rates to hold at the fixed rent or rate of rent shall not be a protected interest unless he has held at such rent or rate of rent from the time of the Permanent Settlement.

- 2. The amendments of sections 12 and 260 are intended to prevent the accumulation of large sums on account of transfer fees with registering officers pending completion of registration.
- 3. Section 174A has been amended so as to provide for confirmation of sale within 30 days from the date of sale but the proviso permits of applications under section 174 (3) on the ground of material irregularity or fraud.
- 4. Certain other changes to rectify drafting defects and omissions have also been made in a few sections.

Where an agent, having in the customary course of his business authority to sell goods or to consign goods for the purpose of sale or to huy goods, or to raise money on the security of goods, is, with the consent of the owner, in the possession of goods, or of any bill of lading, dock-warrant, which where the extificate, wharfinger's certificate, railway receipt, warrant or order for the delivery of goods or any other document used in the ordinary course of business as proof of the possession of control of goods, or authorising or purporting to authorise, either by endorsement or delivery, the possessor of the document to transfer or receive goods thereby represented, any pledge of the

goods made by such agent shall be as valid as if he were expressly authorised by the owner of the goods to make the same:

Provided that the pawnee acts in good faith and has not at the time of the pledge notice that the pawner has rot authority to pledge:

Provided also that such goods or documents have not been obtained by the pawnor from the lawful owner or from any person in lawful custody of them by means of an offence or fraud."

# STATEMENT, OF OBJECTS AND REASONS.

The object of this Bill is to give effect to the recommendation of the Special Committee, appointed by the Government of India to examine and draft the Indian Sale of Goods Bill, that section 178 of the Indian Contract Act, 1872, should be amended so as to make it consistent with the amendment proposed by the Committee in section 108. Both the sections are cognate and are based on the same principle; and there has been considerable conflict of decisions regarding their scope. The Special Committee has proposed to remove this conflict in section 108 by restricting its provisions to sales by persons who are in possession of the subject-matter of the sale as mercantile agents only, and the present Bill amends section 178 of the Indian Contract Act, 1872, on the same lines.

#### ANDSTATEMENT OBJECTS REASONS.

The object of this Bill is to amend the Negotiable Instruments Act, 1881 (XXVI of 1881), so as to provide that negotiable instru-ments including cheques and bills of exchange, which are expressed on the face of them as drawn to bearer, shall not, in any circumstances, lose their character as better instruments on account of their having been inforsed. The necessity for the anoundment has arisen out of a ruling by the Bumbay High Court that under section 50 of the Negatiable Instruments Act, 1881, and the Explanation thereto, a bearer bill can be legally changed to an order bill by endorse-neut. This makes it incumbent upon banks and business bouses to examine all endorsements upon bearer instruments, as the character of an instrument, which is payable to hearer in the first instance, con he effectively altered by any subsequent emborsement, and thus throws considerable extra

work and responsibility on banks and com-mercial Louses without any compensatory advantage to their constituents or to the general public,

Under section 13, Explanation (ii) of the Negotiable Instruments Act, a bill indorsed in blank is payable to bearer, but under seetion 19 of the same Act the holder by writing a direction above the indorser's signature may convert the indorsement in blank into an indorsement in full. These provisions under which an order bill which bas become hearer may be re-converted into an order bill, will be retained,

further to amend the Negotiable Instruments Act, 1881, for a certain

Whereas it is expedient further to amend the Negotiable Instruments Act, 1881, for the purpose hereinafter appearing; It is hereby XXVI of enacted as follows:-

Short title.

1. This Act may be called the Negotiable Instruments (Second Amendment) Act, 1929.

Insertion of new section 85A in Act XXVI of 1881.

Drafts drawn by one brouch of a bank on another payable

to order.

2. After section 85 of the Negotiable Instruments Act, 1881, the xxvI of following section shall be inserted, namely:-1881.

"85A. Where any druft, drawn by one branch of a bank (which term includes a head office) upon pnother branch of the same bank for a sum of money payable to order on demand, purports to be endorsed by or on behalf of the payee, the bank is discharged by payment in due course."

#### AND OBJECTS OF. STATEMENT REASONS.

The object of this Bill is to amend the Negotiable Instruments Act, 1881, so as to make it clear that the Act affords protection to bankers in India against forged or unanthorised endorsements on demand drufts drawn by one branch of a bank upon another branch of the same bank. A doubt has been expressed in authoritative quarters as to whether the Indian law, as it stands at present, extends the same protection to banks

in India as the English law does to banks in England; and, consequently, legislation is considered to be expedient in order that the position may be established beyond all doubt.

further to amend the Code of Criminal Procedure, 1898, for a certain purpose.

WHEREAS it is expedient further to amend the Code of Criminal Procedure, 1898, for the purpose hereinafter appearing; It is hereby V enacted as follows:—

V of 1898.

Short title.

1. This Act may be called the Code of Criminal Procedure (Amendment) Act, 1929.

Insertion of new section 540B in Act V of 1898.

2. After section 540A of the Code of Criminal Procedure, 1898 V of (hereinnfter referred to as the said Code), the following section shall 1898, be inserted, namely:—

Special provision for inquiry or trial being held when accused's absent arises from Itis voluntary act.

- "540B. (1) At any stage of an inquiry or trial under this Code, if the Judge or Magistrate is satisfied, for reasons to be recorded, that any accused, in consequence of a single act or series of acts done or course of conduct pursued by him after his arrest, has voluntarily rendered himself incapable of remaining before the Court, such Judge or Magistrate may, whether such accused is represented by a pleader or not, dispense with his attendance and proceed with the inquiry or trial in his absence.
- (2) In any such inquiry or trial, where a plea is required in answer to a charge from an absent accused whose attendance has been dispensed with under sub-section (1), such accused shall be deemed not to plead guilty.
- (3) Notwithstanding anything contained in this Code, no finding, sentence or order passed in such inquiry or trial shall be held to be illegal by any Court by reason of any omission or irregularity whatsoever arising from the absence of any or all of the accused whose attendance has been dispensed with under sub-section (1).
- (4) No order under sub-section (1) dispensing with the attendance of an accused shall affect his right to attend or to be represented by a pleader at any subsequent stage of the proceedings."

Application.

3. Where an inquiry or trial has begun before the commencement of this Act, section 540B of the said Code as hereby enacted shall have effect:

Provided that, where the accused's incapability of remaining before the Court arises from a series of acts or course of conduct begun before the commencement of this Act, the said section shall have effect only where the series of acts or course of conduct is continued after the commencement of this Act.

# STATEMENT OF OBJECTS AND REASONS.

The Code of Criminal Procedure, 1898, contains no provision by which an inquiry or a trial can continue in the absence of an accused person if he is not represented by counsel. The High Coart of Judicature at Lahore have recently held that there is no provision of the law by which counsel may be appointed to represent an accused person without the latter's consent. It is, therefore, possible for an accused person to bring the administration of justice to a standstill by a voluntary act by which he renders himself incapable of attending Court.

2. The provisions of this Bill are intended to prevent the delay and defeat of justice by empowering Judges or Magistrates to proceed in the absence of an accused, even if he is not represented by counsel, if the Judge or Magistrate is satisfied that his incapacity to attend Court is due to a voluntary act, done or course of conduct pursued by, him after arrest.

Yoar. No.		No.	Short title.		
1926 1928			XXXVII	The Indian Succession (Amendment) Act, 1926.  The Indian Succession (Second Amendment) Act, 1928.	

# STATEMENT OF OBJECTS AND REASONS.

The Indian Succession Act, 1865 (X of 1865), contained in section 3 a definition of the expression "District Judge" which was wide enough to include and was always held to include a Judge of the High Court exercising probate jurisdiction on the Original Side. The Consolidation Act of 1925 Act (XXXIX of 1925) omitted this definition, with the result that the expression "District Judge" cannot be held to include a High Court in the exercise of its ordinary or extraordinary civil jurisdiction in view of the definition contained in the General Clauses Act, 1897. As the Indian Succession Act of 1925 now stands, numerous powers contained therein and given to District Judges have not been given to the High Court on its Original Side. This effect of the omission of the definition of "District Judge" from the Act of 1925 was apparently not foreseen and it is proposed to restore it. Clause 2 of the Bill gives effect to this proposal.

2. The remaining clauses are intended to supply another omission. Under subsection (2) of section 57 of the Act of 1925, which was inserted by Act XXXVII of 1926, all wills and codicils made by any Hindu, Buddhist, Sikh or Jaina on or after the 1st

January, 1927, in areas outside those where sub-section (I) of that section is in force, are required to be reduced to writing, signed and attested under section 63 of the Act. It is considered that the provisions of the other sections of the Indian Succession Act set out in Schedule III should be made applicable to the class of wills dealt with in section 57 (2), since the failure to apply these provisions to those wills may lead to the inference that different principles govern them, and once it is decided that this class of wills should be in writing, signed and attested, there is no reason for differentiating it from the wills falling under clauses (a) and (b) of section 57 (I).

The necessary amendments are provided in

clauses 3 and 4 of the Bill.

3. In consequence of these amendments Act XXXVII of 1926 and Act XXI of 1923 will no longer be necessary, and it is proposed to repeal them-

## Draft Rules and Schedule of Rates of Tolls.

Every vessel on entering the channel and before passing the gate at either end or even when entering the channel from a side khal between the gates shall be liable to measurement for the purpose of ascertaining the tolls payable; in case of any rensonable doubt arising, a vessel may be mensured again by any person appointed by the District Board of Bakarganj on this behalf,

2. Vessels for the purpose of the determinution of maundage shall be divided into

two classes as below:-

Class I.—To include all vessels of the types of country boats, including saltees and hapors (fish cages), house boats, kosh bonts, green boats, etc.

Class II.—To include steam boats, motor boats, flats and barges and other

square built vessels.

3. The manudage of every vessel, whether laden or empty, shall, for the purpose of Act V (B. U.) of 1864 and of these rules, be determined by the following measurements:-

#### Chass I.

A. The product of one quarter the length of the vessel from stem to stern, measured along the water line, unltiplied by the interior greatest breadth of the vessel, unltiplied by the depth from the water-line to tue interior bottom of the vessel, is to be taken as equal to the number of maunds upon

which tolls shall be levied

B. The measurement of the length is to be made in feet, rejecting inches; the measurement of breadth and depth is to be made in feet and quarters of a foot, rejecting any remainder of less than a quarter of a foot.

- C. The maundage on which the amount of toll is calculated shall be reckoned to the nearest integral multiple of 12½ maunds, any remainder of less than 121 maunds being rejected. In the case of vessels exceeding 500 maunds by measurement, the maundage shall be reckoned to the nearest integral multiple of 50 mannds, rejecting any remainder of less than 50 maunds.
- D. Saltees.—The product of one quarter of the inside length of the vessel, measured along the centre line from stem to stern, multiplied by the interior greatest breadth of the vessel, multiplied by the greatest depth measured from the top to the interior bottom

of the vessel, is to be taken as equal to the number of maunds upon which tolls shall be levied.

#### CLASS II.

For vessel of class II the number of mannds obtained by the system of measurement prescribed for vessels of class I shall be increased by one-half. For vessels of this class above 5,000 mannds measurement, the manndage shall be reckoned to the nearest integral multiple of 500 maunds, rejecting any remainder of pless than 500 maunds. In the case of steamers and motor boats the manndage determined as above shall be reduced by one-third as an allowance for engine space.

For vessels of class II which are furnished with reliable way bills, the gross manualage of cargo shown by the way bills or in the case of steamers, the manualage obtained from multiplying the registered tonnage of the steamer by 27, may, at the option of the employer of the vessel or the steamer (as the case may be), he taken as the manualage on which tolls will be charged.

4. After the measurement the person in charge of the vessel shall be provided with a slip showing the mumdage to be charged, which must be presented at the toll office where he will be provided with a ticket, after payment of toll, which will permit the vessel to pass the gate or proceed through the

channel.

5. Every ticket shall have entered on it the name of the sarang, manjee or other person in charge of the vessel, the date of entry, the manudage, the cargo, the amount of tall charged and the number of days for which the ticket remains current.

6. All tolls are payable on demand and shall be paid at the toll office before a vessel

is permitted to proceed.

7. The ticket must be kept on board the vessel and in possession of the person in charge of the vessel and must be produced for inspection when demanded by the person anthorised to collect tolls, or by any officer to whom such person is subordinate. If on demand the ticket is not produced, such person or officer shall assess the tollage. If on demand the ticket is not produced, such person or officer shall assess the tollage as provided in rules 3 and 12 and shall require payment of toll, and unless and until the toll is paid, or the original ticket or a duplicate is produced as evidence that toll has already been paid, the vessel shall be liable to seizure and detention under the provisions of section 9 of the Act.

8. Duplicates of lost tickets, of which the numbers and dates can be satisfactorily established, will be granted by the collector of tolls on payment of a fee equal to one quarter of the total tollage, subject to a

minimum fee of one anna per ticket.

9. All vessels, whether the property of Government, District Board, other local bodies or of private persons, are liable for toll except those specially exempted under these rules or by a resolution passed by the District Board of Bakarganj from time to time.

- 10. The canal may be closed once a year for effecting the necessary repairs to it on seven days' notice of the intention so to close it being given; but in the event of any sudden emergency the canal may be closed at any time without prior notice, and no claim in such case by owners of vessels or others for compensation on account of defention shall be entertained.
- 11. No rafts exceeding 50 feet in length and 5 feet in breadth shall be permitted to enter the cunuls.
  - 12. The rates of toll shall be as follows:-

(1) On all vessels empty or laden, per hundred maunds ...

Four mnnas-

(2) On all vessels empty or laden, for 12½ maunds or less ...

... One-half anna.

(3) On rafts of bamboos, grass, timber, etc., not exceeding 50 feet in length and 5 feet in hreadth ...

Two annas each raft.

Tolls will be levied at Nuli and Shapleza

13. For boats frequently using the canal such as boats carrying passengers, grass or perishable articles mouthly tickets will be

issued at 10 times the ordinary toll.

14. Every vessel which has paid toll shall be allowed to remain in the canal for three days inclusive of the days of entry into and leaving the canal. A vessel remaining in any part of the canal longer than three days shall be charged demarrage equal to one-half of the toll for each day in excess of three days. No vessel shall be permitted to remain in the canal for more than one month. Provided that this rule shall not apply to vessels holding monthly tickets under rule 13 above, which may remain in the canal for more than three days without payment of demarrage but not for more than one month at a time.

15. No vessel carrying exclusively police officers or servants, soldiers and officers of the British Army, post mail runners, officers of the Irrigation Department on duty, officers and servants of the toll office for the capal referred to in these rules while on duty, or the vessels of such other persons as may be exempted by a resolution of the District Board of Bakarganj, shall be liable for toll in the canal.

16. Any matter relating to the mode of collection of tolls and other relevant points, not provided for in these rules, shall be decided by the District Board of Bakarganj at a meeting, and shall be subject to the approval

of the local Government.

#### COVERNMENT OF INDIA.

## Legislative Assembly Department.

The following Bill was introduced in the Legislative Assembly on the 26th September, 1929: -

L. A. Bill No. 27 of 1929.

A Bill further to amend the Imperial Bank of India Act, 1920, for certain purposes.

WHEREAS it is expedient further to amend the Imperial Bank of India Act, 1920, for certain purposes hereinafter appearing; It is XLVII of hereby enacted as follows:

Short title and commencement.

đ,

- 1. (1) This Act may be called the Imperial Bank of India (Amendment) Act, 192
- (2) It shall come into force on such date as the Governor General in Council may, by notification in the Gazette of India, appoint.

After clause (b) of sub-section (2) of section 10 of the Imperial Insertion of new Bank of India Act, 1920 (hereinafter referred to as the said Act), the XLVII or clauses and subfollowing clauses and sub-section shall be inserted, namely :section in section 10, Act XLVII of 1920.

1920.

- "(c) that from the date of the promulgation of this Act as amended, the total number of European officers shall not at any period exceed the number employed at the time of amalgamation of the Presidence Banks; and
  - (d) that the London branch shall provide training for at least five Indian Graduates from recognised Universities every
- (3) All future agreements with the Imperial Bank of India shall be subject to the approval of the Legislative Assembly and shall be of temporary nature.

Amendment of section 28, Act XLVII of 1920.

3. In clause (v) of sub-section (1) of section 28 of the said Act, after the words "such number of Managing Governors not exceeding two as may be appointed by the Governor General in Council after consideration of the recommendations of the Central Board" the words " of whom one at least shall be an Indian" shall be inserted.

# STATEMENT OF OBJECTS AND REASONS.

It was expected that a Reserve-Bank for India will come into existence and will exercise the privileges now enjoyed by the Imperial Bank of India at present. It will take a few more years till India has her own Reserve Bank under the control of the Government and people of India. Eventually the Imperial Bank of India will have to take place with other Banks in India, and hence it is desired that neither the Government of India nor the Secretary of State should enter into any further agreement without consent of the Legislative Assembly. The Imperial Bank of India Act, 1920, was framed mainly in the

interests of its old constituents—the Presidency Banks, and it is desired in the interest of the tax-payers that the special privileges it has been so far enjoying should not be abused.

2. A number of minor amendments in the interest of the tax-payers and the Indian public are also made to focus the attention of the authorities of the Imperial Bank to their definite obligations to India and Indians.

Secretary of the Legislative Assembly.

No. 1926A.D.—14th October 1929.—Whereas the validity of the election of Maulvi Abdul Karim by the Burdwan Division South (Muhammadan) constituency of the Bengal Legislative Council has been brought in question by an election petition duly presented by Maulvi Golam Rahman under the provisions of Part VII of the Bengal Electoral Rules: and whereas in accordance with the provisions of rule 45 of the said Electoral Rules, the Commissioners appointed for the trial of the said petition have duly submitted their report to the Governor: Now, therefore, in pursuance of sub-rule (3) of rule 45 of the Bengal Electoral Rules and in accordance with the report of the said Commissioners, His Excellency the Governor is pleased hereby—

- (1) to declare the election of Maulvi Abdul Karim as a member of the Bengal Legislative Council for the Burdwan Division South (Muhammadan) constituency to be void;
- (2) to direct that each party shall bear his own costs; and
- (3) to publish the said report.

In the matter of the election to the Bengal Legislative Council from the Burdwan Division South Muhammadan constituency held on the 1st and the 5th of June 1929 and Colam Rahaman of Beleswar, post-office Panchpara, district Hooghly, by profession Advocate, at present residing at Chinsurah, district Hooghly, petitioner, versus Abdul Karim of 13/2, Wellesley Square in the town of Calcutta, respondent.

# REPORT.

The election of Manlvi Abdul Karim by the Burdwan Division South (Muhammadan) constituency as a member of the Bengal Legislative Council having been called in question by an election petition duly presented under the provisions of Part VII of the Bengal Electoral Rules by the unsuccessful rival candidate, Maulvi Golam Rahamm, petitioner, Ilis Excellency the Governor was pleased in pursuance of the provisions of rules 36 (2) and 38 of the said rules to appoint us Commissioners for the trial of the said petition. After the preliminary formalities prescribed by the law on the subject and the issue of notice on the respondent, Maulvi Abdul Karim, the case was taken up for trial on 3rd September 1929, when the respondent Maulvi Abdul Karim filed his written statement. On the same date the following issues were framed on the pleadings of the parties:—

(1) Were the 162 ballot papers recorded in Pandan polling station rightly rejected by the Returning Officer?

(2) Did the Presiding Officer of Pandua centre make the alleged endorsements on the said 162 ballot papers? If so, can the same affect the ballot papers or the election in any way?

(3) Are the said endorsements sufficient to identify the electors within the meaning of Regulation XIVII (e)?

(4) Is the order of the Returning Officer declaring the results of the election wrong? If so, has it materially affected the result of the election?

(5) Is the petitioner entitled to the declaration that he is legally and properly elected at the said election to the Bengal

Legislative Council?

(6) Has the respondent been duly elected at the election? If not, ought his election to be declared void and set aside? And should a fresh election be ordered on the existing nomination?

(7) Is the petitioner entitled to his costs from the respondent? If so, how much?

The petitioner, Maulvi Golam Rahaman, has examined only two witnesses, namely, (1) Mr. J. N. Roy, the Returning Officer, and (2) Choudhury Mahammad Abdulla, the election agent of Golam Rahaman at the Pandua polling centre, where the alleged illegality or irregularity on which the election is sought to be declared void, is said to have taken place. The respondent has not adduced any evidence, oral or dicumentary, and has contended himself with b ing represented by his connsel who has argued not case before us. It appears that at the Pandua polling centre the Presiding Officer was Babu Jatindra Nath Ghosh, Sub-Registrar of Pandua. This Presiding Officer adopted the most extraordinary procedure of making an endorsement on the bullot papers indicating the polling station, the name of the constituency and the elector's number in the electoral roll. The number of such ballot papers is 162 and they have been marked Ex. 1 to Ex. 1-161. There are also 162 such endorsements on the 162 ballot papers, these endorsements being Ex. 3 to Ex. 3-161. At the counting of votes held by the Returning Officer, Mr. J. N. Roy, on the 13th of June 1929, he rejected these 162 ballot papers under Regulation XLVII, clause (1), sub-clause (c) of the Bengal Electoral Regulations on the ground that these endorsements (Ex. 3 to Ex. 3-161) on the ballot papers had the effect of identifying the electors and that, therefore, the scencey of the ballot had been violated. Of these 162 rejected votes, 153 had gone in favour of the petitioner, Maulvi Golam Rahaman, and 9 had gone in favour of the respondent, Maulvi Abdul Karim. After the rejection of these votes the voting as declared by the Returning Officer was as follows:

Abdul Karim 991. Golam Rahaman 877.

Abdul Karim, the respondent, was thereupon declared to have been duly elected as having secured the largest number of votes. There is no doubt that if the 153 votes cast in favour of the petitioner, Golam Rahaman, had not been rejected by the Returning Officer he would have polled 1,030 (877+153) votes and that if the 9 votes cast in favour of the respondent, Abdul Karim, had not been rejected by the Returning Officer he would have polled 1,000 (991+9) votes, and that Golam Rahaman would in that case have been declared duly elected as having secured 30 more votes than his only rival candidate, the respondent. There are only two points for consideration which arise out of the first six issues, manely, (1) whether the rejection of these 162 ballot papers by the

Returning Officer is illegal and improper and (2) whether the rejection of the 162 ballot papers by the Returning Officer has materially affected the result of the election. Even if the rejection of the 162 ballot papers by the Returning Officer be found to be legal and proper the election is still liable to be declared void under rule 44, clause (1), sub-clause (c) if the illegality or irregularity alleged to have been committed by the Presiding Officer of the Pandua polling centre has materially affected the result of the election. The learned vakil for the petitioner contends that the endorsements (Ex. 3 to Ex. 3-161) on the ballot papers (Ex. 1 to Ex. 1-161) do not identify the electors concerned. We have seen these endorsements and we have absolutely no hesitation in finding that the endorsements on the ballot papers by the Presiding Officer relating to the elector's number on the electoral roll had the undoubted effect of identifying the electors concerned. Under Regulation XXXII of the Bengal Electoral Regulations it is the duty of the Presiding Officer to enter on the counterfoil the number of the elector as stated in the electoral roll d not on the outer-foil which is the ballot paper and which is handed over to the voter for recording his vote thereon. The counterfoils have to be sent by the Presiding Officer to the Returning Officer in a scaled cover. The sealed cover containing the counterfoils cannot be opened even by the Returning Officer and has to be sent by him to the Secretary of the Legislative Council after the counting is over. Neither can it be opened while in the custody of the Secretary of the Legislative Council by anybody except under the order of a competent Court or the Commissioners appointed to hold an enquiry in respect of an election (vide Regulation LI of the Bengal Electoral Regulations). All the aforesaid rules and regulations have been framed with a view to strict observance of the secrecy of the ballot; and in our opinion any procedure which has the effect of violating this fundamental principle underlying an election by ballot is an illegality which goes to the very root of the election if it has materially affected the result of the election. It has been argued by the learned Counsel for the respondent that even if the secrecy of the ballot has been violated by the procedure adopted by the Presiding Officer of the l'andua centre it is a mere irregularity or an accidental violation of the rule which has not materially affected the result of the election, and that therefore such irregularity or, as he puts it, accidential violation of the rule, ought to be condoned. It has also been argued by the learned Counsel for the respondent that the Presiding Officer having done all that was expected of him under Regulation XXXII of the Bengal Eelectoral Regulations the election should not be declared void simply because he had endorsed on the ballot papers the elector's number on the electoral roll and certain other details not provided for in Regulation XXXII of the Bengal Electoral Regulations. We cannot accept the learned Counsel's argument as sound or reasonable. By making the aforesaid endorsements the Presiding Officer has distinctly violated Regulation XXXII for which the Returning Officer under Regulation XLVII, clause (i), sub-clause (e) of the Bengal Electoral Regulations providing for the secrecy of the ballot, has rightly rejected them. The

secrecy of the ballot having been violated the Returning Officer, Mr. J. N. Roy, was perfectly right in rejecting the ballot papers under Regulation XLVII, clause (i), sub-clause Then the next point for determination is whether the rejection of the 162 ballot papers by the Returning Officer has materially affected the result of the election. If the rejection of the 162 hallot papers has materially affected the result of the election there is no doubt that the election is liable to be declared void under rule 44, clause (1), sub-clause (c) of the Bengal Electoral Rules. In order to elucidate the meaning of the words "materially affecting the result of the election" certain rulings have been placed before us by both sides. We shall now deal with these cases. In Woodword versus Sarsons reported in Hammond's Indian candidate and Return ing Officer, it appears that but for the irregularity committed by the Presiding Officer Sarsons would have polled 1,022 votes and Woodward 1,008. It was therefore held in that case that the election of the respondent. Sarsons must be upheld as the irregularity complained of was not such as to "satisfy the tribunal that it did affect or might have affected the majority of votes; or in other words, the result of the election. On the above finding Sarson's election was upheld. In V. S. Mahammad Ibrahim, petitioner, rersus Abbas Ali Khan Sahib and A. P. Sayid Ibrahim, respondents, reported in Hammond's Indian Election Petitions at page 182, it appears that the Presiding Officer had taken the thumb impressions of two illiterate voters who had voted for the petitioner. These thumb-impressions were made on two hallot papers which were rejected by the Returning Officer; and the Commissioners who heard the election petition after finding that they were rightly rejected by the Returning Officer observed as follows:—"But even allowing these votes in favour of the petitioner it would leave him in a minority of two. The result of the election is therefore not materially affected by such irregularities." In the case affected by such irregularities." In the case of Upadhaya Ambika Prashad, petitioner, versus Lakshmi Mohon Misra and another, respondents, reported in Hammond's Election Petitions at pages 92 and 93, it appears that the respondent Lakshmi Mohon Misra was declared duly elected by the Returning Officer as having polled 843 votes as against 721 votes polled by the petitioner Upadhaya Ambika Prashad in spite of the objection taken by the latter before the Returning Officer that a large number of ballot papers cast in favour of the respondent, namely, 361 out of 843, should be rejected as having contained certain marks violating the secrecy of the ballot. The learned Commissioners in upholding the objection of the patitioner channel as follows: tion of the petitioner observed as follows:-"If these marked ballot papers had been rejected the number of votes received by Babu Lakshi Mohon Misra (respondent) would have heen reduced from 843 to 482 and those received by Babu Ambika Prashad (petitioner) would have been reduced from 721 to 604;" and thereupon the learned Commissioners declared the election of the respondent void as in their opinion the irregularity had affected the result of the election. It has also been held in the case of Babu Das Sinha rersus Babu Rajandhari Sinha and another reported

in Jagat Narain's Indian Election Petitions, Volume III, at page 80, that the election cannot be said to have been materially affected unless the irregularities which have occurred actually turned the scale in favour of the returned candidate. It must be shown that hut for the irregularities the returned candidate would not have obtained a majority of the votes. Basing their canclusions on the above principle the Commissioners were pleased to dismiss the election petition. In 30 C. L. J. at page 270, Mr. Justice Mukherji hus collected all the case-law on the subject and has held that where the irregularity or transgres-sion complained of has affected the result of the election, that is, the success of one candidate over another, it would be the clear duty of the election tribunal to set aside the election. Although the case in 30 C. L. J. at page 270 refers to a nunicipal election Mr. Justice Mukherji has also dealt with the law relating not only to elections to Legislative Councils in India but also to Parliamentary elections, and his decision is in full accord with the other decisions already referred to by us. On a consideration of the law on the subject we hold that if the transgression complained ofwhether it amounts to an illegality or irregularity-constitutes a non-compliance with the provisions of the Act or the rules or regulations made thereunder as contemplated by rule 44, clause (1), sub-clause (c) of the Beugul Electoral Rules and if the said non-compliance has materially affected the result of the election, that is, if it has turned the scale in favour of the returned candidate or in other words, if it has materially affected the success of one candidate over another, the election of the returned candidate should be vaid. But for the noncompliance with the rules and regulations on the subject by the Presiding Officer of the Pandua centre Maulvi Golam Rahaman, the petitioner, would have been duly declared elected because he would have polled 30 more votes than the respondent, Maulvi Abdul Karim, if the 162 hallot papers, of which 153 had been cast in favour of the petitioner and 9 in favour of the respondent, had not been rejected-and very properly rejected—by the Returning Officer. The election of the respondent, Maulvi Abdul Karin, is therefore declared void. There is no allegation of any corrupt practice in this case and none has been proved.

We therefore summarise our findings on the

issues as follows:—

Issue No. 1—Our answer is in the affirmative.

Issue No. 2—We find that there were endorsements on the 162 ballot papers made either by the Presiding Officer of the Pandua centre or under his direction and that they have affected the ballot papers and the validity of the election.

Issue No. 3--Our answer is in the affirmative.

Issue No. 4—Our answer to the first part of the issue is in the negative. Our finding on the second part of the issue is that it has materially affected the result of the election.

rially affected the result of the election.

Issue No. 5—Our answer is in the negative.

Issue No. 6—Our answer to the first part of the issue is in the negative. The election of the respondent, Maulvi Abdul Karim, ought to be declared void and set aside. We also find

that a fresh election on the existing nomination cannot be ordered, as it has not been provided for in the rules and regulations.

Issue No. 7—As regards costs, having regard to the fact that the election has been, frustrated or declared void for no fault of either party and that the Presiding Officer of the Pandua polling centre alone is responsible for the invalidity of the election, we recomnend that each party will bear his own costs.

In the result we report that Maulvi Abdul. Karim, the returned candidate, has not been duly elected and that his election is void.

Each party will bear his own costs.

# NOTIFICATIONS.

# [Second publication.]

No. 41-I.—3rd t)ctober 1929.—The following draft of rules and schedule of rates of tolls, which, in exercise of the powers conferred by sections 6 and 11 of the Cunals Act, 1864 (Bengal Act V of 1864), the Governor in Council intends to make and fix for the khal known as the first side-cut along the Schillarganj Char Duani Road, joining Nali Done in the south and Shapleza khal in the north, in the Perojpur subdivision of the Bakarganj district, is hereby published for the information of persons likely to be affected

thereby.
II. The druft will be taken into consideration on or after the 28th November 1929, and any objections or suggestions received before

that date will be considered.

# Draft Rules and Schedule of Rates of Tolls.

Every vessel on entering the channel and before passing the gate at either end or even when entering the channel from a side khal between the gates shall be liable to measurement for the purpose of ascertaining the tolls payable; in case of any reasonable doubt arising, a vessel may be measured ogain by any person appointed by the District Bourd of Bakarganj on this behalf.

2. Vessels for the purpose of the mination of manudage shall be divided into

two classes as helow:-

Class 1.—To include all vessels of the types of country honts, including saltees and hapors (fish cages), house boats, kosh boats, green boats, etc.

Class II.—To include steam boats, motor boats, flats und barges and other

square built vessels.

The maundage of every vessel, whether luden or empty, shall, for the purpose of Act V (B t..) of 1864 and of these rules, be determined by the following measurements:-

#### CLASS I.

The product of one quarter the length of the vessel from stem to stern, measured along the water line, multiplied by the interior greatest breadth of the vessel, multiplied by the depth from the water-line to the interior hottom of the vessel, is to he taken as equal to the number of maunds upon which tolls shull be levied.

The measurement of the length is to he made in feet, rejecting inches; the measurement of breadth and depth is to be made in feet and quarters of a foot, rejecting any

remainder of less than a quarter of a foot. C. The maundage on which the amount of toll is calculated shall be reckoned to the nearest integral multiple of 12½ maunds, any remainder of less than 12½ mnunds being rejected. In the case of vessels exceeding 500 maunds by measurement, the manuage shall be repleased. shall be reckoned to the nearest integral multiple of 50 maunds, rejecting any remainder of less than 50 maunds.

D. Saltees.—The product of one quarter of the inside length of the vessel, measured along the centre line from stem to stern, unltiplied by the interior greatest breadth of the vessel, multiplied by the greatest depth mensured from the top to the interior bottom of the vessel, is to be taken as equal to the number of maunds upon which tolls shall be levied.

# CLASS II.

For vessel of class II the number of maunds obtained by the system of measurement prescribed for vessels of class I shall be increased by one-half. For vessels of this class above 5,000 maunds measurement, the maundage shall be reckoned to the nearest integral multiple of 500 maunds, rejecting any remainder of less than 500 maunds. In the case of steamers and motor boats the maundage determined as above shall be reduced by one-third as an allowance for engine space.

For vessels of class II which are furnished with reliable way bills, the gross maundage of cargo shown by the way bills or in the case of steamers, the maundage obtained from multiplying the registered tonnage of the steamer by 27, may, at the option of the employer of the vessel or the steamer (as the case may be), be taken as the maundage on which tolls will be clarged.

- 4. After the measurement the person in charge of the vessel shall be provided with a slip showing the muundage to be charged, which must be presented at 'the toll office where he will be provided with a ticket, after payment of toll, which will permit the vessel to pass the gate or proceed through the channel.
- 5. Every ticket shall have entered on it the name of the sarang, manice or other person in charge of the vessel, the date of entry, the maundage, the cargo, the amount of toll charged and the number of days for which the ticket remains current.

6. All tolls are payable on demand and shall be paid at the toll office before a vessel is permitted to proceed.

- 7. The ticket must be kept on board the vessel and in possession of the person in charge of the vessel and must be produced for inspection when demanded by the person authorised to collect tolls, or by any officer to whom such person is subordinate. If on demand the ticket is not produced, such person or officer shall assess the tollage. If on demand the ticket is not produced, such person or officer shall assess the tollage as provided in rules 3 and 12 and shall require payment of toll, and unless and until the toll is paid, or the original ticket or a duplicate is produced as evidence that toll has already been paid, the vessel shall be liable to seizure and detention under the provisions of section 9 of the Act.
- 8. Duplicates of lost tickets, of which the numbers and dates can be satisfactorily established, will be grunted by the collector of tolls on payment of a fee equal to one quarter of the total tollage, subject to a minimum fee of one anna per ticket.

- 9. All vessels, whether the property of Government, District Board, other local bodies or of private persons, are liable for toll-except those specially exempted under these rules or by a resolution passed by the District Board of Bakarganj from time to time.
- 10. The canal may be closed once a year for effecting the necessary repairs to it on seven days' notice of the intention so to close it being given; but in the event of any sudden emergency the canal may be closed at any time without prior notice, and no claim in such case by owners of vessels or others for compensation on account of detention shall be entertained.
- 11. No rafts exceeding 50 feet in length and 5 feet in breadth shall be permitted to enter the canals.
  - 12. The rates of toll shall be as follows: --
  - (1) On all vessels empty or laden, per hundred maunds Four almas-
  - (2) On all vessels empty or laden, for 12½ maunds or less ... One-half anna.
  - (3) (In rafts of bamboos, grass, timber, etc., not exceeding 50 feet in length and 5 feet in breadth ... Two annas each raft.

Tolls will be levied at Nahi and Shapleza-

- 13. For boats frequently using the canal such as boats carrying passengers, grass or perishable articles monthly tickets will be issued at 10 times the ordinary toll.

3. Of the total number of vacancies in a year to be filled in India by examination under a Rule I (3), two-thirds will be filled on the results of the competitive examination in the direct order of merit, provided that number of candidates is declared by the Public Service Commission as having qualified by examination. The remaining one-third vacancies will be reserved by the Clavernment of India to redress, so far as may be necessary, marked communal inequalities, and any appointments. which it may be necessary to make on these grounds, shall be made by the Governor General in Conneil, after consultation with the Public Service Commission, by direct nomination from among candidates who have attnined the qualifying standard at the ex-omination. Such vocaucies, among the onethird reserved, as may not be required for the redress of communal inequalities, or for which duly qualified candidates for direct nomination may not be forthcoming, may be filled in the direct order of merit in which the candidates passed the examination.

4. From the list, prepared by the Public Service Commission, of competitors who have in the opinion of the Commission attained the qualifying standard, candidates, to the number of vacancies to be filled under Rule 1 (3), will be selected for appointment, in the number laid down in Rule 3, provided that the thovernment of India are satisfied that they are duly qualified in other respects. Should any selected candidate become disqualified, the Government of India will determine whether the vacancy thus created shull be filled or not; in the former case, where the vacancy occurs on account of the disqualification of a candidate selected for appointment in order of merit, the candidate next in order of merit, and in other respects duly qualified, shall be deemed to be the selected candidate.

Note.—The examination will be a combined examination for the purpose of filling vacancies in the Indian Service of Engineers, the Indian Railway Service of Engineers and the Superior Telegraph and Wireless Engineering Branches of the Posts and Telegraphs Department. A candidate may apply to be admitted as a candidate for all or any of these vacancies. If

he wishes to be admitted as a candidate for more than one service or branch he should state this on his application form. In that case he need send in only one application form and undergo one examination by a medical board. He will be required to pay the fees mentioned in Rule 13 once only and will not be required to pay a separate fee for each service or branch for which he applies. If he proves successful as a candidate for more than one service or branch he will ordinarily be assigned to that service or branch for which he expressed a preference at the time of his application provided that the vacancies have not already been filled; but the Government of India reserve power to assign him to any service or branch for which he is a candidate if in their opinion the exigencies of the pub-lic service render this desirable. Candidates who are also candidates for a service or branch nat included in these regulations should refer to the regulations specially applicable to that service or branch.

The maximum number of candidates to be admitted to the combined examination may in the discretion of the Gavernor General in Council be limited to such number nat being less than 200 as the Governor General in Council may decide. If a limit is imposed the Public Service Commission shall select from among the applicants those who shall be ad-

mitted to the examination.

5. (1) A candidate shall apply to be admitted to the examination before such date and in such form as the Governor General in Council may direct. The application shall be made to the authority of the area in which his parents reside at the time of his application or have previously resided for a period of not less than 3 years or in which he has himself resided, atherwise than as a student at a University only, for a like period.

(2) The application shall be made, if based on residence in a Governor's province, to the Chief Secretary of that province, if hased on residence in Coorg, the North-West Frontier Province, Delhi, Ajmer-Merwara, or British Baluchistan, to the Chief Commissioner con-cerned and if based on residence in a State in India to the Political Officer or Agent through

the Darhar.

(3) No candidate shall make more than one

application in respect of any one examination.

6. A candidate must be a male who is either (i) a British subject of Indian domicile. who was, and whose father and mother were, born within His Majesty's dominions and allegiance, or (ii) a British subject of Indian domicile whose father was at the time of the candidate's hirth and still is (or if dead, continued until his death to be) a British subject or a subject of a State in India or (iii) a ruler or a subject of a State in India in respect of whom the Governor General in Conneil has made a declaration under Section 96-A of the Government of India Act.

7. A candidate must have attained the age of 21 and must not have attained the age of 25 on the 1st day of August next preceding the date of the examination.\*

A candidate must be in good mental and bodily health and free from any physical defect likely to interfere with the efficient

performance of his duties as a member of the Railway Services: and a candidate who is found after examination by a medical board not to satisfy these requirements will not be accepted for admission to the examination.

9. A candidate must satisfy the Public Service Commission that his character is such as to qualify him for employment in the Railway Services.

A candidate must-

(i) hold the Engineering Certificate of the Thomason Civil Engineering College, Roorkee; or

(ii) have passed the Associate Membership examination of the Institution of

Engineers (India); or (iii) have passed one of the examinations of an Indian University, mentioned in Appendix IV, which are accepted by the Institution of Engineers (India) as exempting from the Associate Member-

ship Examination; or (ir) have obtained an Engineering degree of one of the Universities mentioned in Appendix V under the conditions pres-cribed in that appendix; or

(r) have passed Sections A and B of the Associate Membership evamination of the Institution of Civil Engineers; or

(ri) have passed the Associateship examination of the City and Guilds Institute (Imperial College of Science and Technology, South Kensington) in Civil

Engineering; or (rii) have passed the Associate Membership examination of the Institution of Mechanical Engineers or of the Institution of Electrical Engineers; or

(viii) have passed the Associate examina-tion of the Bengal Engineering College in Mechanical Engineering; or

- (i.r) have obtained such other diploma or distinction in Engineering as the Governor General in Council on the advice of the Public Service Commission may decide to accept.
- No candidate shall be admitted to the examination unless he holds a certificate given by the Public Service Commission of having been accepted for admission.
- No recommendations except those inrited in the form of application will be taken into consideration. Any altempt on the part of a candidate to obtain support for his application by other means may disqualify him for selection.
- 13. Candidates must pay the following fees:--
  - (i) Rs. 5 with the application form;
  - (ii) Rs. 16 before examination by a Medical Board; and
  - (iii) If accepted for admission to the examination, Rs. 75 within three weeks after the notification of acceptance.

No claims for a refund of these fees will be entertained. +

<sup>\*</sup> Note.—These age limits apply whether or not the candidate is already in Government service.

(8) Electrical Engineering

- From the marks assigned to candidates in each subject such deduction will be made as the Public Service Commission may consider necessary in order to secure that no credit is allowed for merely superficial knowledge.
- It a candidate's handwriting is not easily legible, a deduction will be made on this account from the total marks otherwise accruing to him.
- Credit will be given for good English including orderly, effective and exact expression combined with due economy of words in all subjects of the examination and not only in subjects which are specially devoted to English.
- 19. A list of the competitors shall be made out in order of merit as disclosed by the aggregate marks finally awarded to each competitor.

#### APPENDICES.

#### APPENDIX 1.

Particulars regarding the Indian Railway Service of Engineers.

(The urrangements and salaries hereinafter described are subject to revision according to the requirements of the Service.)

- 1. (a) Condidates selected under Rules 3 and 4 will be appointed on agreement as officers in the Indian Railway Service of Engineers for a prohationary term of 3 years. During the first year of the probationary term they will undergo practical training. They will be paid Rs. 300 p.m. in the first year and, subject to satisfactory reports on their work at the end of each year, Rs. 350 p.m. in the second year and Rs. 400 p.m. in the third year.
- (h) At the canclusion of the probationary term all officers who are favourably reported on will be required to undergo a practical examination, which will include tests in levelling, surveying, practical design and setting out of work, the manufacture and use of materials: analysis of rates, drawing and estimating, and will, if successful, he confirmed in the Indian Railway Service of Engineers on pay of Rs. 475. On confirmation their agreement will be continued subject to their service heing terminable on 6 months' notice on either side.

Officers will be required to pass a riding test within two years of the commencement

of the probationary term.

3. Officers will be required to pass a language examination in Urdu by the Preliminary Standard modified to suit the requirements of the Railways, before they can be confirmed or granted any increment, beyond the first, during the period of probation. Officers whose vernacular is Urdu may be exempted from passing the language examination. Failure to pass the examination within the prohationary period involves liability to removal from service.

4. Officers of the Indian Ruilway Service of Engineers, recruited under these regula-tions will not be entitled to gension on quitting the service, but will be eligible throughout their service for the benefits of the State Railway Provident Fund, to which they will be required to subscribe, and by the rules of which Fund they will be required to ahide. They will also be eligible for gratuities for good, efficient, fuithful and continuous service. A summary of the benefits of the State Railway Provident Fund and the Gratuity Rules will be found in Appendix 11.

5. Pay will commence from the date of joining service. Service for increments will also count from the same date. Particulars as to pay we contained in this Appendix.

- 6. Leave Rules applicable to State Railway officers are under revision. Officers recruited under these regulations will, peuding the revision of the rules, he entitled to leave under the existing rules, but the revised rules will apply to them when they are brought into
- 7. Officers will ordinarily be employed throughout their service on the Railway to which they may be posted on first appointment and will have no claim, as a matter of right,

to transfer to some other Railway. But the Government of India reserve the right to transfer such officers, in the exigencies of service, to any other Railway or project in or out of India. Officers will be liable to serve in the Stores Department of the State Railways if and when called upon to do so.

- 8. The Government of India reserve the right of assigning to the R. E. officers recruited for the Indian Railway Service of Engineers, under the rules laid down by the Secretary of State, and to officers promoted from the subordinate ranks, positions in the seniority list at their discretion.
- 9. The following are the rates of pay at present admissible to officers appointed in India to the Indian Railway Service of Engineers:—

#### Administrative Officers.

Rs.

Deputy Chief Engineers, 1,950 N. W., E. I. and E. B. Railways.

Deputy Chief Engineers, 1,750—100-2,150 G. I. P. Railway.

Chief Engineers, N. W., 2,750—125—3,000 E. I., E. B. and G. I. P. Railways.

10. The increments will be given for approved service only, and in accordance with rules of the Department.

11. Pay will be drawn according to the junior scale, except when an officer is holding a charge which is declared to carry the senior scale of pay. No officer will, however, draw more than the pay of the tenth year of service on the junior scale, anless the Agent is satisfied that he is fit to hold a charge carrying the senior scale of pay.

the senior scale of pay.

12. Pay on the senior scale will be drawn by officers holding charges which have been declared to carry the senior scale of pay. No officer on the schoor scale of pay will draw more than the pay of the 17th year of service, unless the Ruilway Board are satisfied that he

is fit for further promotion.

13. Promotions to the administrative grades are dependent on the occurrence of vacancies in the sanctioned establishment and are made wholly by selection, mere seniority is considered to confer no claim for promotion.

is considered to confer no claim for promotion.

14. Officers of the Indian Builway Service of Engineers are also eligible for appointment to the administrative posts in the Transportation and Stores Departments as also in the Agency and the Divisions.

#### APPENDIX II.

Provident Fund and Gratuities.

The following is a sunguary of the rules relating to Provident Fund and Gratuities applicable to officers appointed to the Indian Railway Service of Engineers:

Provident Fund.—The State Railway Provident Fund is established on the following basis:—

- (i) Every officer is required to subscribe to the Provident Fund at a uniform monthly rate of one-twelfth of pay, to which is added half-yearly a bongs at the rate of 100 per cent, of an officer's subscriptions for the half year.
- (ii) Compound interest at the rate of 43 per cent. per annum is allowed on the officer's subscription and bonus. This rate is subject to reconsideration, should the rates at which the Government of India borrow undergo modification, six months' notice being given to members before any alteration is made.
- (iii) The sum standing to the credit of an officer, or the balance thereof after making any authorised deduction, is paid to him on quitting the service; or on the event of his death before retirement, to his legal representatives.

Gratuities.—Officers of Indian State Railways are also eligible on retirement, at the discretion of the Railway Board, for gratuities for good, efficient, faithful and continuous service on the following conditions:—

- (a) Completion of 30 years' service, or
- (b) Attainment of the age of 50 years, or
- (c) Retirement on account of permanent incapacity due to bodily or mental infirmity, or
- (d) Abolition of appointment due to a reduction of establishment, if other suitable employment cannot be found for the officer.

The amount of gratuity admissible is as follows: -

 (a) For service ant exceeding 18 years, half a month's pay for each year of service, subject to a maximum of six months pay;

(b) For service in excess of 18 years, six months' pay plus half a month's pay for each year after the eighteenth, subject to a maximum of 12 months' pay or Rs. 25,000 whichever is less.

In case of an officer's death while in service, the gratuity is paid to his widow or children dependent on him.

#### APPENDIX III.

Syllabus of the examination for the Indian Railway Service of Engineers, in the compulsory subjects (a) (3), (a) (4) and in the optional subjects.

Note.—There will be no practical examination in any of the subjects.

#### (a) (3)—Applied Mathematics.

Statistics.—Vectors. Notion of force. Gravitational or Engineer's unit of force. Various kinds of forces. Friction. Composition and resolution of cummurent forces. Manueuts. Parallel forces and centres of gravity. Comples. Combitions of equilibrium of non-current coplanar forces. Funicular polygon.

Kinematics.—Units of space and time. Rectilinear motion; motion of a projectile; angular motion; relative motion; simple hurmonic motion.

Kinetics.—Newton's Laws. Absolute system of units. Linear momentum. Impact of clastic bodies. Impulse and impulsive forces. Angular momentum; numents of intertia and radii of gyration; impulsive torque. Centrifugal forces. Conirul penulum. Motion of the rentre of mass. Cant on railway curves and banking of rounl-tranks. Hoop stress and stress in the rim of a fly-wheel.

Work, power, kinetic and potential energy. Principle of energy. Kinetic energy due to rotation. Work done by a couple. Principle of Virtual work. Simple machines, mechanical advantage, and velocity ratio. Stable and unstable equilibrium. Deflection in a framed structure. Oscillations. Simple and Compound pendulum. Units and dimensions.

Hydrostatics.—Fluid pressure, its transmission, and measurement; density; specific gravity; metric system of units; resultant pressure; centre of pressure; equilibrium of floating bodies; metacentre. Laws of Boyle and Charles. Mixture of gases. Nature and action of simple hydraulic machines.

#### (a) (4) Applied Mechanics.

#### (a) Buildings.

Consideration of materials used in the construction of roof-trusses. Steel and timber. Determination of stresses in trusses by various methods. Dead-loads and wind pressures. Factors of safety and working stresses.

Design of roof-trusses. Various types of roof-trusses and roof coverings; collar beam and hammer beam trusses.

Use of Euler's, Gordon's, Rankine's, Fidler's, Johnson's and straight line formulæ in the design of struts. Buckling factor of struts; curves showing comparative strength of struts obtained by various formulæ. Choine of size of sections. Finish of steel work. Joints. Design of end-bearings; methods of fixing and supporting ends.

Application of circle and ellipse of stress and Chapeyron's theorem to design of structures.

Cast Iron and Steel Columns.—Flange and with runnivitious to steel columns; raps; hases; transverse braining of columns.

Foundations.—Safe pressures; foundations for columns. Slab fundations; cantilever foundations; grillage foundations. Wells. Piles.

Retnining Walls and Earth-pressures.—Rankine's theory, Weilger theory, Winkler's, and Bligh's graphical constructions, with corrections. Design of various types of retaining walls in masonry.

Tall Masonry and Steel Chimneys.—Theory and design.

Design of steel and masonry reservoirs; with considerations of wind-pressures.

Deflection of fraued structures and determination of stresses, etc., in redundant frames.

Influence diagrams for hending moment and shear for uniformly distributed and irregular loads on trusses, built-in beams, and threepinned, parabolic, semi-elliptic and semi-rircular arches.

General principles of dome design.

Principles of Building Design; ronsideration of loads on buildings. Strel-work, girders, etc., for buildings.

#### (b) Bridges.

Design of superstructure. Determination by graphical and analytical methods of bending moment due to moving loads. Windpressures.

Design of masoury bridges and culverts. Plate-web girders. Analysis of stresses.

Warren and lattice girlers.

Three-pinned arches; doubly pinned and rigid arches.

General considerations on the design of suspension, cantilever, and tubular bridges.

Steel-arched bridges.

Swing bridges.

#### (c) Reinforced Concrete.

Shear, houd, and diagonal tension, its nature, evaluation and location of reinforcement.

Design of simple and doubly reinforced heams, and continuous beams.

Theory and design of reinforced concrete unlumns and piles.

Design of slab foundations.

Design of simple cantilever and counterfort retaining walls.

Equivalent moments of inertia for reinforced commete sections.

Theory of elastic deflections and outline of investigation of stresses in reinforced concrete arches.

#### (d) General.

Analysis of stress, analysis of strain, elastic limit and ultimate strength. Relation between the elastic constants. Launhardt-Weyrauch formula for working stresses in a structural member and determination of its cross-sectional area. Repetition of stresses. Bending moment and shearing force diagrams for dead loads. Graphical determination of stresses in frames; effect of wind pressure; method of sections. Stress in the cross-section of a beam due to bending (M/I = f/y = E/R); compound and conjugated stresses. Rankine's theory of earth-pressure; depth of foundations and strength of footings. Grillage foundations; Coulomb's theory of earth-pressure; modification due to Rebahn.

Bending moment and shearing force diagrams for live loads. Analysis of uniform and uniformly varying stress. Elastic theory of bending of beams; bending and shear stresses in beams. Modulus of section and equivalent Maximum and minimum stresses in a joint due to eccentric loading. Stresses in dams and chimneys. Stability of block-work structures. Design of rivetted joints and stresses in boiler shells. Enler's theory concerning struts; modifications due to Rankine, Torsion. Combined Gordon and others. torsion and bending deflections. Encastre beams. Continuous beams and theorem of deflections. Elastic theory of arches. three moments. Masonry arches.

# (b) (1) Physics (including Electricity and Magnetism).

Heat.—The methods of calorimetry and thermometry. Vapour-pressures, critical temperature and pressure. Conduction and diffusion of heat and the determination of constants. Radiation and absorption; laws of cooling. Theory of exchanges; methods of measuring radiation. Laws of thermodynamics; simple applications.

Light.—Velocity of light. Illumination; photometry. Achromatism in lens systems;

direct-vision spectroscope.

The wave theory; simple interference phenomena. Huygens' principle. Explanation of straight line propagation, reflexion, and refraction of light. Action of mirrors, lenses, etc., reviewed from this standpoint. Simple diffraction phenomena. Gratings and wavelength determination. Spectrum analysis; Doppler's principle. Double refraction and polarization of light; rotatory polarization; simple applications.

Magnetism.—Forces on a magnet in a magnetic field. Determination of axes and moment of magnet. Magnetic potential, level surfaces. Interaction of two short magnets; determination of field strength. Magnetic shell; its potential energy in magnetic field. Total normal induction Gauss' theorem; number of lines of force. Magnetic induction in iron, etc. Theory of magnetism.

The magnetic field of the earth; the clements and their variations; the compass and its cor-

rections.

Electricity.—Electric capacity; specific inductive capacity. Distribution of electricity on surface of conductors; images. Value of electric force in simple cases of distribution.

The mechanical force on charged conductors; energy of electrified systems. The dielectric medium; dielectric displacement currents.

Wheatstone's bridge; specific resistance; resistance thermometers. Conductivity of electrolytes; ionization; migration phenomena; accumulators. Standard cells; the potentiometer system of measurement. Thermoelectricity; application of thermo-dynamics; thermo-electric diagrams. Electro-magnetic induction; coefficients of induction; induction coils. Energy of circuit carrying current when placed in a magnetic field; mechanical force on conductors carrying current; moving coil instruments. Lenz's law; illustration from dynamos and motors, etc. Determination of current resistance; E. M. F. in absolute measure. The discharge of a condenser; electric waves. Elementary theory of the electron.

The elementary theory of the continuous current dynamo and motor, and of the alternating current dynamo. General Principles of the application of electricity to lighting, power-transmission, telegraphy, etc.

Sound.—The transmission of energy through material media by wave-motion; speed of propugation of waves of permanent type. Nature of musical sounds; pitch; scales. Reflection and refraction of sound; influence of wavelength. The vibration of strings, bars, plates and gas columns; resonance. Interference and diffraction phenomena. Analysis of sound. Measurement of wave-length, velocity and pitch.

#### (b) (2) Chemistry and Metallurgy.

- (i) General Inorganic and Organic Chemistry including chemical theory.
- (ii) The chemistry of metals (omitting the rare metals) treated more fully and including the more elementary metallurgical processes.

The syllabuses are given below:—

(i) Chemistry, Inorganic, including Chemical Theory.—Methods of determining equivalent, atomic and molecular weights; the atomic theory; valency; properties of gases; transition from gaseons to liquid state; vapour pressure and boiling point; osmatic pressure; theory of electrolytic dissociation; electrolysis; relation of chemical energy to electrical energy and to heat; hw of mass action; catalysis; relation of physical properties to chemical constitution.

The descriptive portion will include the elements and their compounds studied from the standpoint of the periodic classification, omitting the rare metals.

The elements of Organic Chemistry.—The composition and relations of some of the typical carbon compounds; isomerism; polymerism; purification of organic substances; distillation; crystallization; criteria of purity; boiling point; melting point; methods of ultimate analysis of organic compounds; calculation of molecular weight from empirical formulæ; constitutional formulæ.

Methane; ethane; ethylene; acetylene; methylchloride; methylene dichloride; chloroform; brounform; idoform; carbon tetrachloride; methyl alchol; ethyl alchol; ether; formal-dehyde: acetaldehyde; chloral; formic acid; acetic acid; butyric acid; stearic acid; esters; simple amines; oxalic acid; mulonic acid; suc-cinic acid; glycerol; the fats; lactic acid; tartaric acid; citric acid; carbohydrates; starch; benzenc; toluene; chlorobenzene; nitrobeazene; aniline; benzene sulphanic acid; benzuldehyde; benzoic acid; dizaobenzene ; henzyl alchol.

- (ii) A. Outlines of the main metallurgical processes of the following metals, their chief uses and tests:
  - odium, Potassium, Copper, Silver, Magnesium, Calcium, Zinc, Nickel, Bismuth, Mercury, Aluminium, Tin, Lead, Antimony, Iron, Chromium, and Manganese.
- B. General metallurgy of iron—Blast furnace; grading of pig iron; manufacture of wrought iron; effect of carbon, silicon, sulphur and phosphorus on cast iron; cement steel; shear steel; crucible steel; detailed consideration of effect of earbon, silicon, sulphur, phosphorus, nickel, manganese, chromium, tungsten, molybdenum and vanadium on steel; Bessemer Process, Open-hearth process; Electrical furnaces for steel making.

Introduction to the study of Metallography; Solid solution; Eutectics; Hardening; Annealing; Tempering; Alloys; Brasses; Bronzes. Welding

of metals.

Electric Furnaces. D.

E. Electroplating.

Rusting and corrosion of metals.

G. Boiler water—Hardness of water, mathods of softening.

#### (b) (3) Prime Movers.

#### Fuel, Gas Plants and Boilers-

- Fuel.—Coal, wood, petroleum, gas, petrol, alcohol, etc.; physical characteristics; approximate chemical composition; heat of combustion. (a) Fuel.—Coal,
- (b) Gas Plants .- Gas-Producers; pressure and suction plants; arrangement and working.
- (c) Boilers.—Draught; natural, forced and induced. Ordinary forms of stationery. locomotive, marine, water-tube, and other types; heating surface, fire-grate area; boiler efficiency; superheaters; feedwater heaters; accessories management.

#### Theory of Heat Engines—

- (a) Thermodynamical principles; Carnot's cycle; perfect heat engine; second law.
- (b) Air Engines. Stirling and other forms.
- (c) Internal Combustion Engines .- Gas, oil and petrol engines; engines with fluid pistons; types and working; features of cycles. Proportioning of mixtures; efficiencies.

(d) Steam.—Thermodynamics of the generation, expansion, and condensation of

steam; heat diagrams, etc. Steam Engines and turbines, with special reference to modern develop-(e) Steam

ments.

(f) Refrigerating Plant.—Theory and general arrangement of the more common types.

(g) Air Compressors.—Theory of pneumatic

working.

#### Generating Plants, Accessories and Details-

(a) General arrangements and construction of the more important types.

(b) Candensers, air-pumps, circulating

numps, cooling tanks, etc.
(c) Carburettors, and systems of ignition. (d) Cylinders, pistons, cross-heads, guides, connecting rods, cranks, governors, fly-wheels, valves and valve gears, glands and pipes.

(e) Engine-Testing.—Consumption of steam and fuel, gas and oil; brakes and dynamometers; indicators, and indicator diagrams.

#### (b) (4) Hydraulics and Hydraulic Machines.

Hydraulics.-- Definitions relating to flow af water; stream-line motion. Bernoulli's theo-Venturimeter.

Flow of water through small and large orifices; drowned orifices; sudden culargements and contractions in flow of water. Time of emptying tanks. Flood absorptive capacity of tanks.

Flow of water over natches and weirs.

Flow of water through pipes; hydraulic gradients; losses of head due to heads, contractions and sudden enlargements; losses of head through siphons. Impacts at bends thrust-blocks.

Flow of water in open channels and in pipes; Chezy, Basin, Kutters, and other formulae and their applications; cross sections of greatest efficiency.

Calculations of afflux and back water curve. Ganging the flow of water in open channels;

water-meters.

Hydraulies and hydrostatics of weirs and other canal works.

Hydrokinetics; uniform and steady flow; stream-line and turbulent motion. Bernoulli's

stream-line and turbulent theorem and its application.

Discharge through orifices and mouth variable variable Hend lost heads. Laws of fluid friction. due to friction.

Hydraulic Machinery.—Impact of water on fixed and moving vanes. Turhines; impulse and reaction. Description of different types of turbines. Determination of vane-angles. Efficiencies of turbine plant. Governing.

Pump.—Reciprocating, contribugal and turbine.

#### (b) (5) Construction.

#### (i) Building Materials.

Stone.—Selection. Characteristics. Indian and European stones. Quarrying. Blasting Dressing stone. Implements.

Bricks and Tiles .- Classes of bricks and their distinguishing qualities. Moulding. Drying and stacking. Brick-burning. Types of Kiln. Firebricks. Terra-cotta. Tile manufacture.

Cements, Limes and Mortars.-Use of mortar. Natural and artificial coments. Varieties of limes. Hydraulicity. Burning. Clumps, Kilns. Plaster. White-wash. Distemper. Concrete. Portland cement.

Timber.—Growth of trees. Felling trees. Classification and properties of Indian and other woods. Most suitable woods for particular purposes.

Stone Masonry.—Ashlar of various sorts. Block-in-course. Bond. Dressing stone. Rubble masoury. Safe loads. Lewis. Dowel. Cramp. Template. Derrick. Gyn. Gautry. Joggle. Scaffolding Sheurs.

Brick Masonry.—Types and their uses, Bond. Closers. Bedding. Moisture Scaffolding. Precautions against settlement. Plastering. Pointing. Coping. Blocking course. Parapet. Eaves Corbel. Lintel. Jamb. Reveal. ting. Drip-course. Pisé walling. ing back. Cornice. course. Sill. Footing. Dhajji walling. Hollow masonry. Reinforced brick-work.

#### (ii) Design of Structures.

Buildings.—Design of a residential bungalow; with special reference to selection of site, construction of walls, damp-proof courses, water-supply, drainage and ventila-

Fire-proof construction.

Reinforced brick-work design; beams, floors,

Thomson's principles of similar structures as regards their strength, stability, deflections, etc.

Bridges.—Selection of site. Determination of discharge of river by consideration of area of watershed, intensity of rainfall, and by Waterway to be provided. Depth zoning. of scour.

Design of foundation. Box; crate; well; pile; continuous masoury; reinforced concrete slab. Piers, ordinary and abutment. Floors and curtain walls.

Reinforced Concrete.—Nature, uses, properties advantages and disadvantages of Reinforced Concrete over other types of construction. Assumption made in theory of stress

in reinforced concrete heams.

Theory and design of simple beams,
T-beams and slabs for different conditions of loading.

(iii) General - Principles governing the design of Railways, Roads, Harbours and other works.

Roads.—Formation and permanent way. Types of roadways. Hill roads. Ruling Ruling gradients. Resistance of vehicles. Drainage. Tramways.

Railways .- Formation and permanent way. Gauges. Tractive force. Tunnelling. Light railways and mountain railways.

River Training Works.—Spurs. Groynes, Bell Bunds. Streamlime Bunds. Mattresses. Aprons.

Miscellaneous.-Piles and pile-driving; sheet and screw piling. Diving operations, reclamations and dredging. Retaining walls. Depth of foundations. Counterforts and buttresses. Revetments. Construction sinking of masonry wells. Simple masonry dams. Technical names of various parts.

#### (b) (6) Surveying.

Surveying.—Construction of Scales. ventional signs. Use and adjustment of instruments. Theory of levelling; simple, compound, check and reciprocal levelling. Vurious causes of errors in levelling. Elimination of such errors. Customary limits for errors. Method of keeping various styles of field-books. Use of boning rods. Chain survey.

Chain and compass survey.

Theodolite Traversing by Gale's traverse system for city and town improvement surveys. Source of errors and required precision in traversing. Traverse tables. Theory and use of the simple plane-table and tangent clinometer, with and without the innguetic compass. Theory and use of the stadia method of plane-tabling with levelled heights and reductions of distances and heights by slide-rule. The three-point problem or plane-tabling by resection from within and without the triangle. Geometrical and trignometrical proof of the three paint problem. The two point problem with and without the magnetic compass. Triangulation with reciprocal value; heights of stations; base line measurements. Finding values of position by observations to three known points. Computation by reet-ungular ca-ordinates with convergency correc-

Contouring of the triangulated area by heights calculated from the reduced levels. Longitudinal and cross-sections run with a level. The location on the map of a road, railway, canal or weir, etc. The general principles of tunnel alignment and of carrying surface meridians underground for mine-surveys. Discussion on the latest patterns of instruments.

PracticalAstronomy.—Introduction spherical trigonometry up to the solution of the spherical triangle, and the adaption of Napier's rules of circular parts. Definitions; systems of celestial co-ordinates; the reasons for sidereal, sun and mean time; acceleration, retardation and equation of time. The Julian and Gregorian calcudars; time and the various astronomical corrections.

Finding the meridian of a place by observations to the sun or a star at upper culmination, by equal altitudes, by the sun or stars not on the meridian, and by circumpolar stars at elougation; and finding time by the sun or stars on the meridian and ex-meridian; finding latitude by polaris and circum-meridional observa-Use and construction of sundials.

Railway Curres and Alignments.—Theory of curves. Curves laid out with the aid of augular instruments; with one theodolite. Curves laid out by linear measurement only. chards and offsets (several methods). offsets inside the curve. Curve by ordinates from the long chord. Curve with certain given duta to puss through a ruling point. Compound curves. Diversion curve. Vertical curves. Curve spiral or transition curve.

Double centre method for laying out a straight Setting out pegs for earth work. Computation of areas of cross sections, etc.

# (b) (7) Sanitary Engineering and Water Supply.

Water Supply. Source of Supply.—Springs; wells; rivers; lakes; choosing the supply.

Waterwocks. -- Intukes; settling filters; rates of filtration; various types of mechanical filtration.

Reservoirs.—Impounding, storage and service reservoirs; water-towers.

joints; Pipes.--Rising mains; expansion loses in head; valves; service-tanks; houseconnections; meters; cisterns.

Pumping Installations.—General types of installations used in India.

Engineering.—Water Sanitary purification; natural waters, impurities present; methods employed for rendering natural waters potable boiler-waters and softening agents; interpretation of analytical reports.

Sanitary laws; refuse removal and disposal; the chemistry of sewage; river-pollution and its effects; sewerage systems; sewers, their construction and ventilation; traps; house construction and ventilation; traps; drainage; purification of sewage; chemical precipitation and precipitants; liquefaction of sewage; sewage-oxidation; irrigation and trenching; sewage farms; septic tanks; coutract beds; the combined system; details concerning tanks, filters and filtration; distributors, etc.

#### APPENDIX V.

List of University degrees which will be recognised for admission to the examination for the Indian Railway Service of Engineers.

Oxford.-B.A. with Honours, in the Engineering Science Final Honours School.

Cambridge.—B.A. with Honours, chanical Science Tripos. in MeSt. Andrews—B.Sc. in Engineering. Glasgow.—B.Sc. in Engineering. Edinburgh.—B.Sc. in Engineering. Dublin.—B.A. I (Ordinary or with

· Dublin.—B.A.

Honours in Engineering).

Durham.—B.Sc. in Civil, Mechanical or Electrical Engineering, or in Naval Architecture (Honours or Ordinary

London.—B.Sc. (Internal degree) in Engineering, Ordinary or with Honours [not including the B.Sc. in Engineer-ing (Mining) or the B.Sc. in En-gineering (Metallurgy)]. The External degree is also accepted to the same extent, provided it is recognised by the Institution of Civil Engineers as exempting from Sections A and B of the A.M.I.C.E. examination.

Victoria University (Manchester)—B.Sc. in Engineering (Honours degree or Ordinary degree from 1925 onwards), B.Sc. Technical in Mechanical or Electrical Engineering (Honours Division in the Final Examination).

Birmingham.—B.Sc. in Civil, Mechanical, Electrical Engineering (Honours or Ordinary degree).

Liverpool.—B. Engineering in Civil, Mechanical, Electrical or Marine En-gineering or Naval Architecture

(Honours or Ordinary degree).
Leeds.—B.Sc. in Civil, Mechanical, or
Electrical Engineering (Honours or

Ordinary degree).
Sheffield.—B. Engineering in Civil
Mechanical or Electrical Engineering (Honours degree or Ordinary degree with a first class in the Final Examiuntian).

Bristol.--B.Sc. in Civil, Mechanical or Electrical Engineering (Honours or

Ordinary degree). University of Wales.-B.Sc.

(in Civil, Mechanical or Electrical Engineering).

University of Ireland.—B. E. Nutional Queen's University, Belfast.—B.Sc. in Engineering.

Note.—The above degrees will be accepted only if taken after three years' study and the passing of the regular examinations in the several universities. The conditions as to three years' study will not, however, apply to Indiana who have the several to the se Indians, who, having taken an Indian degree, which exempts them from part of the University course, shall have taken one of the above degrees in less than three years in accordance with the regulations of the University concerned.

#### APPENDIX VI.

Regulations for the Medical Examination of candidates for admission into the Indian Railway Service of Engineers.

(These regulations are published for the convenience of rundidates and in order to enable them to ascertain the probability of their coming up to the required physical standard. But it must be clearly understood that the Government of India reserve to themselves an absolute discretion to reject as unfit any candidate whom they may consider, on the report of the Medical Board, to be physically disqualified for the Railway Services; and that their discretion is

in no respect limited by these regulations).

1. To be passed as fit for an appointment as an officer of the Indian Railway Service of Engineers, a candidate must be in good mental and bodily health and free from any physical defect likely to intecfere with the efficient performance of the duties of his appointment.

2. In the matter of the correlation of age, height and chest-girth of candidates of Indian (including Anglo-Indian) race, it is left to the Medical Board to use whatever correlation figures are considered most suitable as a guide in the examination of the candidates.

Note.—The following table of correlation of age, height and chest-girth is to be used as a guide in the examination of candidates of European race.

Physical Equivalents.

Age last birth- day.	Height without shoes.	Girth when fully ex- panded.	Chest range of expan- sion not less than.
	•	Inches.	Inches.
18	80 and under 62 inches 62 , 155 ,, 65 ,, 68 ,, 72 ,, 72 and upwards	321 331 331 34 34	2 2 2 2 2 2

The candidate's height will be measured as follows:-

He will remove his shoes and be placed against the standard with his feet together, and the weight thrown on the heels and not on the toes or outer sides of the feet. He will stand erect without rigidity, and with the heels, culves, buttocks and shoulders touching the standard; the chin will be depressed to bring the vertex of the head level under the horizontal bar, and the height will be recorded in inches and parts of an inch to quarters. No fixed limit of height is enforced.

The candidate's chest will be measured as follows:-

He will be made to stand erect with his feet together, and to raise his arms over his head. The tape will be so adjusted around the chest that its upper edge touches the inferior angles of the shoulder blades behind, and its lower edge the upper part of the nipples in front. The arms will then he lowered to hang loosely by the side, and care will be taken that the shoulders are not thrown upwards or back-wards so as to displace the tape. The candidate will then be directed to take a deep inspiration several times and the maximum expansion of the chest will be carefully noted. The minimum and maximum will then be recorded in inches, 33-35, 34-361, etc. In recording the measurements, fractions of less

than I inch should not be noted.

5. The candidate will also be weighed and his weight recorded in pounds. Fractions of a pound should not be noted.

6. The candidate's eye-sight will be tested in accordance with the following rules. The results of each test will be recorded.

- (i) General .- The candidate's eyes will be submitted to a general examination directed to the detection of any disease or abnormality. The candidate will be rejected if he suffers from any markid conditions of the eyes, eyelids, or contignous structures, of such a sort as to render, or to be likely at a future date to render bim unfit for service.
- (ii) Visual Acuity .- The candidate will be examined, with the apparatus and according to the methods prescribed by the Railway Board's Standing Advisory Committee of Medical Officers, to determine his acuity of vision, and the examination will include two tests, one for distant and the other for near vision. Each eye will be examined separately. No candidate will be accepted whose Visual Acuity falls below the following standards-

	The one eye.	The other eye.
Distant vision— without glasses corrected with glasses	6/12 6/6	6/18 6/9
Manifest Hyperopia Near vision—	1.5	1 •5
with or without glass	0.6	0.6

(iii) Colour Perception.—The candidate will be examined for colour knowledge with the apparatus and according to the methods pres-cribed by the Railway Board's Standing Advisory Committee of Medical Officers. Any defect of colour perception will be a cause for rejection of the candidate.

(iv) Night Blindness.—The candidates Night Vision will be tested, with the apparatus and according to the methods prescribed by the Railway Board's Advisory Commission Medical Officers, to ascertain whether or not date who under the conditions of the ordinary Test for Visual Acuity has 6/6 Vision with both eyes open, with ar without glasses, will be rejected if, under the conditions of the Night Blindness Test, his vision with both eyes open, with or without glasses, falls below 6/24.

- (v) Field of Vision.—The fields of vision of the candidate's eyes will be examined with the apparatus and according to the methods prescribed by the Railway Board's Standing Advisory Committee of Medical Officer. Any defect will be a cause for rejection of the candidate. candidate.
- 7. The urine (passed in the presence of the examiner) should be examined and the result recorded.
- 8. The following additional points should he observed:-
  - (a) that the candidate's hearing in each ear is good and that there is no sign of disease of the ear;
  - (b) that his speech is without impediment;
  - (c) that his teeth are in good order, and that he is provided with dentures where necessary for effective masticulation (well filled teeth will be considered sound);
  - (d) that his chest is well formed, and his chest expansion sufficient; and that his heart and lungs are sound; and that his blood pressure is within normal limits;
  - (e) that there is no evidence of any abdominal disease;
  - (f) that be is not ruptured;
  - (g) that he does not suffer from a severe degree of hydracele, varicoccle, varicose veins or piles;
  - (h) that his limbs, bands and feet are well formed and developed, and that there is free and perfect motion of all his joints;
  - (i) that he does not suffer from any inveterate skin disease;
  - (j) that there is no congenital malformation or defect;
  - (k) that he does not bear traces of acute or chronic disease pointing to an impaired constitution; and
  - (l) that he bears marks of efficient vaccination.

When any defect is found it must be noted and the medical examiners should state their opinion as to whether or not it is likely to interfere with the efficient performance of the duties which will be required of the candidate. If the condition is remediable by operation it should be so stated.

# ANNEXURE TO APPENDIX VI.

CANDIDATE'S STATEMENT AND DECLARATION.

The candidate must make the Statement required below prior to his Medical Examination and must sign the Declaration appended thereto. His attention is specially directed to the Warning contained in the Note below:-

- State your Name in full (in block letters).
- 2. State your age and birthplace.

3. (a) Have you ever had small-pox, intermittent or any other fever, enlargement or suppuration of glands, spitting of blood, asthma, inflamation of lungs, heart disease, fainting attacks, rheumatism, appendicitis?

- C. The maundage on which the amount of toll is calculated shall be reckoned to the nearest integral multiple of 12½ maunds, any remainder of less than 12½ maunds being rejected. In the case of vessels exceeding 500 maunds by measurement, the maundage shall be reckoned to the nearest integral multiple of 50 maunds, rejecting any remainder of less than 50 maunds.
- D. Saitees.—The product of one quarter of the inside length of the vessel, measured along the centre line from stem to stern, multiplied by the interior greatest breadth of the vessel, multiplied by the greatest depth breasured from the top to the interior bottom of the vessel, is to be taken as equal to the number of maunds upon which tolls shall be levied.

#### CLASS II.

For vessel of class II the number of maunds obtained by the system of measurement prescribed for vessels of class I shall be increased by one-half. For vessels of this class above 5,000 maunds measurement, the maundage shall be reckoned to the nearest integral multiple of 500 maunds, rejecting any remainder of less than 500 maunds. In the case of steamers and motor boats the maundage determined as above shall be reduced by one-third as an allowance for engine space.

For vessels of class II which are furnished with reliable way bills, the gross maundage of cargo shown by the way bills or in the case of steamers, the mandage obtained from multiplying the registered tonnage of the steamer by 27, may, at the option of the employer of the vessel or the steamer (as the case may be), be taken as the maundage on

which tolls will be charged.

4. After the measurement the person in charge of the vessel shall be provided with a slip showing the maundage to be charged, which must be presented at the toll office where he will be provided with a ticket, after payment of toll, which will permit the vessel to pass the gate or proceed through the channel.

5. Every ticket shall have entered on it the name of the sarang, manjee or other person in charge of the vessel, the date of entry, the maundage, the cargo, the amount of toll charged and the number of days for

which the ticket remains current-

6. All tolls are payable on demand and shall be paid at the toll office before a vessel is permitted to proceed.

- 7. The ticket must be kept on hoard the vessel and in possession of the person in charge of the vessel and must be produced for inspection when demanded by the person authorised to collect tolls, or by any officer to whom such person is subordinate. If an demand the ticket is not produced, such person or officer shall assess the tollage. If on demand the ticket is not produced, such person or officer shall assess the tollage as provided in rules 3 and 12 and shall require payment of toll, and unless and april the toll is paid, or the original ticket or a doplicate is produced as evidence that tall has already been paid, the vessel shall be liable to seizure and detention under the provisions of section 9 of the Act.
- 8. Duplicates of lost tickets, of which the numbers and dates can be satisfactorily established, will be granted by the collector of tolls on payment of a fee equal to one quarter of the total tollage, subject to a minimum fee of one anna per ticket.
- 9. All vessels, whether the property of Government, District Board, other local bodies or of private persons, are liable for toll except those specially exempted under these rules or by a resolution passed by the District Board of Bakarganj from time to time.
- 10. The canal may be closed once a year for effecting the necessary repairs to it on seven days' notice of the intention so to close it being given; but in the event of any sudden emergency the canal may be closed at any time without prior notice, and no claim in such case by owners of vessels or others for compensation on account of detention shall be entertained.
- 11. No rafts exceeding 50 feet in length and 5 feet in breadth shall be permitted to enter the canals.

12. The rates of toll shall be as follows:—

(1) On all vessels empty or laden, per hundred maunds

Four annas.

(2) On all vessels empty or laden, for 12½ maunds or less

... One-half anna.

(3) On rafts of bamboos, grass, timber, etc., not exceeding 50 feet in length and 5 feet in breadth

Two annas each raft.

Tolls will be levied at Nali and Shaplesa.

- 13. For boats frequently using the canal such as boats carrying passengers, grass or perishable articles monthly tickets will be issued at 10 times the ordinary toll.
- 14. Every vessel which has paid toll shall be allowed to remain in the canal for three days inclusive of the days of entry into and leaving the canal. A vessel remaining in any part of the canal longer than three days shall be charged demurrage equal to one-half of the toll for each day in excess of three days. No vessel shall be permitted to remain in the canal for more than one month. Provided that this rule shall not apply to vessels holding monthly tickets under rule 13 above, which may remain in the canal for more than three days without payment of demurrage but not for more than one month at a time.
- 15. No vessel carrying exclusively police officers or servants, soldiers and officers of the British Army, post mail runners, officers of the Irrigation Department on duty, officers and servants of the toll office for the canal referred to in these rules while on duty, or the vessels of such other persons as may be exempted by a resolution of the District Board of Bakarganj, shall be liable for toll in the canal
- 16. Any matter relating to the mode of collection of tolls and other relevant points, not provided for in these rules, shall be decided by the District Board of Bakarganj at a meeting, and shall be subject to the approval of the local Government.

Simla, the 15th October 1929.

No. F. 17-V/R. II/1929.—The following Resolution passed by the Secretary of State in Cauncil is published for general information.

In exercise of the powers conferred by subsection (2) of section 96-B. of the Government of India Act, the Secretary of State, with the concurrence of the majority of votes at a meeting of the Council of India held this 4th day of September 1929, hereby makes the following amendments to the Civil Service Regulations, namely:—

- (1) For Article 728 of the said Regulations the following shall be substituted, namely:—
- "728 (a). Subject to the provisions of Article 729, the rules in this Chapter apply to all persons in civil employ (and to all persons employed in a Civil capacity under the Army Department) whether their employment is permanent, temporary or casual and whether remunerated by fixed pay or by piece-work

rates: Provided that, in the case of a person to whom the Workmen's Compensation Act, 1923, applies,—

- (1) An award shall be paid under the provisions of this Chapter only if the authority competent to sanction it considers that the compensation payable under the Act is, in the particular case, inadequate; and
- (2) the amount of an award paid to any such person shall not exceed the difference between the amount otherwise admissible under these rules and the amount of compensation payable under the Act.
- (b) In the case of persons remunerated by piece-work rates pay for the purposes of this Chapter means the average earnings of the last six months of service immediately preceding death or the receipt of injury."
- (2) In Clause (1) of Article 746 of the said Regulations the words "in civil employ" shall be omitted and in the Note under the said Clause for the words "officers in civil employ" the word "personnel" shall be substituted.

No. F. 43-IV-R.II.—The following Report of the Government (India Office) Actuary on the Valuation of the Indian Givil Service Family Pension Scheme as at 31st March 1928, together with consolidated accounts for the five years ending on that date, is published for general information:—

Indian Civil Service Family Pension Scheme.

# Report by the Government Actuary on the Valuation as at 31st March 1928.

Trensury Chambers, S. W. I, 28th June 1929.

Sir,

In compliance with instructions rereived through the Coutroller of Pension Funds, I have valued the assets and liabilities of the Indian Civil Service Family Pension Scheme as existing on 31st March 1928.

- 2. The present value of the future benefits and contributions is dependent on the following elements:—
  - (a) The rates of mortality, at each age, which will prevail among the subscribers, their wives, widows, sons and daughters.
  - (b) The rate of marriage, at each age, among unmarried subscribers.
  - (c) The relation between the ages of husband and wife in the case of married subscribers.
  - (d) The probability of the birth of (i) a son or (ii) a daughter to a married subscriber at each age.
  - (e) The rate of marriage, at each age, among daughters of subscribers, and the corresponding rates of re-marriage of willows.
  - (f) The probabilities of the re-entry of widows of subscribers to full pension, following on the termination of second marriages.
  - (g) The proportion of subscribers in active service at each age who will retire and, normally, cease to contribute.
  - (h) The rate of interest to be derived-from the investment of the fund.

Past experience, obtained either from the rerords of the scheme under investigation or from those of analogous schemes, provides the only reliable guide to the operation of elements (a) to (g), and it follows that if any significant rhanges are taking place in the experience—as, for example, if mortality rates are falling, with a consequent gradual increase in the duration of life—it becomes necessary to revise the valuation basis from time to time in order to give effect to the new conditions.

3. An exhaustive investigation was made into the past experience of the scheme by the late Su C. F. Hardy, K.C.B., in connection

with the valuation as at 31st March 1911, and the scheme being then relatively immature, the facts so obtained were supplemented by rorresponding data drawn from the operations of the older Pension Funds connected with the Indian services. (In the material thus collected a new valuation basis was roustructed, and with comparatively minor modifications this basis has subsequently been retained save in one particular. The exception is that of the assumptions made us to future retirements. The 1911 basis incorporated the assumption that, on average, retirement would take place at the age of 50, but the experience of the years 1918-23, showed that a large number of the subscribers continued to serve for varying periods after that age was passed, with the result that a considerable amount of contributions was received in excess of the previous expectation. For the valuation of 1923 the basis was accordingly altered to give effect to this feature. The change was, however, tentative and limited, some unrertninty being felt as to whether the observed prolongation of servire was partially due to conditions set up by the Great War, and consequently as to the extent to which it would be repeated in the experience of the future. Reference may also be made to one other feature of the experience in the years 1918-23, namely, the mortality rates among subscribers, active and retired. It was pointed out in the last Report that in this period the deaths had been about 80 per rent. of the expertation, but it was explained that in the previous quimmennium the exand it was thought inadvisable, therefore, to assume that the prolongation of life shown by the most recent experience had become a permanent feature.

4. As the first step in the work of valuation as at 31st March 1928, a rorresponding investigation to those previously made was undertaken and the experience of the scheme in the five years 1923-28 was compared, in each particular, with the "expectation" resulting from the valuation basis previously used. The results were necessarily obtained with reference to age, but their general trend will be sufficiently seen by the following summary. The figures herein given relate only to Europeans. The Asiatic subscribers and their families constitute a small class, and one which is not recruited by new admissions. Abnormalities in the experience of this class, so far as such exist, are not therefore of importance in the present connection.

Subscribors				247	183

The figures last given do not include the retirements under the Regulations as to Premature Retirement on Proportionnte Pension. These retirements are of a special character, and special financial arrangements are made in respect of them.

5. It will be seen from this statement that the decline in the mortality rate of subscribers which was noted in connection with the last valuation has continued and has indeed been accentuated. It appears now to be established that the personnel of the Indian Civil Service shares to the full in the prolongation of life which characterises British vital statistics, both national and sectional, at the present time. The experience in respect of wives of subscribers shows the same general feature, as does also that in respect of sons and The experience in regard to widows is at present very limited, and the fact that among this class the deaths have been equal to the expectation is probably not significant. Taking all women over the age of 20 as a single class, the actual number of deaths was 24 against an "expectation" of 41.

On these facts it is evident that a general revision of the valuation basis in respect of the element of mortality should not be further postponed. New rates have accordingly been constructed, these being equivalent to 70-75 per cent, of the pre-1911 rates up to age 60, thereafter moving by regular progression towards the rates of the Government Annaitants Experience, 1900-20, Male and Female, respectively, into which they are assumed to fall at about the age of 75.

6. It should be said of the rates thus adopted that they do not fully express the fall in mortality which has taken place in the five years 1923-28. The number of lives "at risk" has been relatively small, and to some extent the experience of this quinquennium may have been abnormal. It has been deemed advisable in the circumstances to use mortality rates which approximate to the experience of the 10 years 1918-28.

Another point should be mentioned in this connection. It will be seen from the summary given in paragraph 4 that the difference between the "expected" and actual deaths has been much more pronounced among the married subscribers than among the unmarried. Observations in other directions support the belief that the rate of mortality for a common age is less among married than among unmarried men, but the extent of the divergence is, normally, much

less than the difference in the present case would suggest, and it is considered that to some extent the latter is an accidental attribute of paucity of numbers. As in previous valuntions, it has been deemed advisable, therefore, to assume that married and anmarried subscribers will be subject to the same mortality rates.

- 7. The figures given as to "expected" and actual marriages suggest that the previous basis remains valid. These figures are, however, totals only, and analysis with reference to age indicates that an increased "rate of marriage" among subscribers of the ages 30-45 should be adopted. No material alteration of the previous basis in respect of the marriage of widows and daughters has been found necessary.
- 8. The number of births, both of sons and daughters, has been below that anticipated, and new "issue rates" have accordingly been prepared, on the experience of the 10 years 1918-28. It will be observed from the Summary that the births of sons continue to be slightly in excess of the hirths of daughters. This is a general feature of vital statistics, but it is not of sufficient importance to be recognised in the valuation, and following the course adopted on the last occasion the probabilities of the birth of a son or daughter have been assumed to be equal.
- The significance of the element of retirement from active service, so far as the scheme is concerned, arises from the fact that in this event the subscriber ceases to contribute. There is a striking difference between the experience, in regard to retirements, of the two last quinquennial periods. The numbers of subscribers remaining in service to the higher ages is rapidly increasing, and to this is mainly due the fact that the average age at retirement has increased from 497 years in the period 1918-23 to 53.6 years in the latest period. The change has had an important effect on the finance of the scheme during the hast five years, and the result of a continuance of the resent experience must be still more pronounced. The position may conveniently be explained by reference, separately, to the retirements on grounds of health and to those attributable to length of service. Retirement on the first of these grounds (which may normally be taken to include all cases arising under the age of 48) is not an element of great weight, but it is remarkable that only three such retirements were recorded against an "expectation," based on the actual experience of the years 1918-23, of 26. It must be assumed that the Premature Retirement Rules have had a marked influence on the number of cases in which the officer's state of health is advanced as the reason for his retirement. It would appear unreasonable to assume that such an abnormal experience as that of the last five years would continue, whatever the cause to which it may be attributable, and in respect therefore of the contingency of retirement through ill-health the previous hasis has been retained.

As regards retirements on the ground of length of service, say, from age 48 apwards, it was seen in connection with the last valuation that the assumption previously made, that

on average all contributors would retire at the age of 50, would not continue to be ralid, and certain " rates of retirement," cautiously estimuted in the circumstances explained in the report, were adopted and incorporated in the valuation basis. The latest experience shows that the range of ages at which these retirements take place is steadily widening, and that the rates previously adopted have not been reached. It appears to follow from these facts that a further advance in the aggregate of the contributions likely, to be received from subscribers who have carned the right to retire from service may properly be assumed. The rates of retirement assumed in the last valuntion have accordingly been reduced at ages 48-58, on the basis of the experience of the last five years, a suitable margin against contingencies being, however, retained. All officers remaining so long in service have been assumed to retire at the age of 59.

- 10. An abstract of the rates of mortality, etc., entering into the new valuation basis is given in Schedule A appended.
- 11. The rate of interest assumed in the valuation is, as before, 4 per cent. per annum. The rate actually credited in each of the five years terminating on the valuation date was 5½ per cent., but it is understood that this rate has now been reduced to 5 per cent.

The valuation assumption is that of a permanent rate extending over the whole period to elapse until the death of the last survivor of the beneficiaries under the undertakings of the scheme to present contributors. It is possible that this period may cover a century, and it is essential therefore that a cautious assumption should continue to be made in respect of this element.

12. A statement showing the numbers of subscribers (active and retired) and of incumbent and contingent beneficiaries on 1st April 1923, and of the subscquent changes up to 31st March 1928, is given in Schedule B appended. The numbers in the various categories on the latter date were as follows:—

1	European.	Asiatic.
	678	82

13. The Consolidated Account of Receipts and Expenditure during the five years ending 31st March 1928 shows that the receipts from contributions and donations amounted to £430,760. In the previous quinquennial period the corresponding receipts reached the sum of £459,780. Annuities paid from the

Fund amounted in the last five years to £321,578, the corresponding item in the previous period being £188,315. This considerable increase in the charges on the Fund is mainly due to the increase in pensions which took effect on 1st January 1925, but a further portion of it is attributable to the continuous growth in the number of incumbent beneficiaries. The balance at the credit of the scheme on 31st March 1928 was £3,285,153. In addition to this sum I estimate that there was due from the Government at that date under the Premature Retirement Rules the sum of £14,996. I have included this amount as an asset of the Fund in the valuation.

- 14. The pensions for which the Fund is now responsible are the original pensions payable from the fund with (a) a permanent addition of 20 per cent, of the full pensions (inclusive of the portion paid by trovernment), and (b) a temporary addition, to 31st December 1929, of a further 30 per cent, of the full pensions. These benefits are modified in the case of members who have elected to take either Option A or B on retirement from the service under the Premature Retirement Rules.
- 15. The contributions now payable are the original rates in the case of entrants between 1st April 1916 and 31st July 1925, later entrants paying an increase of 12½ per cent. Entrants between 1st April 1908 and 31st March 1916 receive an abatement of 6¼ per cent, on the original rates, and entrants before 1st April 1908 an abatement of 12½ per cent. These adjustments, which in the valuation are taken as permanent, do not affect the "donations," which are all payable at the original rates.
- 16. The result of the valuation, as shown by the Valuation Balance Sheet (Schedule C annexed), is a surplus of assets over liabilities of £698,995. Since practically all the surplus brought out by the last valuation was appropriated to increase of benefits and reduction of contributions, the whole of the present surplus is due to two factors, (i) the profits on the working of the scheme during the five years ending on the valuation dute, and (ii) the reduction in the reserves resulting from the changes made in the basis of valuation.

The largest item under (i) is represented by interest received in excess of the equivalent of 4 per cent. per annum. The surplus attributable to this factor is £240,000. The low death rate which has prevailed among subscribers, and especially among married subscribers, accounts (after allowing for the financial strain attributable to low mortality among wives) for a further sum approaching £200,000, and contribution receipts in excess of the "expectation," attributable to the low retirement rate which has prevailed among the older subscribers, represents nearly £90,000. To these amounts sundry small items have to be added, bringing up the profits on the working of the last five years to about £550,000. The halance of the surplus, substantially £150,000, is attributable to the factor (ii) mentioned above—the reduction in the net liability of the Fund arising from the changes made in the valuation basis.

- 17. It is evident from the result shown by the valuation that the Fund is in a position to permit of further advancement upon the lines adopted after the lust valuation in respect of the stabilisation of pension increases and of reduction of contributions. As regards the former, I recommend that the stabilised part of the present addition of 50 per cent. to the full basic pension be increased from 20 per cent. to 33\frac{1}{2} per cent., and that the balance of 16\frac{2}{3} per cent. be continued on a temporary basis for a further five years ending on 31st December 1934. The value of these extensions is £467,000.
- 18. In regard to the balance of the surplus. which; in accordance with precedent, would be applied to a further reduction of the subscriptions, I think it necessary, in the interest of equity as between the members, to place before you for consideration the fact that the increasing age of the scheme is now bringing into prominence a feature which can hardly have been anticipated when, as a result of the valuation made as at 31st March 1911, subscribers were relieved of the payment of sub-scriptions after retirement. On the relatively few facts then available as to membership at the higher ages there was evidently no reason to suppose that, in general, retirement would be deferred much beyond the completion of the normal term of service. In such cir-cumstances, the continuation of subscriptions for perhaps a year or two in the case of the few subscribers who might not retire at the corliest opportunity would not be regarded as a serious inequity and would be substantially balanced by the concession to all subscribers of the right to terminate their payments in the eventuality of premuture retirement from service through breakdown in health. Presumably this was the view taken when the cessation of contributions on retirement was recommended. In its actual operation the element of retirement is working otherwise. In paragraph 9 above reference is made to the wide range in the ages of those now retiring on the ground of length of service, and us a corollary to this, to the substantial number of subscribers who have remained in the service for prolonged periods when qualified to retire. Since the continuance of contributions by such subscribers does not carry the right to any increase in the benefits to which their dependants are entitled, this class of subscribers is placed at a distinct disadvantage in comparison with their colleagues who elect to retire when entitled to do so, or very soon thereafter. This inequality would be removed if the payment of subscriptions were limited to 25 years from entry into service, combined, of course, with the existing provision that subscriptions should cease on earlier retirement on account of ill-health. The cost of an ulteration of the Rules to this effect, if applied immediately to all present subscribers, would, however, he so considerable as to require the postponement of any further reduction of the rates of subscription. Such a result would evidently create new inequalities, and having regard to the prospect that surplus will continue to accrue in substantial amount, it is thought sufficient to provide on the present occasion for the cessation of the subscriptions,

- on completion of 25 years' service, of those subscribers who were in Class I on 31st March 1928.
- 19. I recommend a further and permanent reduction, at the rates set out in paragraph 26, in the subscriptions of members of the fund on the valuation date. Subject to the recommendation in the subscription paragraph, the rates of subscription payable by new entrants should remain on the existing scale, being the original rates with an addition of 12½ per cent.
- The above recommendation as to the discontinuance of contributions in certain cases during service ruises a somewhat difficult question as to the donations payable by subscribers who subsequently marry. Since 1914 retired members have been freed from subscriptions and on subsequent marriage have been granted the option (subject to the production of evidence of good health) to secure pensions for their wives by the payment of donations on a higher scale than is applied to subscribers who marry during service. A corresponding option is granted in respect of children of such marringes; the donations payable in this event are very substantial and contrast sharply with the maximum amounts which can be paid in subscriptions in respect of children by officers who marry during service but comparatively late in life, say after the age of 40, and the number of whom is not insignificant. It is not surprising in the circumstances that the option to insure the children of marriages which have taken place after the retirement of the subscriber would of marriages appear to have been infrequently exercised. The voluation foll contains the names of 16 such subscribers, but donations have been paid since 1914 in respect of eight children only. The charge evidently tends to be prohibitive. and to this extent, although the cases affected are relatively few, the scheme fails to afford the protection to the dependants of subscribers which it was designed to give. I am led, therefore, to recommend that the payment of special donations for children should be discontinued and that the contingency of claims in respect of children be treated as covered by the donations paid on marriage. It would follow, presumably, that the children's donations already paid would be returned, subject to the adjustment recommended in the next paragraph, and that all children born to existing retired subscribers who have paid the marriage donation should be admitted to benefit (subject to the same adjustment) whether or not the birth of such children has been reported and the relevant donations paid.
- 21. It is obviously necessary to continue to discriminate between the marriage donation payable by a subscribing member, whose subscription will be raised to the married rate, and that payable by a member, whether active or retired, who has ceased to subscribe and from whom no additional monthly contributions cun be obtained after his marriage. I am not, however, satisfied that the application to the latter class of the present Seventh Schedule to the Rules would sufficiently meet the needs of the case on the donations chargeable in respect of children being abolished, and after due consideration of the relevant points I make the further recommendation that the Seventb

Schedule be abrogated, and in lieu thereof the donation phyable on marriage after contributions have ceased should be the sums prescribed for the appropriate age in the Third and Fourth Schedules with an addition of £200. The effect in the case of such a subscriber marrying at, say, the age of 50 would be to increase the marriage donation by £80, while releasing bim from all liability for donations on the birth of children of the univiage. As regards existing members who have married after retirement and bave paid marriage donations and children's donations, the suggested refund in respect of the latter payments should be so computed as to produce to the Fund the same result as if this arrangement had been in force at the time when the marriage was contracted. Similarly in cases where the marriage donation was paid but births of children were not reported, the admission to benefit right of any children of the murriage should be made conditional upon the payment by the member of any further sum required to bring up the marriage donation paid to £200 in excess of the corresponding donation in the Third Schedule.

22. I am of opinion that members who have ceased to contribute by reason of having served 25 years but are still in service, should be required to pay the donations on the new basis, and not be granted the option applicable to retired subscribers. It would be sufficient if the initial payment in respect of the additional donation of £200 were limited in these cases to the contributions remitted since completion of 25 years' service (should the sum of these be less than £200), the balance being made up by the temporary resumption of subscriptions, payable at the married rate.

There remains for consideration the case of the member who marries shortly before attaining 25 years of service. If it should be found possible to continue the system, which it is suggested should be inaughrated, of releasing subscribers from further contribu-tions after completing 25 years, the subscriber in this case, who would have paid donations on the basis of the Third Schedule, might be at a marked advantage in comparison with a member whose marriage took place shortly after attaining this period of service. To avoid this inequality I recommend a provision whereby the release from contributions should be conditionally as the substitute of the conditional ways. be conditional upon the subscriber making up to £200 the extra contributions which his marriage had attracted—that is to say, sum of the difference between the contributions at the married and unmarried rates plus ony contributions paid in respect of children of the marriage. It would be sufficient if any balance due from him under this arrangement were payable by way of continuance of his subscriptions until the amount had been made up. I do not think it necessary to bring the element of interest into this adjustment or into that suggested in the previous paragraph.

- It is impossible to place an exact value upon the concessions to existing members re-commended in the immediately preceding paragraphs, but it cannot, I think, exceed £20,000.
- My attention has been drawn to the possibility that occasional bardship may result from the termination at the age of 24 of the

pension of a son who by reason of physical or mental infirmity is not, and has never been. capulle of earning a livelihood, and from the cognate case of the non-provision of a pension for a son who, though over the age of 24 nt the time of the subscriber's death, has been unable, for the whole period since that age was attnined, to maintain himself in cousequence of the like infirmity. Cases of this kind are obviously rare, and the risk may be regarded as so remote as hardly to justify addition to the existing scale of contributions. The hardship to the family concerned is nevertheless serious in such cases as do arise, and the liability to continue or to grant a pension, subject to adequate evidence as to the facts, is one which I think the Fund might properly assume. Somewhat similar arrangements (in one case on a contributory basis) are in force in the older Funds, and on the data drawn from these sources I estimate that the value of the liability would be in the region of £10,000.

26. The following statement contains the complete series of the measures which I submit for consideration. It will be seen that these absorb practically the whole of the surplus, but in view of the substantial difference between the present interest receipts and those required by the valuation basis, and of the other murgins to which I have referred in earlier paragraphs, I am not disposed to regard this fact as creating any obstacle to the adop-tion of the proposals. The estimates of cost assume that the scheme will come into operation on 1st January 1930.

27. I have been impressed, in the course of my investigation, by the desirability of reconsidering the rates of subscription and the dona-tions in respect of future entrants into the Service. The subject is one of great complexity, and in view of the present sufficiency of the subscriptions and donations (taken as an aggregate for all entrants) an immediate decision in regard to it is not essential. But there is little doubt that however suitable the present rates may have been to the circumstances existing when the scheme was estalilished, the gradual changes in mortality and other directions, combined with the abolition of subscriptions on retirement, have set up conditions which call for their review, a necessity which will be emphasised if the suggestion made above as to the termination of subscriptions after 25 years should be accepted, and the like concession be incorporated in measures to be adopted for the distribution of surplus which may accrue in the

future. I recommend, therefore, that instructions be given for the actuarial examination of this question. It should be understood that this recommendation applies only to the payments of entrants into the Service after a date to be fixed when new rates have been formulated. As I have said, the present payments taken in the aggregate are sufficient for incoming members, but they are no more than sufficient, and it would be financially impossible to grant may option to subscribers on the hooks when the new conditions came into force which would have the effect of diminishing the income of the Fund.

I am, Sir,
Your obedient Servant,
ALFRED W. WATSON.

"67A. In computing the period of limitation prescribed for an appeal under this Act or for an application under section 66, the day on which the order complained of was made, and the time requisite for obtaining a copy of such order, shall be excluded."

#### STATEMENT OF OBJECTS AND REASONS.

This Bill is designed to bring together a number of minor amendments relating mostly to points of machinery and administration and not designed to affect the incidence of taxation except by granting relief in two cases of hardship, neither of which is of major importance in practice (see clauses 2 and 10). Detailed explanations are as set forth below:—

Clause 2.—This remedies a defect in the Act and expressly provides for the relief from double taxation of a member of an association of individuals other than a firm or company or Hindu undivided family.

Clause 3.—This is a drafting amendment intended to set right a mistake in drafting the original section, as a consequence of which it had become largely inoperative.

Clause 4.—This is also a drafting amendment intended to amplify the section and make its provisions quite clear and complete.

Clause 5.—This is necessitated by a ruling of the Calcutta High Court to the effect that, in the absence of any reference to section 196 of the Indian Penal Code in section 37 of the Indian Income-tax Act, no prosecution may be launched under section 196 of the Indian Penal Code in respect of false evidence used in Income-tax proceedings.

Clause 6.—Arrears of income-tax can be recovered under section 46 as arrears of land-revenue. But in at least two provinces the Acts relating to the recovery of arrears of land-revenue do not permit the attachment of debts for the purpose of recovering the arrears. It is proposed, therefore, to restore to the Incometax Officer the power which he possessed under the Act of 1886. If found necessary, executive instructions will be issued that the power proposed to be given shall be exercised by the Income-tax Officer only in those provinces in which it is not permissible, under the law relating to the recovery of arrears of land-revenue, to attach debts.

Clause 7.—The clause is intended to provide for the grant of refunds under section 48 through the High Commissioner in the United

Kingdom. This means reversion to the practice which was discontinued in 1926. Complaints have been received of inconvenience to residents in the United Kingdom who have to apply for relief.

Clause S.—The object of sub-clause (a) is to regularise a concession now given by executive orders. The object of sub-clause (b) is to provide for cases of hardship which sometimes occur.

Clause 9.—Proviso (a) to section 54, as it stands at present, might have the effect of seriously hampering or defeating a prosecution by the Crown in respect, for instance, of falsified accounts or stolen documents. It also prevents the Income-tax Department from prosecuting offences under sections 182 and 196 of the Indian Penal Code. So long as the restriction is imposed that the prosecution under the Indian Penal Code can only be in respect of the statements, returns, accounts, documents, evidence, affidavits or depositions referred to in section 54 of the Income-tax Act, there is no reason why the prosecution should be limited to section 193 of the Indian Penal Code only, as at present.

Clause 10.—This is intended to provide for cases of hardship which occur occasionally.

Clause 11.—The object of this clause is to prohibit the appearance in Income-tax proceedings of certain undesirable persons who, calling themselves Income-tax experts, impose on assessees.

Clause 12.—The period of one month is being extended because it has been found in practice to be insufficient.

Clause 13.—This amendment is being made in accordance with a promise given in the Assembly.

The following Bill was introduced in the Council of State on the 16th September, 1929:—

C. of S. Bill No. 7 of 1929.

A Bill further to amend the Provident Funds Act, 1925, for certain purposes.

WHEREAS it is expedient further to amend the Provident Funds Act, XIX of 1925, for the purposes hereinafter appearing; It is hereby enacted as 1925. follows:—

Short title.

1. This Act may be called the Provident Funds (Amendment) Act, 1929.

Amendment of section 2, Act XIX of 1925.

- 2. In section 2 of the Provident Funds, Act, 1925 (hereinafter XIX of referred to as the said Act),—
  - (a) in clause (a)—
    - (i) after the words "life insurance," the words "or the payment of subscriptions or premia in respect of a family pension fund," shall be inserted; and
    - (ii) the words "credited in respect of any such subscription or deposit" shall be omitted;
  - (b) in clause (b), for the words "or otherwise in respect of a subscription to, or deposit in," the words "a subscription to, or deposit or balance at the credit of an individual account in," shall be substituted; and
  - (c) in clause (c), the words "credited in respect of such subscriptions or deposits" shall be omitted.

Amendment of section 8, Act XIX of 1925.

- 3. Section 8 of the said Act shall be numbered as sub-section (1) of section 8 and the following sub-sections shall be added, namely:—
  - "(2) The Governor General in Council may, by natification in the Gazette of India, direct that the provisions of this Act shall apply to any Provident Fund established for the benefit of the employees of any of the institutions specified in the Schedule, ar of any group of such institutions, and, on the making of such declaration, this Act shall apply accordingly, as if such Provident Fund were a Government Provident Fund and the authority having custody of the Fund were the Government:
  - Provided that section 6 shall apply as if the authority making the contributions referred to in that section were the Government.
  - (3) The Governor General in Council may, by notification in the Gazette of India add to the Schedule the name of any public institution he may deem fit, and any such addition shall take effect as if it had been made by this Act."
  - The following Schedule shall be added to the said Act, numely:-

Addition of Schedule to Act XIX of 1925.

#### ----

# "THE SCHEDULE. LIST OF INSTITUTIONS.

#### [See sub-section (2) of section 8.]

- . The Pasteur Institute of India, Kasauli.
- 2. The Calcutta Improvement Trihunal.
- 3. A Court of Wards.
- 4. The Indian Central Cotton Committee.
- 5. The Trustees for the European Hospital for mental diseases at Ranchi.
- 6. The National Association for supplying female medical aid by women to the women of India."

### STATEMENT OF OBJECTS AND REASONS.

The Bill is designed-

- (1) to legalise withdrawnls from a provident fund for the payment of subscriptions or predict to a family pension fund. The Act already provides that withdrawals may be unde for the payment of premia on policies of life insurance, and this extension of the same principle is considered both desirable and logical;
- (2) to delete from the definitions of "compulsory deposit", "contribution" and "Provident Fund" words which have recently been interpreted to mean that contributions in a contributory provident fund should bear some relation to the subscriber's subscriptions apart from that of being an addition to thene: that, for instance, they should be credited at the same time as subscriptions or bear a particular proportion to them. No justification is found for such a restriction, and it is considered expedient to remove it;

(3) to extend to the provident funds of public institutions whose activities are closely connected with those of Government, provided inter alia that Government are definitely in a position of exercise a necessary measure of control, the heacfit of heing capable of being brought under the protection of the Act. It is considered that the employees of such institutions have an equitable claim to be placed on the same footing as employees of municipalities and the like whose provident funds already enjoy this henefit under section 8 of the Act.

#### DEPARTMENT OF AGRICULTURE, BENGAL.

#### Final Forecast of the Jute Crop of Bengal, 1929.

[NOTE.—On an average of the five years ending 1927-28, the area under jute in Bengal, to which this forecast relates, represents some 88:1 per cent. of the total area under jute in British India.]

Season.—In the preliminary forecast the weather was reviewed up to June as having been favourable on the whole. The period covered by this forecast is that of the harvest, during which operations were carried on favourably except in parts of North and West Bengal, where lack of sufficient water was felt for retting operation. This difficulty was partially removed by rainfall in September.

Condition of the crop.—In East Bengal the crop outturn is fair, except in Mymensingh and Tippera, where damage has been caused by floods. For the same reason, quality is reported to be rather deteriorated, owing to premature harvesting. Elsewhere, the outturn may be described as quite satisfactory.

Area of the crop.—The area under jute is 2,946,705 acres against 2,702,300 acres of last year.

Outturn.—As in previous years, the percentage figures are calculated on the basis of divisional normals, which remain as follows:—

	•	Bales per acre.
Dacca and Chittagong Divisions		3.7
Rajshahi Division		3.5
Presidency and Burdwan Divisions		3.2

The total outturn of the crop is estimated at 8,729,570 bales as against 8,589,000 bales last year, an increase of 140,570 bales.

# DEPARTMENT OF AGRICULTURE, BIHAR AND ORISSA.

#### Final Forecast of the Jute Crop of Bihar and Orissa, 1929.

[NOTE.—On an average of the five years ending 1927-28, the area under jute, to which the Bihar. and Orissa forecast relates, represents about 8.0 per cent. of the total area under jute in British Indja.]

Acreage.—The final district returns of the seven jute-growing districts of the province show an area under jute of 195,700 acres. But these estimates have proved to be very much low, and I have no reason to alter the estimate made in the preliminary forecast, viz., 231,400 acres. Last year's estimate of the area under the crop was 247,000 acres.

Weather conditions.—In March light showers fell in the jute districts. The fall was normal in Bhagalpur and above the normal in Champaran, the Santal Parganas and Balasore and below the normal in the remaining three jute districts. In April the rainfall was below the normal in Purnea, Cuttack and also in Champaran and Balasore, but above the normal in the remaining three jute districts. In May the rainfall was below the normal everywhere, except in Champaran and the Santal Parganas, where it was above the normal. In June rain fell in all the jute districts; the fall was above the normal in Champaran and Muzaffarpur and below the normal in other districts. In July the rainfall was above the normal in Bhagalpur, Cuttack and Balasore, but below the normal in Purnea, Champaran, Muzaffarpur and the Santal Parganas. In August the rainfall was heavy in Cuttack and Balasore and below the normal in Purnea and other remaining four districts. The weather conditions are reported to have, not been favourable in the most important jute district of Purnea and fair in the remaining districts. Some damage was, however, done to the crop by high floods in parts of Cnttack.

Outturn.—In the important jute districts of Purnea and Cuttack, the outturn of the crop has been estimated at 70 and 90 per cent. of the normal respectively. Champaran reports a normal crop, i.e., 100 per cent. Muzaffarpur. Bhagalpur, the Sautal Parganas and Balasore report 75, 82, 74 and 80 per cent. respectively.

On the basis of the area and percentage outturn reported by the District Officers, the average condition of this year's crop for the province, weighted for area, comes to 73 per cent. against 72 per cent. last year. Recent enquiries about the normal outturn per acre show that the normal outturn per acre is  $3\frac{1}{3}$  bales as compared to  $3\frac{1}{4}$  bales per acre, the figure adopted tast year, and on this basis the gross outturn on 231,400 acres estimated to be under jute in this province comes to 563,100 bales. This estimate is, however, raised to 675,000 bales. Last year's estimate of the crop was 693,000 bales.

The import of jute from Nepal estimated at 50,000 bales brings the total of the province to 725,000 bales.

## DEPARTMENT OF AGRICULTURE, ASSAM.

#### Final Forecast of the Jute Crop of Assam, 1929.

[NOTE.—On the average of the five years ending 1927-28, the area under jute in Assam represents
4-7 per cent. of the total area under jute in British India.]

Season.—The season was generally exceptionally unsatisfactory on account of heavy rains and high floods. The occasional heavy rainfall during the cultivation and growth of the crop hampered and delayed sowing greatly, rendered weeding difficult and affected the condition of the crop to a considerable extent. Floods have been reported to have damaged the crop in all districts, especially in the Snrma Valley and the low-lying parts of the Nowgong district. On the whole, the prospects of the crop are very bad this year.

Area.—As estimated by the Deputy Commissioners, the area under jute is 138,500 acres against the last year's actual of 195,100 acres and this year's preliminary forecast area of 185,600 acres. The decrease in area as compared with last year is due to the unfavourable weather as stated above, and that as compared with the preliminary forecast is due to revision of figures in almost all districts.

Outturn.—The outturn has been estimated to be 65 per cent. of the normal per acre against 91 per cent. of last year. Taking 3-5 bales of 400 lbs. of jute fibre as the normal yield per acre, the total produce of the crop in this province this year comes to 312,700 bales against 624,200 bales (revised) of last year, or a decrease of 50 per cent.

movements.—Tem-5. Temperance perance organisations in Calcutta. Calcutta Temper the specially continued their ance Federation, activities as before. There was no serious attempt anywhere else to tackle There is a temperance the question. association in Dacca and the Christian missions in Darjeeling have also tried to further the cause of temperance. Preachers of Hindu missions which have spring up recently in Bengal have made desultory attempts in Mymensingh and Dinajpur in their endeavours to convert members of the aboriginal tribes in these districts to wean them off from their intemperate habits. All these movements, however, were more or less sporadic in their character and have resulted in no permanent improvement.

It is interesting to note that there was an organised attempt on the part of the Santals in Midnapore to boycott pachwai shops. It was not so much a temperance campaign as an attempt to turn out the suri vendors of these shops. It subsided when the shops were settled with Santals. In the meantime, however, it had spread over to the neighbouring district of Bankura and assumed a more dangerous character. Santals here began distilling and brewing liquor in fields or jungles close to their huts and wanted to assert that they had a right to manufacture liquor themselves without payment of any duty to Government. An Inspector with a special staff of petty officers and peons had to be deputed to Bankura to stop these illicit practices. These measures were successful in bringing the Santals to their senses and the movement died a natural death by the end of the year.

Excise Licensing Boards.—The Calcutto Licensing Board held no meetings during the year under report. This Board, constituted under Government Resolution No. 6217 Ex., dated the 25th November 1927, was dissolved by Government Resolution No. 631 T.A.I. dated the 19th October 1928, published on page 1379 of the Supplement to the Calcutta Gazette of the 1st November 1928. Under the orders of Government conveyed in the Resolution above no new licenses were issued during the year of report. The Calcutta Licensing. Board has, however, been reconstituted with effect from the 1st May 1929, vide Notification No. 63 T.A.I., dated the 19th April 1929,

published on pages 761-762, Part I of the Calcutta Gazette of the 25th idem. The orders of the Calcutta Licensing Board, recorded in the last Administration Report, were given effect to except in the following case:—

The foreign liquor public "off" shop at No. 126, Lower. Circular Road:—This shop was ordered by the Board to be abolished from the 1st April 1928. It was subsequently restored by the orders of the Local Government.

The Licensing Boards for the Mnnicipalities of Howrah and Bally held two meetings each during the year.

The Howrah Board considered and rejected objections made against one tari and two country spirit shops and rejected applications for a new restantant and a new foreign liquor public "off" license.

The Bully Board rejected an objection against a country spirit shop and an application for a new foreign liquor public " off" license at Bally.

The Sadar Licensing Board of the 24-Paryonas district held two meetings. The sites of 2 country spirit, 5 ganja, 2 bhang, 5 opinm and 4 tari shops were changed on the recommendation of the Board.

The Barrackpore Licensing Board held two meetings. The sites of 1 country spirit, 1 foreign liquor, 2 ganja, 1 bhang, 1 tari and 2 opinm shops were changed on the recommendation of the Board.

The Dacca Licensing Board held two meetings. On the recommendation of the Board one ganja shop was abolished.

The Rangpur Livensing Bourd held two meetings. On the recommendation of the Board, 1 country spirit, 1 tari, 2 ganja, 1 bhang and 2 opinm shops were abolished and the site of 1 country spirit shop was changed.

The Chittagony Licensing Board held three meetings. On the recommendation of the Board, 2 tari and 2 pachwai shops were abolished, and the sites of 1 country spirit, 1 tari and 1 pachwai shop were changed. The Board rejected the proposals for the grant of two bar licenses to two Cinema theatres in the town of Chittagong on abstract temperance grounds though the applications had been endorsed by practically

all the leading Europeans and Anglo-Indian residents of the town for whose convenience the licenses were proposed to be issued. These two bar licenses were, therefore, granted provisionally for three months and the members of the Board were invited to report on the working of the licenses.

The Mojussil Licensing Boards have been generally alive to their responsibilities and have taken great interest in the question of sites and of abolition of shops.

• 7. Excise Advisory Committees.—
In areas other than those mentioned in paragraph 6 above, the local Excise Advisory Committees advised the Collectors as regards the number and location of excise and opinm shops. All their recommendations were carefully considered and most of them were accepted.

In accordance with their recommendations, 1 bhang, 1 opinm, 1 tari, 2 country spirit and 10 pachwai shops were abolished, the sites of 1 foreign liquor, 3 opium, 5 pachwai, 7 tari, 9 ganja and 18 country spirit shops were changed and 1 pachwai, 1 tari, 1 ganja, 3 bhang, 3 country spirit and 6 opium shops were newly opened, with effect from the 1st April 1929.

Excluding the cost price of opium, which is being included both in the

revenue and expenditure of the Department from 1925-26, the figures for 1925-26, 1926-27, 1927-28 and 1928-29 are as follow:—

The increase in revenue was mainly due to (i) revision of country spirit license fees, (ii) increase in the rate of duty on ganja and (iii) increase in the rate of duty on charas. There was also an increase in the realization of duty on medicinal spirits,

- 9. Actual receipts.—Deducting the advance collections (Rs. 1,43,188) for 1929-30 and adding the revenue (Rs. 1,54,838) which was collected in advance in 1927-28, the actual receipts on account of 1928-29 were Rs. 2.25.72,690 against Rs. 2.24.39,352 (after similar adjustment) of the preceding year
- 10. Excise charges \* \* \*.—The total expenditure of the Excise and Salt Department excluding the cost price of opium payable to the Government of India, was Rs. 15,93,875 during the year, against Rs. 15,21,327 during 1927-28.
- \*\* \* \* . The largest increase of revenue (Rs. 2,72,691) occurred under "Total receipts from hemp drngs." "License fees for sale of distillery spirits" came next with an increase of Rs. 1,84,894 followed by "Receipts from commercial spirits including denatured spirits and medicated wines" (Rs. 21,181). The largest decrease (Rs. 1,49,255) occurred under the head "Duty on distillery spirits" followed by a decrease of Rs. 80,511 from "Pachwai" and

Rs. 57,321 from "Duty on wines and spirits manufactured in India and The reasons classed as foreign liquors." for these variations have been given in the appropriate sections on these heads of revenue.

Demand and collection \* \* \* .-12. Of the gross demand of Rs. 2,26,00,417 a sum of Rs. 2,25,61,040 or 99.8 per cent, was realized, Rs. 17,711 was remitted as irrecoverable. The incidence of excise revenue per head of population was 7 annas 8 pies as in the previous vear.

#### SECTION II—Country Liquor.

#### Country Spirit.

- System of supply and sale.— There were no changes in the system of supply and sale.
- Retail licenses.—The number of licenses for the sale of country spirit was 927 against 931 in 1927-28, showing a decrease of 4 licenses.
- Consumption.—The total consumption of country spirit in the Presidency amounted to 583,804 London proof gallons as compared with 591,935 London proof gallons in the preceding year showing a decrease of 8,131 London proof gallons. Consumption increased in 13 districts and decreased in 14 districts. The decrease in the districts of Marshidabad (1,431 London proof gallous or 15.7 per cent.), Jessore (646 London proof gallons or 14.03 per cent.). Birbhum (614 London proof gallons or 13.6 per cent.), Burdwan (4,082 London proof gallons or 10.5 per cent.), Bankura (1,900 London proof gallons or 9.7 per cent.) and Nadia (970 London proof gallons or 9.1 per cent.) was due to bad economic condition of the consumers owing to the failure of winter crops in the previous year. In Burdwan the general depression of the coal trade and in Bankura the anti-drink movement amongst the Santals referred to paragraph 5 of the report also contributed to the decrease.

There was increase in consumption in the districts of Noakhali (101 London proof gallons or 15.4 per cent.), Midnapore (2,799 London proof gallons or 7.9 per cent.), Mymensingh (1,548 Loudon proof gallons or 6.7 per cent.) and Malda (573 London proof gallons

or 6.7 per cent.). In the district of Noakhali the increase was due to the construction of a railway line from Fenj to Belonia. The increase in Midnapore was due to the successful detection of some illicit distillation cases in the jungle area. The influx of up-country labourers, railway and other settlers from up-country accounts for the increase in Mymensingh while better outturn of the mangoe and the paddy crops is said to be the reason for the increased consumption in Malda.

The question of consumption of country spirit among factory workers has been very recently examined by me. From the figures of consumption of country spirit in the industrial areas in the district of the 24-Parganas, Hooghly and Howrah, it appears that there has been a marked decrease in consumption amongst factory workers from 1921-22. This is probably due to the fact that the price of country spirit in the industrial areas in these districts was considerably increased in 1921-22. The figures, given below, are interesting

Statement showing the consumption of country spirit in the industrial areas of the districts of Hooghly, Howrah and the 24-Parganas.

17. Total revenue from country spirit.—The total revenue (license and distillery fees and duty) from country was Rs. 87,93,615 spirit against Rs. 87,58,135, showing an increase of Rs. 35,480. The revenue derived from duty and distillery fees decreased by Rs. 1,49,414 and that from license fees increased by Rs. 1,84,894. The decrease in duty is due to the decrease in consumption but in spite of the decrease in consumption the license fees and the

total revenue increased owing to the increase in the scale of license fees with effect from 1st April 1928.

18. Convictions for drunkenness and action taken against licensees for permitting it.\* \* \* \* .—In Calcutta 4,695 persons were convicted of drunkenness as compared with 4,226 persons in the previous year, but no statistics were taken to show what proportion of these cases was due to indulgence in country spirit, tari, and foreign liquor, res-The pectively. Commissioner Police, Calentta, is unable to assign special reason for crease. As regards Howrah and Bally, the Magistrate of Howrah reports that the increase was due to greater activity on the part of the local police. It is not possible to arrive at any conclusion from these figures about the increase or decrease of drunkeuness in municipal areas.

#### Tari.

- 20. **General.**—During the year under report licenses for the retail sale of fermented tari were settled by auction in the tree-tax as well as in the other areas of the Presidency.
- 21. The tree-tax system in Hooghly, Howrah, the 24-Parganas and Calcutta.—The system worked satisfactorily during the year under report.
- 22. Statistics.—The total receipts under the head "tari" decreased from Rs. 9.78,550 to Rs. 9.75,538. The number of retail licenses decreased from 519 to 509. The decrease is nominal and calls for no explanation. The total revenue from tari was Rs. 9.75,538, the greater portion of which, Rs. 9.36,615, was derived from the Burdwau and the Presidency Divisions and the district of Malda.

#### Pachwai.

23. Licenses.—The total number of licenses issued for "retail sale", "home-brew (annual)" and "manufacture of pachwai on special occasious" was 78.618 as compared with 61,027 in 1927-28.

This marked increase in the number of licenses permitting "home-brew" of pachwai was due to a bumper outturn of winter crop in the latter part of the year under report in the districts of Rajshahi, Dinajpur, Bogra and Malda. In Jalpaiguri in the tea-garden area these licenses had to be issued in greater numbers with the co-operation of the managers of the gardens to cope with the illicit manufacture and sale of liquor that were going on unchecked in these places.

- Revenue.—The revenue license fees from "retail vend shops" Rs. 11,50,854 decreased from The decrease Rs. 10,47,816. marked in Burdwan (59,499). Birbhum (25,287), Bankura (8.307), Midnapore (8,113) and Nadia (4,126) while there was an increase of Rs. 1,979 and 877 in Darjeeling and Murshidabad respectivedecrease in revenue The Burdwan, Birbhnm and Bankura was due to the causes explained in the case of country spirit in paragraph 16 of the report.
- 25. Consumption.—The consumption in the districts of Burdwan, Birbhum, Bankura, Midnapore, Hooghly and Morshidabad where the Bengal Fixed-fee system was in operation from previous years and accurate figures of consumption from the licensed shops were available, amounted to 205,213 maunds of rice against 226,133 manuals of rice during the previous year as detailed below:—

	Maunds	Maunds of rice,		
	1927-28.	1928-29.		
Burdwan	107,615	99,217		
Birbhum	64,131	55,787

Hooghly	12,645	12,072		
Murshidabad	8,778	7,055		
	226,133	205,213		

The fixed-fee system was introduced in the pachwai shops of the Nadia district from 1st June 1928 and the consumption in the district amounted to 2,309 mannds of dry rice for the period from 1st June to the end of the year.

Out of 1,176 licenses in the Presidency for the manufacture and vend of pachwai 968 worked under the fixed-fee system during the year.

27. Control over manufacture and sale of bakhar.—The number of licenses issued for the manufacture and sale of bakhar to licensed vendors of pachwai during the year was as follows:—

	Number of licenses issued.			
Distric1.	Manu- facture and sale of bakhar.	Salo of bakhar.		
Burdwan	. 6	8		
Birbhum	. 7	3		
Bankura		9		
Midnapore	86			
Hooghly				
Murshidabad				
Other districts				

The quality of bakhar used was improved by the elimination of undesirable and unskilful manufacturers as far as possible, and close supervision was exercised both over the manufacture and sale by the executive staff. The Superintendent of Excise, Birbhum, Mr. D. N. Mukherjee, continued his investigation on bakhar throughout the year and succeeded in preparing a standard bakhar. His bakhar was used in the manufacture of pachwai in some of the shops at Suri and a record was kept of the strengths found in the different seasons of the year. Out of 153 samples examined during the year, 136 were found to be above 6 per cent. proof and 17 between 5 to 6 per cent. No sample was found to be below 5 per cent. proof.

30. Free brew of pachwai on special festivals.—The concession of free brew of pachwai was permitted as in previous years to the aboriginal tribes in

Burdwan, Birbhum, Bankura and Midnapore during special festivals.

#### SECTION III—Foreign Liquor.

Besides the above 38.4 London proof gallons of rum were imported from the Dyer Distillery, Lucknow, by the Military authorities for the use of His Excellency the Governor's bodyguard stationed at Alipore at Rs. 10 per London proof gallon and 27.2 London proof gallons of rum were issued duty-free from the Russa Distillery to the Deputy Commissioner, Naga Hills. 1.3 London proof gallons of Asansol rum were issued duty-free to Messrs. Lyall Marshall & Co., for export to London as samples.

- 34. Manufacture of beer.—One brewing liceuse was issued during the year under report to the Victoria Brewery at Sonada which worked from the beginning of the year till the 10th October 1928, when it was closed down on account of financial difficulties. Five thousand six hundred and one gallous were sold to Military authorities and 1,246 gallons to liceused vendors within the province during the period the brewery was working.
- 35. Duty on Indian made potable foreign liquors and beer.—There was a further decrease in the duty on potable spirits and beer manufactured in India. It came down to Rs. 3,56,470 from Rs. 4,18,899 in 1927-28.

The following statement shows the gradual consistent downward tendency in the receipts from duty on Indian made foreign liquor from 1922-23:—

•	Ru.
1922-23	13,21,742
1923-24	9,97,876
1924-25	8,53,342
1925-26	7,53,882
1926-27	5,90,177
1927-28	4,18,899
1928-29	3,56,470

In 7 years the receipts have dwindled down from 13 lakhs to 3 lakhs and the province has lost a revenue of approximately 10 lakhs on these Indian-made liquors.

36. Licenses and fees.— The total number of licenses issued for "Trade" and "Public" vend was 1,481 against 1,610 in the preceding year. The decrease occurred under "Late closing" (99) and "Temporary Bars" (34), while increase occurred under "Hotels, etc." (1), Dining Car" (1) and "Canteen" (2).

The total receipts from license fees on foreign liquor licenses, levied under the Bengal fixed-fee system, were as follows:—

	Rs.
1924-25	3,05,907
1925-26	2,95,784
1926-27	3,09,946
1927-28	3,30,113
1928-29	3,24,824

The decrease in license fee in spite of the increase in consumption is due to the fact that  $1\frac{1}{2}$  months' advance fees were realized from the Calcutta foreign liquor licensees during 1927-28.

#### Medicated Wines.

37. Licenses and revenue.—The number of licenses for the retail sale of medicated wines was 214 against 222 in the preceding year. The revenue from license fees was Rs. 8,600 against Rs. 7,225 in the previous year showing an increase of Rs. 1,375. The increase was due to variations in realization of license fees in advance.

# II.—Industrial spirits (excluding denatured spirits).

- 38. Revenue.—The total revenue derived from rectified spirit and absolute alcohol used for medicinal, scientific or other industrial purposes in the Presidency was Rs. 5,40,623 against Rs. 5,22,413 in the previous year. \* \*
- 39. Issue of rectified spirit from distilleries and warehouses.—The following quantities of rectified spirit were issued during the year for medicinal, industrial and scientific purposes from

Rajshahi Mission Hospital.

Manufacture of tinctures and medicines.—Seven bonded laboratories in Calcutta and one in Konnagar contimed to manufacture tinctures and medicinal preparations during the year under report; 57,226 London proof gallons of rectified spirit contained in tinctures and medicinal preparations were issued from the eight laboratories on payment of duty against 60,888 London proof gallons issued during the preceding year. The duty realized on tinctures issued from bonded laboratories at Rs. 5 per London proof gallon on the spirit contents was Rs. 2,86,130 of which Rs. 2,84,311 was realized in Bengal and Rs. 1,819 in other provinces against Rs. 3,04,440 in the year 1927-28. 'Medicinal preparations containing 23,586 Loudon proof gallons of spirit were issued duty-free, to the charitable dispensaries and hospitals in the various provinces in addition to 7,298 London proof gallons of rectified spirit and 1,925 London proof gallons of absolute alcohol. Thirty-seven London proof gallons of rectified spirit and 75 London proof gallons of absolute alcohol were issued, duty-free to the following institutions from the Konnagar Bonded Laboratory:--

Presidency College.

Bengal Tanning Institute.

Besides the above 101:4 London proof gallons of rum were issued duty-free for use in hospitals from the Konnagar Bonded Laboratory.

Permit-holders in Bengal took supplies of 19,074:5 London proof gallons of rectified spirit and absolute alcohol from the distilleries and bonded laboratories on payment of Rs. 95,372-8 as duty.

361.6, 134.0 and 10.0 London proof gallons of rectified spirit and absolute alcohol were supplied to permit-holders in Assam, United Provinces and Madras, respectively, on payment of duty in those provinces.

There is no doubt that the introduction of the concession rate of duty on rectified spirit required for medicinal purposes in 1921 has given a great impetus to the growth of the pharmaceutical industry in the province. result, however, of a reduction of prices on account of competition with foreign manufacturers has been an alarming increase in the sale of adulterated drugs and inferior medicinal Foreign firms do not preparations. appear to be the only sinners in this respect. In some cases locally manufactured products have also been found to be of a very inferior type. It is, of course, one of the conditions in the form of the license that "all spirituous preparations appearing in the British Pharmacopæia shall be manufactured strictly in accordance with the recipe, directions and specification laid down therein." As regards the alcoholic

strength, it is periodically tested in the Excise Laboratory but the department has no agencies to test the drug contents of these preparations with which it is not also concerned. There are no arrangements now from the Public Health Department to test the drug strengths with the result that the condition quoted above as regards preparation according to recipe and specification laid down in the British Pharmacoporia is more in the nature of a pions hope than that of a practical proposition.

41. Issues of rectified spirit and absolute alcohol from bonded laboratories and distilleries for medicinal, industrial and other purposes on payment of full duty.—If ive thousand four hundred and ninety-seven London proof gallons of rectified spirit and absolute alcohol were sold on payment of full duty from the distilleries and bonded laboratories, for industrial, medicinal and scientific purposes to licensed chemists, druggists, etc.

#### SECTION IV—Hemp Drugs.

#### Ganja.

- 47. Retail licenses.— The total number of licenses issued in the Presidency for the retail sale of ganja was 1,205 against 1,208 in 1927-28.
- 48. Consumption.—The total quantity of ganja consumed in the Presidency amounted to 1,577 manuds 19 seers against 1,670 manuds 21 seers showing a net decrease of 93 manuds 2 seers or 5.5 per cent.

The consumption fell in 24 districts and increased in 3 districts. The fall in consumption is due principally to the increase in the retail selling price of the drug from April 1928. The increase in the 3 districts of Midnapore, Jalpaiguri and Howrah is nominal and calls for no explanation.

49. Total revenue.—The receipt for the year amounted to Rs. 49,91,507 against Rs. 46,86,329 in the previous year, the net increase being Rs. 3,05,178. The revenue from license fees and gola rent decreased by Rs. 50,937 and Rs. 40 respectively while that from duty increased by Rs. 3,56,516. The decrease

in license fees is due to the decrease in consumption while the increase in duty is due to the increase in the rate of duty from 1st April 1928. It would thus appear that the increase in duty was justified as it has brought about increased revenue with decrease in consumption.

- 50. Incidence of taxation.—The incidence of license fees per seer of ganja consumed was Rs. 37.6 and that of duty Rs. 40. The total taxation was Rs. 77.6 per seer as compared with 68.7 in the previous year.
- 53. Cultivation and outturn of ganja at Naugaon in Rajshahi.—The following figures indicate the position regarding the operation of ganja cultivation in Naugaon in the Rajshahi district during the last six years:—

Year.	Number of cul- tivat- ors li- censed.	Aren licensed,	Total out- turn.	• • •	out- rn r	Total ex- ports from Nau- gaon.
		Bighas.	Mds.	Mds	s. srs.	Mds.
1923-24	3,681	2,899	8.641	2	38	3,935
1924-25	3,310	2.002	6,689	3	13	4,252
1925-26	3,099	1,761	4,598	2	1.4	4.981
1926-27	2,996	1.800	5,256	2	36	4,722
1927-28	3,010	1,796	3,073	3	15	4,709
1928-29	3,231	1,900	5,526	2	35	4,131

The area sanctioned for cultivation during the year under report was 1,900 bighas. There was no case of cancellation or surrender of license during the year. One cultivator was, however debarred from holding any license in future. The area actually cultivated was 1,922 bighas 3 cottahs and 5 chitaks against 1,798 bighas 6 cottahs and 4 chitaks in the previous year.

The prospect of the crop was satisfactory till December when the plants were damaged by red spiders followed by a pest of hirkatis (a kind of insect pest). There was also some damage due to rains in December and a storm in January. The outturn of ganja was not however so bad as had been apprehended. In spite of these unfavourable conditions the outturn of ganja was quite fair.

#### Bhang.

- revenue.—The Licenses and total number of retail licenses for the sale of bhang was 323 against 316 in the previous year. The total number of druggists' permits issued was 621 against 550 in the previous year. The total revenue from liceuse fees and duty amounted to Rs. 1,92,330 as compared with Rs. 2,03,251 in 1927-28, showing a decrease of Rs. 10,921.
- principal 59. Consumption.—The demand for bhang was, as in the previous years, confined to most of the West In most of the Bengal districts. districts in East Bengal, the demand for bhang as an intoxicant is very small. The total quantity of bhang consumed in the Presidency, amounted to 389 mannds 32 seers against 427 mannds and 10 seers in the previous year—a decrease of 37 maunds 18 seers. There was noticeable decrease in Calcutta, 24-Parganas, Burdwan, and Dacca. Reasons for this decrease in consumption of bhang are being investigated.
- 60. Exports.—Two maunds and 30 seers of duty-paid bhang were exported from Hooghly to French Chandernagore against 3 maunds in the previous year. One maund of duty-paid bhang was issued from Comilla to the adjacent state of Tripura, against 27 seers in the preceding year.
- Abuse.—No case of abuse of medicinal preparations from the drug was reported during the year.

#### Charas.

Licenses and revenue.—The total number of licenses issued in the Presidency for the retail sale of charas was 34 against the same number in 1927-There were 3 wholesale licenses against the same number in the preceding year. The total receipts for the year amounted to Rs. 3,05,382 as compared with Rs. 3,26,948 in 1927 28, showing a decrease of Rs. 21,566. There was a decrease of Rs. 39,030 under the head "License fees" due to decrease in the consumption of the drug for reasons explained below. was an increase of Rs. 17,464 There the head." Duty" on account of the increase in the rate of duty from Rs. 50 to Rs. 70 per seer with effect from the 1st April 1928.

Import, export and consumption.—The total quantity of charas imported into the Presidency was 55 manuds 37 seers against 71 manuds and 30 seers in the previous year. The drug was, as usual, imported by the wholesale dealers of Calcutta and Birbhum direct from the Punjab and supplied to the retail vendors in the districts. The total issue to retail shops in the Presidency was 55 mannds and 7 seers as compared with 69 mannds 37 seers in the preceding year, while the consumption in Calcutta amounted to 30 manuals and 24 seers against 42 manuds and 14 seers in the previous year.

The decrease in consumption is partly due to the increase in the retail selling price of the drng from Rs. 140 to Rs. 160 per seer from 1st April 1928 and to a certain extent to the increase in the volume of illicit traffic of the drug from North-West Frontier Province to Calcutta and in the neighbouring districts of Hooghly, Midnapore and 24-Parganas. The point has been dealt with in detail in Section VII of the report.

Four seers of charas were exported to French Chandernagore during the year against two mannds and 10 seers exported during the previous year.

#### SECTION V—Opium.

- Restricted supply of opium.-There was no change in the system of restricted supply of opium to shops in several districts in the Presidency.
- Consumption.—The consumption of excise opium during the year under report was 987 maunds and 24 seers, as compared with 994 manuals and 18 seers in the preceding year.

Consumption increased in 9 districts and decreased in 16. It remained stationary in 2 districts.

Fluctuation in consumption was

normal in most of the districts.

Noticeable increase occurred in two districts only, viz., Bakarganj (82 seers or 6.0 per cent.) and Noakhali (32 seers or 12.2 per cent.). The increase in Bakarganj was due to the increase of the monthly allotment of opium of some shops and to the opening of a new shop to meet gennine local demand. Noakhali the increase was due to the opening of a new opinm, shop to meet local needs.

The decrease in consumption exceeded 6 per cent. in the districts of Murshidabad (59 seers or 11.3 per cent.). Rajshahi (29 seers or 8.3 per cent.) and Darjeeling (46 seers or 18.7 per cent.).

The Collectors of Murshidabad and Rajshahi attribute the fall in consumption to the bad economic condition of the consumers. The decrease in consumption in Darjeeling was mainly due to the heavy fall in sales in the Kalimpong shop. This was due to the fact that Kalimpong formerly used to be the centre of the wool trade where traders from Tibet used to gather during the months of November to March, but the centre has now shifted to Rungpoobazar in Sikkim.

- 66. Licenses for retail sale.—The total number of licenses issued for the retail sale of excise opium was 853, as compared with 854 in the previous year. Four shops were abolished, 1 each in Birbhum, Calcutta, Mymensingh and Rangpur. Three new shops were opened, viz., 1 each in Khuha, Bakarganj and Noakhali.
- 67. Permits and licenses under the Opium and Morphia Rules.—The total number of permits and licenses issued was 1,570 as compared with 1,547 in the previous year. The number includes 29 licenses issued to manufacturing chemists, 609 to dispensing chemists, 73 to Kabirajes and Hakims, and 76 permits to permit-holders (total 787 for intoxicating drugs), and 38 licenses issued to dealers, 616 to chemists, 47 to persons approved under Rules 21 (1) and 21 (2) of the Morphia Rules and 82 to persons authorised under Rule 22 of the same rules (total 783 for morphia drugs). The increase in the number of licenses was due to increase in the number of chemists and druggists in many districts in the Presidency.
- 68. Revenue.—The total receipts amounted to Rs. 48,07,903 as compared with Rs. 47,98,712 in 1927,28.
- 69. Abuse of opium and morphia.—
  The use of morphia as a substitute for opium does not appear to have been prevalent in any district. In the district of Hooghly alone only one solitary case came to notice during the year under report. The administration of opium pills to children prevailed to a very

limited extent among the Bilaspuri population in the mill areas of the district of Hooghly.

#### SECTION VI—Cocaine.

- 72. Licenses and Revenue.—Four hundred and fifty-four licenses were issued during the year to chemists and druggists for the sale of cocaine on prescriptions of qualified medical practitioners as compared with 455 in 1927-28. Eighty-six permits for the possession of cocaine were issued free to managers of hospitals or dispensaries not under Government supervision. Fifty-one permits were issued to qualified medical practitioners and dentists.
- 73. Preventive operations and illicit transactions in cocaine have been dealt with in paragraph 75, Section VII of the report.

# SECTION VII - Offences against the Excise and Opium Laws.

75. Prosecutions and convictions.— The number of prosecutions and convictions during the year as compared with that in 1927-28 is noted below:

Nun, ber of cases:	1927-28.	1928-29.
Prosecuted	5,898	5,423
Convicted	5,62_	5.184
Number of persons—		
Prosecuted	6,179	5,949
Convicted	5,500	5,342

There has been decrease but it is not so marked as to call for any special comment.

There were no new developments as regards the course and method of illicit practices prevalent in the Province. The position as regards Excise offences was fully explained in paragraphs 74 to 77 of the Administration Report for 1925-26. There were, however, reasons to suspect that smuggling of charas on a fairly large scale is going on from the North-West Frontier Province into Calcutta and the neighbouring districts of Hooghly, Midnapore and 24 Parganas. This is probably due to the fact

that the duty on charas was increased from Rs. 50 to Rs. 70 per seer and the retail price was consequently increased from Rs. 140 to Rs. 160 per seer. The consumption of charas has gone down from 69 mannds 37 seers to 55 mannds 7 seers and the revenue has fallen from Rs. 3,26,948 to Rs. 3,05,382. The big drop in revenue and consumption may be partly due to the increase in the rate of duty and retail price but there is no doubt that it is due to a certain extent to the increase in the volume of illicit traffic that is going on. The number of cases detected has increased from 3 to 11 and of persons concerned from 3 to 26. Complaint has been also received from licensed vendors about loss of income on account of the increased activity on the part of sningglers. \*

The departmental officers successfully tackled offences under the Excise and Opinm Laws in most of the districts with the co-operation of Police officials.

In Calcutta efforts to tackle the principal offenders and their associates engaged in illicit traffic in opinuand cocaine were persistently continued throughout the year and the department is thankful for the co-operation it received from the Police and Custom Officials. The illicit traffic inside the city as well as at the railway termini was principally looked after by the Excise detective staff in co-operation with the Police officials, while the illicit traffic on board the vessels in

the port and on the jetties was looked after mainly by the Custom detective staff.

The total seizures of opinm during the last 3 years in the Presidency were as follow:—

	Mds.	ers.
1926-27	60	22
1927-28	39	15
1928.20	4.1	.1

Of the total quantity of opinm seized during the year, 27 mannds 11 seers were seized by the Excise detective staff in Calcutta, 6 mannds and 5 seers by the Railway Excise staff, 6 mannds and 27 seers by the Excise staff in districts, 3 mannds and 19 seers by the Customs detective staff and 22 seers by the Police in Calcutta and Howrah.

The total seizures of cocaine during the last 3 years are noted below:-

	UZ.	gr.
1926-27	701	50
1927-28	2,789	190
1928-29	2,349	202

Of the total quantity seized during the year, 1,698 ounces were seized by the Customs officers on board the vessels in the port of Calcutta, 318 onnces were seized by the Calcutta Excise detective staff, 11 ounces by the Excise staff in districts and 322 ounces were seized by the Police in Calcutta, Howrah, the 24-Parganas and Dacca.

## DEPARTMENT OF ACRICULTURE, BENCAL.

#### Preliminary forecast of the Bhadoi crops of Bengal, 1929-30.

(Note.—On an average of the five years ending 1927-28, the area under autumn rice in Bengal has represented some 6-0 per cent. of the total area under rice in British India.)

Character of the season.—Defective rainful in Fehrnary and March was unfavourable for preparatory tillage and insufficient rainfall up till the middle of April hampered sowings with the result that much less area was sown this year. Since then good showers favoured germination and growth generally excepting in some Eastern districts where untimely heavy rain and early rise of rivers caused considerable damage to the low land crops. The season, on the whole, was a fair one for the crops this year.

Acreage.—The total acreage sown with the different bhadoi crops this year is reported to be 5,821,600 acres as against 6,391,700 and 6,444,700 acres respectively in the corresponding and final forecasts of last year. Of this,

the area under autumn rice is estimated at 5,039,200 acres, as against 5,599,600 and 5,649,000 acres respectively in the corresponding and final forecasts of last year. The decrease in area is attributed to drought at sowing time.

outturn.—According to District Officers' estimates, the outturn of the different bhadoi crops for the Presidency works out at 75 per cent. of the normal this year as against 80 and 82 per cent. respectively in the corresponding and final forecasts of last year.

The autumn rice is estimated to yield an outturn of 74 per cent. of the normal for the Province this year as against the estimate of 95 per cent. both in the corresponding and final forecasts of last year. In my opinion the outturn of autumn rice is an underestimate and that the crop will not fall short of 80 per cent. of the normal this year.

The Accounts of the Calcutta Improvement Trust for the year 1924-25 having been andited by an Anditor appointed by Government, the following Abstract of Accounts is published in accordance with the provisions of section 136 of Bengal Act V of 1911.

J. A. L. SWAN,

Chairman,

Calcutta Improvement Trust.

#### CHAIRMAN.

# Annual Accounts for the year ended 31st March 1925.

I beg to submit the Accounts for the year ended 31st March 1925.

#### CAPITAL ACCOUNT.

RECEIPTS.—The receipts for the year ended 31st March 1925, amounted to Rs. 26ct2 lakhs against an estimate of Rs. 35c59 lakhs. The actuals and estimates of the different sources of receipts compare as follows:—

	Budget.	Actuals.	Difference.
	Rs.	Rs.	$\mathbf{Rs}$ .
Fees under sec-			
tion 78	4,00,000	1,81,100	-2.18,900
Sale of land	30,00,000	23,32,500	6,37,500
Sale of buildings	1,50,000	1,33,100	16,900
Fees for footings	6,000	9,900	+3,900

terials, etc	3,500	5,100	+ 1,6(b)
Total	35,59,500	26,61,700	-8,97,800

In addition to these Capital Receipts a Debenture Loan of Rs. 16 lakhs, bearing interest at 6 per cent. per annum was received from the Imperial Bank of India.

EXPENDITURE.—The total expenditure for the year was Rs. 79.92 lakhs or Rs. 12.82 lakhs in excess over the budget estimate. The main items of difference between the actuals and estimates compare as follows:—

	Budget.	Actuals.	Difference,		
	Rs.	Rs.	Rs.		
Cost of land Engineering Works (in-	37,88,000	59,19,100	+20,31,100		
Works (in- cluding stores) Other charges	26,86,600 1,31,402	18,18,600 1,50,400	-7,68,000 +18,998		
		Total	+12,82,098		

The excess expenditure on cost of land was mainly due to extensive acquisition in Scheme No. VII-E for which purpose the Trust had to contract for a Debenture Laan of Rs. Hillakhs at the close of the year under review.

lakhs at the close of the year under review.

No. value is included in the assets side of the balance sheet in respect of surplus land in possession of the Trust nor in respect of mortgages and rent charges executed by the

purchasers. These at 31st Murch 1925, were estimated to be as follows:—

	ra.
٠.	. 1,48,83,000

•	. 60,36,000
•	. 3,12,91,000
	•

The total loans raised by the Trust amount to Rs. 2,23,50,000.

The closing deficit on capital account which it was estimated would amount to Rs. 242 44 lakks stood at Rs. 241 85 lakks arrived at as follows:—

	Estima Rs.	ted.	Actuals Rs.	ı <b>.</b>

Total	242 · 44	••	241 · 85	ı.

#### REVENUE ACCOUNT.

RECEIPTS.—The total receipts for the year are Rs. 43:79 lakhs against a budget estimate at Rs. 36:76 lakhs. The increase is due mainly to receipts under duty on jute, municipal contribution, rent charges and relate of interest on debenture loans in excess over the ladget provision.

EXPENDITURE.—The expenditure for the year was Rs. 23:73 lakhs against a budget estimate of Rs. 25:87 lakhs. The decrease of Rs. 2:14 lakhs is principally due to savings against the provision for expenditure on the sterling debenture loans and on establishment.

The closing balance on revenue account shows a surplus of Rs. 3,04,67,688-3-5 of which a sum of Rs. 2,41,84,820-2-4 has been spent on capital account to meet payments in excess of capital receipts. The net balance of Rs. 62,82,868-1-1 was held as follows:—

#### DISTRICT REPORTS ON WEATHER AND CROPS.

#### For the week ending on the 2nd October 1929.

Summary.—During the week seasonable rain fell almost all over the province. More rain is, however, needed in parts of West and North Bengal for the dovelopment of late transplanted paddy. Harvesting of jute is still going on in places. The outlook of standing crops is reported to be fairly satisfactory. The average price of common rice for the province has remained practically the same as compared with that of the previous week.

### First Forecast of the Winter Rice Grop of Bengal, 1929-30.

(Note—On an average of the five years ending 1927-28 the area under winter rice in Bengal has represented some 17.7 per cent. of the total area under rice in Britis., India.)

Character of the Season.—Insufficient rainfall in February and March hindered the preparatory tillage for deep-water paddy in East and parts of North Bengal. Good showers in April, however fucilitated the operation and sowings commenced in the low-land tracts. The rainfall in May being defective, was not altogether unfavourable to the growth of young plants, though more rain was needed in some West Bengal districts for the field operations for transplanted rice. In early June, the rainfall being heavy in parts of East Bengal, damaged the low-land crop in places, but was favourable to transplantation of winter paddy in general. During the month of July the rainfall was generally moderate, and the transplanting operation progressed satisfactory. The rainfall in August being defective as a

result of weak monsoon, the progress of transplantation was not so rapid as in last year. The present outlook, so far, is satisfactory, on the whole.

According to the figures returned by the District Officers the total area under winter rice is 14.582,700 acres as compared with 15,112,700 and 15,357,400 acres in the corresponding and final forecasts of last year. The decrease in area is attributed to unfavourable weather at the time of sowing.

Outturn.—From the summary of the district returns appended, it will be seen that Bankura reports more than a normal crop, five districts expect a normal crop, 17 districts report a crop varying from 75 to 99, and the rest below 70 per cent. of the normal.

According to the above estimates the provincial outturn works up to 85 per cent. as against 93 and 99 per cent. of the normal estimated respectively in the first and final forecasts of last year.

### DEPARTMENT OF AGRICULTURE, BENGAL.

### Second Forecast of the Cotton Crops of Bengal, 1929-30.

Dacca, the 5th October 1929.

(Norz.—On an average of the five years ending 1927-28, the area under the cotton crop in Bengal has represented some 0.2 per cent. of the total area ander cotton in India.)

There are two crops—early and late. The "early" crop is chiefly grown in the Chittagong Hill Tracts and the Tripura State and to small extent in other districts. The late grop is grown in Bankura and Midnapore.

Character of the season.—As indicated in the irst forecast, the weather was generally favourable at the sowing time, except in the Tripura

State, where, owing to drought, less area was brought under cultivation this year. Subsequent conditions were helpful for the growth generally, but for heavy rains in Mymensingh and the Tripura State, which affected the prospects of the early crop to some extent. In Bankura the conditions were tavourable throughout. The present outlook of the crop is fair, on the whole, and a fair outturn is anticipated.

Sowings of late variety commenced in Midnapore under fair conditions.

Area sown.—The area sown with early crop is reported to be 76,307 acres this year, as against 77,095 acres in the corresponding forecast of last year. Of the late crop an area of 503 acres is reported to have been sown this year, as against 653 acres reported in the corresponding forecast of last year.

Director of Agriculture, Bengal (offq.).

### DEPARTMENT OF ACRICULTURE, BENCAL.

### Second Forecast of the Sugarcane Crop of Bengal, 1929-30.

Dacca, the 3rd October 1929.

(Note.—On an average of the five years ending 1927-28, the area under sugarcane in Bengal has represented some 7.0 per cent. of the total area under sugarcane in British India.)

Character of the season.—As reported in the first forecast, the weather was generally favourable except for the fact that drought in February and March interfered with the germination and growth of the plants and that excessive rain and flood caused some damage in parts of Eastern Bengal. Since then the conditions have been generally favourable for the development of the crop and the season, so far, may be regarded as fairly satisfactory this year.

Area planted.—The total area planted with the crop for the province is reported to be 197,500 acres this year, against 195,300 and 195,800 acres reported, respectively, in the corresponding and final forecasts of last year.

Outturn.—According to the estimates of District Officers, the average outturn of the crop for the province this year works out at 82 per cent. of the normal, against 77 and 81 per cent. in the corresponding and final forecasts of last year.

Condition figure.—The condition figure for the cane crop is estimated at 82 per cent., as against a ten years' average of 819 per cent. This means that the condition of this year's crop is equal to about 100 per cent. of the ten years' average.

#### DISTRICT REPORTS ON WEATHER AND CROPS.

#### For the week ending on the 9th October 1929.

Summary.—During the week the rainfall was heavy in North Bengal, Mymensingh and Midnapore, and enerally mederate elsewhere. It has materially helped the development of late transplanted winter paddy; good outturn is expected for the province as a whole. Harvesting of jute still continues. Field perations for early spring crops have been delayed by heavy rainfall in places. The average price of ommon rice for the province has fallen by about 0-04 per cent. as compared with that of the previous eek.

### RESOLUTION ON THE REPORTS ON INLAND EMICRATION UNDER THE ASSAM LABOUR AND EMICRATION ACT, 1901 (VI OF 1901), FOR THE YEAR ENDING 30th JUNE 1929.

### COVERNMENT OF BENGAL.

#### REVENUE DEPARTMENT.

#### Emigration.

DARJEELING, THE 14TH OCTOBER 1929.

RESOLUTION-No. 915T.R.

Read—

The Reports on Inland Emigration under the Assam Labour and Emigration Act, 1901 (VI of 1901), for the year ending 30th June 1929, submitted by the Superintendent of Emigration, Calcutta, and the District and Assistant Superintendents of Emigration.

There was an increase in the number of emigrants despatched to the labour districts during the year under review as compared with the

previous year.

2. Recruiting operations in Bengal were conducted, as in the previous year, in the districts of Bankura, Birbhum, Burdwan, Midnapore and Murshidabad. The number of garden sardars employed during the year was 604 (including 104 sardarins) as against 512 in during the year was 604 (including 104 sardarins) as against 512 in the previous year. All worked under the supervision of licensed local agents. The number of local agents' licenses was 10 as against 11 issued in the previous year. The total number of emigrants recruited in Bengal was 993 as against 912 in the previous year, the largest number coming from Birbhum, viz., 846. The total number of recruits from Bengal and other provinces embarking at Goalundo was 19,565 (including those recruited in the Bombay Presidency ontside the Act) as compared with 12,688 in the preceding year.

3. The rest-houses for emigrants at Asansol, Kharagpur, Naihati and Goalundo maintained by the Tea District Labour Association were frequently inspected and their condition was found to be, in all respects.

frequently inspected and their condition was found to be, in all respects,

satisfactory.

4. Eight deaths occurred among the emigrants on transit, viz., two at the halting station at Asansol, four at Naihati and two at Goalundo. No death occurred at Kharagpar. Out of the total number of emigrants who arrived from the recruiting districts in and outside the Presidency of Bengal, nine deserted, viz., five from Kharagpur and four from Goalundo, one was released because he was unwilling to emigrate and 14 were detained, till the close of the year under review, for treatment at the local hospital at Goulundo. There was no death or desertion amongst emigrants during their journeys by steamer from Goalando or by railway from Chandpur to their final destination.

5. In connection with the transport of labour to Assam receipts increased from Rs. 697 to Rs. 750 during the year under review, while the expenditure decreased from Rs. 16,756-4-0 to Rs. 9,341-8-6. The decrease in expenditure is mainly due to the fact that during the year under review no expenditure was incurred on account of leave salary of officers and rent for the quarters provided for the Assistant Superin-

tendent of Emigration and Embarkation Agent at Goulundo.
6. Major W. O. Walker, 1.M.s., held charge of the office of Super-intendent of Emigration, Calcutta, from the beginning of the year up to 12th November 1928, during the absence, on leave, of Lieutenant-Calcut. A Dephare White 1985, who tack over charge and the 1921. Colonel A. Denham White, I.M.S., who took over charge on the 13th idem and held the office for the remaining period of the year.

The thanks of the Governor in Council are due to them and the

local officers for their assistance in the administration of the Act.

By order of the Governor in Council,

H. J. TWYNAM, Secy. to the Govt, of Bengal.

### DEPARTMENT OF AGRICULTURE, BENGAL.

# Monthly Weather and Crop Report of Bengal for September 1929.

- I. Character of the Season.—During the month under review, the rainfall was in excess of the normal in ten districts, while in the rest of the Presidency it was below the average. The usual rainfall statement is appended.
- II. Progress of agricultural operations.— Harvesting of autumn paddy was almost completed and that of jute still continued in some districts. Transplantation of winter paddy was over but the progress was much behindhand than last year.
- III. State of standing crops.—The state of standing crops was generally fair though more rain was needed for the development of transplanted paddy during the latter part of the month.
- IV. Prospects and probable outturn.—The prospects of standing crops were generally satisfactory. The outturn of autumn paddy was estimated at 80 per cent, and that of winter paddy at 85 per cent, of the normal this year.

- V. Damage to standing crops.—No injury to crops was reported from any part of the province except some damage to jute crop by insect pests from parts of Murshidubad, Khulna, Hooghly, Rajshuhi, Cooch Bihar and Faridpur during the early part of the month.
- VI. Condition of agricultural stock.—The condition of live-stock was, on the whole, fair. Stray cases of cattle-disease were, however, reported from seven districts.
- VII. Failure of pasturage and fodder.—Insufficiency of fodder was reported from parts of the 24-Parganas and Dacca.
- VIII. Prices of food-grains.—During the second fortnight of the month, the retail price of common rice of the cheapest quality rose in six districts, fell in five and remained stationary in the rest of the Presidency. It varied from 51 seers per rupee at Jalpaiguri and Noakhali to 8 seers per rupee at Jessore, Khulna, Midnapore, Malda and the Chittagong Hill Traets.
- IX. Condition of agricultural population.— The condition of agricultural population continued to be fair, on the whole.

J. C. Roy,

for Director of Agriculture, Bengal.

Dacca, the 25th October 1929.

### DISTRICT REPORTS ON WEATHER AND CROPS.

### For the week ending on the 23rd October 1929.

Summary.—During the week the rainfall was generally light to moderate, except in parts of North and West Bengal where it was heavy. Harvesting of jute is practically finished. Preparation of lands for spring crops continues, but the operation is being retarded in parts of North and West Bengal by excessive rain. Prospects of standing crops are generally fair. The average price of common rice for the province has risen by about 0.77 per cent. as compared with that of the previous week.
